## Principal's Introduction

The Senior Subject Handbook describes a comprehensive array of options for Albany Creek State High School students and families to explore. In tangible ways, it puts our school's Vision and Values into action. As a school, we want our young people to find success through choosing subjects and pathways that align with their passions, interests and strengths. We aim to foster a culture of belonging and connection where we are all challenged to achieve our personal best within a supportive and inclusive school community. At Albany Creek State High School, we are guided by our school vision of Connected Community, Inclusive Culture, Outstanding Futures and our core values of Integrity, Creativity, Courage and Contribution and I believe you will find evidence of this throughout this Handbook.

The wide range of subjects available to students is indicative of our commitment to engaging students in their education and preparing them for their future. We encourage students to select subjects wisely, adhering to subject prerequisite results, and ensuring that their choices enable them to meet career and personal goals and provide academic challenges and experiences necessary for their future success. Prerequisite results for courses are critically important and required as they indicate a student's readiness to successfully complete the next step in a field of study.

The choices in front of our young people are important and we remind students and families that we have teams of people here at AC to help. Students are encouraged to talk with their Team and classroom teachers as they consider the options available to them. Our Heads of Department, Heads of Student Services, Guidance Officers and members of the Executive Team are also ready to assist, and if we are unsure of the answer, we'll know who to ask.

We are proud that our students can achieve their potential at AC and we understand that a positive sense of belonging shapes a young person's cognitive, behavioural and emotional engagement with school. As students enter this important phase of their schooling, we remind them of the importance of those aspects of school that sit just outside the classroom. Years 10, 11 and 12 students are encouraged to step further into the rich cultural life of the school, be it through taking on leadership roles, contributing to co-curricular sporting and cultural activities, or simply through participating in Spirit Week and House Cup.

All the very best to students and families as you enter an exciting the exciting phase of Senior Secondary at Albany Creek State High!

**Derek Weeks**  
**Principal**

## SCHOOL INFORMATION

Office Hours	8:00am to 4:00pm
Location	Albany Forest Drive, Albany Creek
Postal Address	PO Box 40, Albany Creek 4035
Telephone Number	3325 6333
Student Absence Number	3325 6360
Enrolment Email	<a href="mailto:enrolments@albanycreekshs.eq.edu.au">enrolments@albanycreekshs.eq.edu.au</a>

**OUR VISION**      **Connected Community, Inclusive Culture, Outstanding Futures**

### OUR VALUES

**At Albany Creek State High, we are guided by the following values:**

#### **Integrity**

We build trust through responsible actions and compassion for others.  
We act with respect for ourselves, others and our environment.  
We are authentic, fair and honest. We ensure our actions reflect our words.

#### **Creativity**

We encourage innovation by creating environments where students and staff can explore, experiment and think differently.  
We value fresh ideas that improve our world and support considered risk-taking and problem solving.

#### **Courage**

We choose to do what is right, even when it is hard.  
We face challenges with resilience and understand that growth often happens outside our comfort zone.  
We take appropriate risks and learn from setbacks as part of striving for our best.

#### **Contribution**

We build a strong community through service, connection and belonging.  
We understand the importance of contributing to our own learning and supporting others to achieve their potential.  
We value initiative, teamwork and leadership, knowing we achieve more when we work together.

## KEY PERSONNEL 2027

### Executive Team

	<b>Staff Member</b>	<b>Telephone</b>
Principal	Derek Weeks	3325 6333
Deputy Principal – Year 7	Bharati Singh	3325 6333
Deputy Principal – Year 8	Rebekah Power	3325 6333
Deputy Principal – Year 9	Tanya Grant	3325 6333
Deputy Principal – Year 10	Jay Collins	3325 6333
Deputy Principal – Year 11	Sandy Kane	3325 6333
Deputy Principal – Year 12	Sandy Kane	3325 6333

### Head of Student Services

Year 10	Sue Swan	3325 6348
Year 11 & 12	Luke Martin	3325 6370

### Heads of Department

English	Jessica McKinnon	3325 6388
Mathematics	Jane Irvin	3325 6334
Science	Kate Box	3325 6318
Humanities	Joe Daniels	3325 6384
Health and Physical Education / Sport	Adam Nicholson	3325 6372
Industrial Design and Technology, Information Technology & Languages	Alison Read-Marczak	3325 6379
Applied Technology & Business	Natascha Counsell	3325 6357
The Arts	Deb Ruellan	3325 6396

### Student Support and Services

Guidance Officer – Years 8, 10 & 12	Leanne Jarvis	3325 6305
Guidance Officer – Years 7, 9 & 11	Ruth Donovan	3325 6304
Social Worker	Jessica Hornby	3325 6394
School Based Youth Health Nurse	Brooke Bowley	3325 6321
School Chaplain	David Hockey	3325 6362
Defence Transition Mentor	Kristy Riley	3325 6328
Uniform Shop	Tuesday and Thursday 8.00 – 9.00am	3325 6368

*For a more detailed list of staff and their contact details, please refer to the [ACSHS website](#)*

## GLOSSARY OF TERMS

**ATAR: THE AUSTRALIAN TERTIARY ADMISSION RANK:** is the primary criterion for entry into most undergraduate-entry university programs in Australia. It was gradually introduced during 2009 and 2010 to replace the Universities Admission Index, Equivalent National Tertiary Entrance Rank and Tertiary Entrance Rank. The first Queensland students to receive an ATAR instead of an OP graduated from Year 12 in 2021.

**COMPULSORY PARTICIPATION PHASE:** When a young person completes Year 10 or turns 16, they enter the compulsory participation phase of learning. During this phase they must participate in an eligible option (approved education or training, paid employment or a combination of approved education, training and paid employment) for a further two years.

**LEARNING ACCOUNT:** The Learning Account is opened for each student with the Queensland Curriculum and Assessment Authority QCAA and records all learning achievements earned by the student during their Senior Phase of Learning. The achievements of students at school will be recorded by the school in their Learning Account. Achievements by students through other learning providers such as TAFE or accredited groups such as the Australian Music Examination Board (AMEB) will be recorded directly by those providers into the student's Learning Account with QCAA.

**LUI: LEARNERS UNIQUE IDENTIFIER:** The Learners Unique Identifier (LUI) is the Learning Account registration number and password which identifies each student in the Senior Phase of Learning with the QCAA. Students are able to use their LUI to access their own Learning Account with the QCAA as well as access a range of helpful websites relevant to their learning and their future study and career paths.

**QCAA: QUEENSLAND CURRICULUM AND ASSESSMENT AUTHORITY:** QCAA issues the Senior Education Profile showing a student's subject results.

**QTAC: QUEENSLAND TERTIARY ADMISSIONS CENTRE:** QTAC is responsible for the calculation of ATAR. This organization also handles tertiary-entrance applications on behalf of tertiary institutions. If a student wants to apply for a tertiary course, they do so through QTAC for most courses.

**QCE: QUEENSLAND CERTIFICATE OF EDUCATION:** The QCE will be awarded to all students completing the requirements. The QCE is Queensland's senior schooling qualification. It is internationally recognised and offers flexibility in what is learnt, as well as where and when learning occurs.

**QCIA: QUEENSLAND CERTIFICATE OF INDIVIDUAL ACHIEVEMENT:** The QCIA recognises the achievements of students who are on highly individualised learning programs. To be eligible, students must have impairments or difficulties in learning that are not primarily due to socio-economic, cultural or linguistic factors. The QCIA is an official record that students have completed at least twelve years of education and provides students with a summary of their knowledge and skills that they can present to employers and training providers.

**SAT: SCHOOL-BASED APPRENTICESHIP and TRAINEESHIP:** If a student takes up a SAT, their week could include school classes, time working with an employer and/or time with a trainer.

**SET: SENIOR EDUCATION AND TRAINING PLANS:** A SET Plan will be worked through with all Year 10 students to ensure that all students are either "Learning or Earning" in the years immediately after the compulsory years of schooling. The aim of the SET Plan is to set out student's planned courses of education and training through the Senior Phase of Learning. While the plans will help students decide on their course of study after Year 10, they will still be flexible enough to allow students to make changes when and if needed.

**SEP: SENIOR EDUCATION PROFILE:** At the end of Year 12, all school students will receive a Senior Education Profile which will list all their learning achievements at school.

**TAFE: TECHNICAL AND FURTHER EDUCATION:** is part of the tertiary education sector which provides vocational education and training at certificate and diploma levels.

**USI: UNIQUE STUDENT IDENTIFIER:** From 1 January 2015, all students doing nationally recognised training need to have a Unique Student Identifier (USI). This includes students doing Vocational Education Training (VET) in schools, at TAFE or through a traineeship or apprenticeship.

**VET: VOCATIONAL EDUCATION AND TRAINING:** VET is a national system designed to skill workers to work in particular industries eg. Business, childcare, computers and multimedia, hospitality, retail and creative arts. VET opportunities are available through school subjects, TAFE or school-based traineeships and apprenticeships.

## HOW DOES THE QCE WORK?

To receive a QCE, you must achieve 20 credits of learning, at the set standard, in a set pattern, while meeting literacy and numeracy requirements.

Typically, students will study six subjects/courses across Years 11 and 12. Many students choose to include vocational education and training (VET) courses in their QCE pathway and some may also wish to extend their learning through university courses or other recognised study.

### Set amount

20 credits from contributing courses of study, including:

- QCAA-developed subjects or courses
- vocational education and training (VET) qualifications
- non-Queensland studies
- recognised studies.

### Set pattern

12 credits from completed Core courses of study and 8 credits from any combination of:

- Core
- Preparatory (maximum 4)
- Complementary (maximum 8).

### Set standard

Satisfactory completion, grade of C or better, competency or qualification completion, pass or equivalent

### Literacy & numeracy

Students must meet literacy and numeracy requirements through one of the available learning options.

## WHAT CAN I STUDY?

The QCE lets you choose from a wide range of subjects and course. There are three categories of learning – Core, Preparatory and Complementary – and some subjects and course are worth more credit than others. The table below lists the types of courses, their QCE category, credit values and Australian Tertiary Admission Rank (ATAR) eligibility.

Course type	QCE category	QCE credit	ATAR
<b>General subjects</b> General subjects primarily prepare you for tertiary study, further education and training and work.	<b>Core</b>	Up to 4 per course	<b>All subjects may contribute</b>
<b>Applied subjects</b> Applied subjects focus on practical skills and prepare you for work.	<b>Core</b>	Up to 4 per course	<b>Only 1 may contribute</b> when combined with 4 General subjects
<b>Short courses</b> Short courses provide a foundation for further learning in a range of areas.	<b>Preparatory or Complementary</b> depending on course	1 per course	<b>Short courses do not contribute</b>
<b>Vocational education and training</b> VET qualifications develop your skills and get you ready for work through practical learning. VET can lead to further education and training.	<b>Core, Preparatory or Complementary</b> depending on course	Up to 8 per course	<b>Only 1 may contribute</b> at Certificate III or higher, when combined with 4 General subjects
<b>Other courses</b> Other courses allow you to study a specific area of interest. These include recognised certificates and awards, and university subjects studied while at school.	<b>Core, Preparatory or Complementary</b> depending on course	As recognised by the QCAA	<b>Check with QTAC</b> depends on course

## Example Pathway Plans

### Direct entry to University – ATAR

Students planning on seeking direct entrance to university via an ATAR are recommended to choose at least 5 general subjects and may also choose an applied or essential subject, or choose a Certificate III course or higher, delivered on campus at Albany Creek SHS. ATARs are calculated based on a student's five best scaled results. Therefore, it is important to have a minimum of five general subjects to have the best chance of achieving the ATAR required to gain entry into university. Students undertaking this pathway will have a focus on academic achievement in the courses they study and it is not recommended they undertake courses that require them to be off campus during the school day.

### Alternative entry to Tertiary Studies – Certificate III or Higher

Students planning on seeking entry to university via a rank by achieving a Certificate III or higher are recommended to study up to 3 general subjects plus a Certificate III, IV or Diploma. Students choosing this pathway need to research the entry requirements to University and TAFE courses to ensure this pathway allows them entry into the courses they are intending on apply for at the end of Year 12. Students should study general subjects to meet university pre-requisites and recommendations such as English, Science, Mathematics or other subjects to meet entry requirements to courses and institutions.

### Entry into the TAFE, Apprenticeships and Work

Students seeking entry into the workforce, TAFE, Traineeships and Apprenticeships directly after Year 12, should choose a course consisting of predominately Applied, Essential or Certificate courses. Students may choose 1 or 2 General subjects that are recommended or align to the industry they are seeking. For example, it is recommended that students entering the electrical trades have a background in General Mathematics. Students choosing this pathway may also choose courses that require them to be off campus during the school week such as TAFE courses and School Based Apprenticeship or Traineeships with the understanding that they will need to catch up on school work they have missed. Students choosing off campus courses may have a clash between their course and assessment at Albany Creek SHS and will need to ensure they meet assessment policy requirements.

<b>Example 1</b> Direct entry to University – ATAR	<b>Example 2</b> Alternative entry to Tertiary Studies – Certificate III or Higher	<b>Example 3</b> Entry into the TAFE, Apprenticeships and Work
English	Essential English	Essential English
Mathematical Methods	General Mathematics	General Mathematics
Accounting	Certificate III Health Support Services	Certificate III Sport, Aquatics and Recreation
Modern History	Visual Arts in Practice	Science in Practice
Chemistry	Health	Engineering Skills
Dance	Sport and Recreation	SAT Certificate III in Carpentry 30% of certificate completed whilst at school

## ASSESSMENT AND RESULTS

How you will be assessed in Years 11 and 12 depends on what you study:

### QCAA General subjects

General subjects have three internal assessments (set and marked by schools) and one external assessment (set and marked by the QCAA). In most subjects, the external assessment contributes 25% to the final subject result. In Mathematics and Science subjects, the external assessment contributes 50%. Students in each subject will sit the external assessments at the same time in schools across Queensland.

### QCAA Applied subjects

Applied subjects have four internal assessments (set and marked by schools). In Essential English and Essential Mathematics, one of the assessments is a common internal assessment (set by the QCAA and marked by schools). There is no external assessment in Applied subjects.

### QCAA Short Courses

Short Courses have two internal assessments (set and marked by schools).

### VET

VET assessment varies, depending on the type of course. It may include observation, written assessment, questioning, work samples or third-party feedback.

### Other courses

Assessment in other courses varies, depending on the course.

### Access arrangements and reasonable adjustments

Access arrangements and reasonable adjustments (AARA) are for students who may have disability, impairment and/or medical conditions, or experience other circumstances that may be a barrier to their performance in assessment. If you may need AARA to complete assessments, [contact the school](#).

### Results and reporting

Your final subject results and QCE can be accessed in the Student Portal via the myQCE website in December — at the end of Year 12. You will need your 10-digit LUI to access the Student Portal.

## TERTIARY ENTRANCE ATAR

The Australian Tertiary Admission Rank (ATAR) will be used to select school leavers for tertiary entrance from 2020. It is used nationally and indicates a student's position relative to other ATAR-eligible students.

If you intend to go to university, your school can help you plan your senior studies to meet ATAR eligibility requirements and the QCE requirements.

The Queensland Tertiary Admissions Centre (QTAC) will calculate ATARs for students at the end of Year 12. QTAC will calculate your ATAR based on a student's:

- best five General subjects, or
- best four General subjects, plus one Applied subject, or
- best four General subjects, plus one VET qualification at Certificate III or above.

### English requirement

Eligibility for an ATAR will require satisfactory completion of a QCAA English subject.

Satisfactory completion will require students to attain a result that is equivalent to a C Level of Achievement in one of five subjects — English, Essential English, Literature, English and Literature Extension or English as an Additional Language.

While students must meet this standard to be eligible to receive an ATAR, it is not mandatory for a student's English result to be included in the calculation of their ATAR.

In addition, the following subject combination rules apply:

- only General English subjects or Applied English subjects can be included in the ATAR, but not both
- only General mathematics subjects or Essential Mathematics can be included in the ATAR, but not both
- if you complete the same Language subject (eg Chinese) as both an internally-assessed subject and a Senior External Examination, only one result can be included in your ATAR.

You will find more information on [QTAC's website](#).

### **Other tertiary entrance pathways**

Each university has its own policies regarding school leavers without an ATAR.

If you are not eligible for an ATAR but wish to gain entry to a tertiary course, check with QTAC and/or the relevant university. Depending on the university, you may be able to gain entry with other qualifications.

The Albany Creek State High School Guidance Officers can also help you understand the different tertiary entrance pathways and the best options for you.

## **CHOOSING WHAT TO STUDY**

Some of the most important decisions you make at school are choosing subjects to take in Years 8, 9 and 10, later leading to your selection of a course of study in Years 11 and 12.

These decisions are important since they may directly affect your success at school and how you feel about school. They may also impact on your career plans when you leave school.

### **Overall Plan**

As an overall plan, it is suggested that you choose subjects which:

- you enjoy
- you have enjoyed some success in
- will help you achieve your chosen career goals or keep your career options open
- will develop skills, knowledge and attitudes useful throughout your life.

If you follow these guidelines and ask for help when you need it, you should come up with a study program that is appropriate for you and that you will enjoy.

### **Guidelines**

#### *Keep your options open*

At the moment you may not know exactly what you want to do when you finish school. This is normal at this stage of your life and means that it's important for you to explore many options.

It is wise to keep your options open. This means choosing a selection of subjects that makes it possible for you to continue exploring your career options before making more specific decisions in the future.

In addition, you will be able to choose from a range of electives that are designed to develop your interests and practical skills.

### **Think about career options**

It is helpful to have some ideas about possible career choices, even though these ideas may change when you learn more about yourself and the world of work.

Your school may have a program to help you with career exploration. If not, talk to your Guidance Officer and check the following sources of information on careers:

- myfuture – national career information service at <http://www.myfuture.edu.au>

- Career Information Service at <https://myqce.qcaa.qld.edu.au/>
- Look at the Guidance information on the school website at <https://albanycreekshs.eq.edu.au/support-and-resources/guidance-officer>
- Other career information such as brochures from industry groups which show the various pathways to jobs in these industries
- Google the industry you're interested in on the Internet to find current information
- Employers and other people who are working in the job you're interested in.

After checking through this information, it is likely that you will come up with a list of prerequisite subjects needed for courses and occupations that interest you. If you are still unsure, check with your Guidance Officer.

### **Find out about the subjects or units of study offered by your school**

It is important to find out as much as possible about the subjects offered at your school.

The following ideas will help.

- Read the subject descriptions provided by your school.
- Talk to the Heads of Department and subject teachers at your school.
- Look at textbooks and resources used by students in the subjects.
- Talk to students who are already studying the subjects.
- Listen carefully at subject talks and subject selection nights.
- When investigating a subject to see if it is suitable for you, find out about the content (ie what topics are covered) and how it is taught and assessed. For example:
  - Does the subject mainly involve learning from a textbook?
  - Are there any excursions, practical work, or experiments?
  - How much assessment is based on exams compared to assignments, theory compared to practical work, written compared to oral work?
  - Your choice of subjects may affect your choice of a study program in Years 11 and 12.  
For example:
    - It will be difficult in the future to take Mathematical Methods and Specialist Mathematics without a strong background in Years 8, 9 and 10 Mathematics.
    - Chemistry and Physics will be more manageable if good results are obtained in Years 8, 9 and 10 Mathematics and Science.
    - Music and Languages in the Senior years almost always prefer previous study in Years 8, 9 and 10.
    - Successful achievement in prerequisite subjects in Year 10 may be required to enrol in particular Year 11 and 12 subjects.

## **Make a decision about a combination of subjects or units that suits you**

You are an individual, and your particular study needs and requirements may be quite different from those of other students. This means that it is unwise to either take or avoid a subject because:

- someone told you that you will like or dislike it
- your friends are or are not taking it
- you like or dislike the teacher
- you have heard that “all the boys or girls take that subject or unit”.

Be honest about your abilities and realistic with your occupational ideas. There is little to be gained by continuing with subjects or units that have proved very difficult even after you have put in your best effort.

Also, if your career choices require the study of certain subjects, do you have the ability and determination to work hard enough to achieve the results required?

## **Be prepared to ask for help**

If you need more help, then ask for it. Talk to your parents, teachers, Guidance Officer or Heads of Department. Make use of the school subject selection program.

## FAQs

### **I don't know what I want to do after Year 12. What subjects should I study?**

If you are not sure what you want to do after Year 12, choose subjects you like or have an interest in, and in which you are likely to do well.

The [myQCE](#) website has lots of information and resources that may help you with your career pathway planning.

### **I want to do further study after Year 12. Which subjects should I take?**

If you intend to do further study after completing Year 12, you should check how students are selected for your preferred course/s. You need to ensure you choose subjects that fulfil the prerequisites for the course/s you are considering. You should then choose subjects that interest you and in which you are likely to do well.

Albany Creek State High School can help you to plan your senior studies to ensure you meet eligibility requirements, subject prerequisites, and other course entry requirements.

### **I enjoy VET subjects. What if I decide to do further study after Year 12?**

If you complete an AQF Certificate III or higher-level VET qualification while at school, you may be able to use this as the basis of admission to a higher education course. You may also be given credit at TAFE for units of competency or qualifications you have completed during Years 11 and 12.

### **I want to start a school-based traineeship/ apprenticeship. What can I do when I leave Year 12?**

School-based apprenticeships are unlikely to be completed while at school. If you start one, you may complete it as a full-time or part-time apprenticeship after Year 12. Once you have completed your training, you may use the apprenticeship to enter the workforce or continue with further study.

If you complete a school-based traineeship at school, you may use it to enter the workforce or continue with further study after Year 12.

The school guidance officer can help you understand school-based traineeships/ apprenticeships and help you investigate the best options for you.

### **I want to get a job after Year 12. Can I return to study later?**

If you enter the workforce after completing Year 12, you can return to further study at any time. To be eligible for a course, you must have successfully completed any prerequisite subjects.

If you do not meet prerequisite subjects based on your senior school subjects, there may be other learning options that the institutions and courses you are applying to accept as equivalent.

Tertiary institutions welcome applications from mature age and other applicants who are not seeking entry to tertiary courses immediately following Year 12.

If you have one, your ATAR from senior schooling will still be relevant, and for many institutions so will other qualifications and experiences you have gained since leaving school.

Contact QTAC or the institution you are seeking entry to for specific advice, including upgrading pathways.

# YEAR 10 SUBJECT SELECTIONS

## GENERAL INFORMATION

The Senior Subject Handbook – Years 10, 11 and 12 provides general information about the pathways available to students entering the Senior Phase of learning, as well as specific information about the course content in each of the subjects offered. The wide range of subjects available to students is indicative of our commitment to engaging students in their senior phase of learning as well as catering for a range of learning needs.

It is important that students take the time to read through the introductory pages which provide guidelines with respect to selecting subjects. Choices should be guided by interest, ability, recent academic results and future career pathways. Particular attention should be paid to the necessary pre-requisites for entry into Senior courses.

The senior studies program is designed so that all students select six subjects or courses of study. This may include General and Applied subjects, University Subjects, school-based traineeships and apprenticeships, external vocational study, short courses and employment related programs. Assistance in selecting subjects will be provided to all students through the Student Education Training Plan (SET Plan) process.

**All students must attend their SET Plan interviews in order for subject choices to be made.**

Throughout each semester, students will be required to complete all assessment tasks and maintain high levels of attendance in order to receive credit for their subjects. We encourage students to select subjects wisely ensuring that choices enable them to meet career and personal goals, provide academic challenges and experiences necessary for your future success.

## LEARNING CONNECTIONS SUPPORT

In Senior Secondary, SET Plans (Senior Education and Training Plans) with a transition focus are developed with students and parents in Year 10. These plans outline goals across areas of academic learning, personal dimensions and work-related areas. The SET Plan interviews are facilitated with experienced staff with the support of the Guidance Officer as needed.

Additional support and expertise can be accessed through disability specific support personnel. Students leaving Year 12 aim to graduate having achieved these goals and be prepared for post-school life, with independence being an overall aim for students with disabilities.

Students have opportunities to study school-based subjects as well as subjects at university and TAFE and can undertake traineeships based on their interests, abilities, and work ethic. Students may also participate in work experience placements to develop work readiness skills prior to undertaking a school-based traineeship. Each pathway is individually planned through the SET Plan process.

In the last six months of senior schooling, students may sign with a Disability Employment Service (DES) who can provide additional support finding casual or part-time employment with supportive employers. On completion of twelve years of schooling, our students have the opportunity to achieve either the Queensland Certificate of Education (QCE) or Queensland Certificate of Individual Achievement (QCIA) if they meet the required prerequisites.

All students engage in timetabled classes with their peers for all or part of their program, with varying levels of support. Support is offered to students based on individual need and may include in-class support, study line assistance (tutorials) and homework club. Students may also participate in regular timetabled classes with their peers and achieve individualised learning outcomes through a QCIA pathway.

## YEAR 10 SUBJECTS, PREREQUISITES AND PATHWAYS

Learning Area	Year 10 Subject Name	Year 9 Result	Years 11 & 12 Pathway
<b>English</b>  <i>All students must choose one subject from this Learning Area</i>	General English Preparation	C in English	English
	General Literature Preparation	B in English	Literature
	Essential English*	Nil	Essential English*
<b>Mathematics</b>  <i>All students must choose one subject from this Learning Area</i>	General Mathematics Preparation	C in Mathematics	General Mathematics
	General Math Methods & Specialist Mathematics	B in Mathematics	Mathematical Methods Specialist Mathematics
	Essential Mathematics*	Nil	Essential Mathematics*
<b>Science</b>  <i>All students must choose one subject from this Learning Area</i>	General Biology Preparation	C in Science	Biology
	General Chemistry Preparation	C in Science	Chemistry
	General Physics Preparation	B in Science	Physics
	General Psychology Preparation	C in Science	Psychology
	Science in Practice Preparation	Nil	Science in Practice
<b>Humanities</b>	General Legal Studies Preparation	C in Humanities or C in English	Legal Studies
	General Geography/Tourism Preparation	C in Geography or C in English	Geography
			Certificate III Tourism
	General History Preparation	C in History or C in English	Ancient History Modern History
Humanities/Tourism Preparation	Nil	Social & Community Studies Certificate III Tourism	
<b>Health and Physical Education</b>	General Health & Physical Education Preparation	C in HPE or C in English	Health
			Physical Education
	Sport & Recreation Preparation	Nil	Sport & Recreation
			Certificate III in Fitness
	Program of Excellence – Football*	Nil	Certificate III in Fitness
			Certificate III in Health Services Assistance

Learning Area	Year 10 Subject Name	Year 9 Result	Years 11 & 12 Pathway
<b>Languages</b>	General Japanese Preparation	C in Japanese	Japanese
<b>Business</b>	General Accounting & Business Preparation	C in Economics and Business or C in English	Accounting Business
	Business Studies Preparation	Nil	Certificate III Business Diploma of Business
<b>Information Technology</b>	General Digital Solutions Preparation	C in Digital Technologies	Digital Solutions
	Information & Communication Technology Preparation	Nil	Certificate III in Information Technology
<b>Applied Technology</b>	General Food & Nutrition Preparation	C in Food and Fibre Production	Food & Nutrition
	Hospitality Practices Preparation	Nil	Hospitality Practices Certificate II in Hospitality
	Fashion Preparation	Nil	Applied Fashion
<b>Industrial Design &amp; Technology</b>	General Engineering Technology Preparation	C in Design and Technologies	Engineering
	General Design Preparation		Design
	Materials & Technologies Specialisations	Nil	<i>Furnishing Skills</i>
			<i>Industrial Graphics Skills</i>
			Certificate II in Construction Pathways Certificate II in Engineering Pathways
<b>The Arts</b>	General Dance Preparation	C in Dance	Dance Certificate III/IV in Dance Performance
	General Drama Preparation	C in English	Drama
	General Music Preparation	C in Music	Music Music Extension
	General Visual Art Preparation	C in Art	Visual Art
	General Film, Television & New Media Preparation	C in Media	Film, Television & New Media
	The Arts Production & Performance Preparation	Nil	Media Arts in Practice Visual Arts in Practice

# YEAR 10 CURRICULUM OFFERINGS

Subjects offered at Albany Creek State High School are:

## Mandatory subjects

These subjects are required to be studied by all students for the entire year; English and Mathematics

## Elective subjects

Elective subjects are studied for 2 semesters (year-long)

**Students should thoroughly read the descriptions of all subject offerings before completing the subject selection form. Particular note should be taken of the Senior subject prerequisites at the bottom of each subject description.**

### English Preparation Courses

- General English
- General Literature
- Essential English

### Mathematics Preparation Courses

- General Mathematics
- Essential Mathematics
- General Mathematical Methods and Specialist Mathematics

### Science Preparation Courses

- General Biology
- General Chemistry
- General Physics
- General Psychology
- Science in Practice

### Humanities Preparation Courses

- General History (Modern and Ancient)
- General Legal Studies
- General Geography/ Certificate III in Tourism
- Humanities/ Certificate III in Tourism

### Health and Physical Education Preparation Courses

- General Health and Physical Education
- Sport and Recreation course

### Languages Preparation Course

- General Japanese

### Business and Information Technology Preparation Courses

- General Business & Accounting
- General Digital Solutions
- Business Studies
- Information & Communication Technology

### Applied Technology Preparation Courses

- General Food and Nutrition
- Hospitality Practices
- Fashion

### Industrial Design & Technology Preparation Courses

- General Design
- General Engineering Technology
- Materials & Technologies Specialisations

### The Arts Preparation Courses

- General Dance
- General Drama
- General Film, Television & New Media
- General Music
- General Visual Art
- The Arts – Production and Performance course

## General English Preparation Course

The study of English teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the English Preparation Course, students interact with others and listen to and create spoken and multimodal texts including literary texts. With a range of purposes and for audiences, they discuss ideas and responses to representations, making connections and providing substantiation. They select and experiment with text structures to organise and develop ideas. They select, vary and experiment with language features including rhetorical and literary devices, and experiment with multimodal features and features of voice. Students explore Shakespeare, Poetry, a Novel and representations in the Media.

In English, students develop the following skills:

- Critical thinking through evaluation and analysis of texts.
- They read, view and comprehend a range of texts created to inform, influence and engage audiences.
- They analyse and evaluate representations of people, places, events and concepts, and how interpretations of these may be influenced by readers and viewers.
- They analyse the effects of text structures, and language features including literary devices, intertextual connections, and multimodal features, and their contribution to the aesthetic qualities of texts.

Students who engage in this preparation course will be equipped with the foundation learning to engage in English as a Senior Subject.

### **Learning Experiences:**

- Shakespeare
- Poetry
- Novel Study
- Representations in the Media

### **Assessment:**

- Extended response (Imaginative written): Monologue
- Extended response (Analytical): Online Essay
- Extended Response (Exam): Analytical Essay
- Spoken Response: Persuasive Multimodal Presentation

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway of English

## General Literature Preparation Course

The study of Literature teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In Literature Preparation Course, students interact with others, and listen to and create spoken and multimodal texts including literary texts. With a range of purposes and for audiences, they discuss ideas and responses to representations, making connections and providing substantiation. They select and experiment with text structures to organise and develop ideas. They select, vary and experiment with language features including rhetorical and literary devices, and experiment with multimodal features and features of voice. Students explore Shakespeare, Poetry, Classic Literature and Dramatic Performances.

In Literature students develop the following skills:

- Creativity and critical thinking through creation, evaluation and analysis of texts.
- They read, view and comprehend a range of texts created to inform, influence and engage audiences. They analyse and evaluate representations of people, places, events and concepts, and how interpretations of these may be influenced by readers and viewers.
- They analyse the effects of text structures, and language features including literary devices, intertextual connections, and multimodal features, and their contribution to the aesthetic qualities of texts.
- They create written and multimodal texts for a variety of audiences.

Students who engage successfully in this preparation course will be equipped with the foundation learning to engage in Literature and English as a Senior Subject.

### Learning Experiences:

- Shakespeare
- Poetry
- Classic Literature
- Dramatic Performances

### Assessment:

- Extended Response (Imaginative Spoken): Monologue
- Extended response (Imaginative Written): Short Story
- Extended response (Analytical): Analytical Essay
- Extended response (Exam): Analytical Essay

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway of Literature or English.

## Essential English Preparation Course

The study of Essential English teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Essential English Preparation Course, students interact with others and listen to and create spoken and multimodal texts including literary texts. With a range of purposes and for audiences, they discuss ideas and responses to representations, making connections and providing substantiation. They select and experiment with text structures to organise and develop ideas. They select, vary and experiment with language features including rhetorical and literary devices, and experiment with multimodal features and features of voice. Students explore Shakespeare through structured analysis, Poetry deconstruction, a Film and representations in the Media.

In Essential English, students develop the following skills:

- Critical thinking through evaluation and analysis of texts.
- They read, view and comprehend a range of texts created to inform, influence and engage audiences. They analyse and evaluate representations of people, places, events and concepts, and how interpretations of these may be influenced by readers and viewers.
- They analyse the effects of text structures, and language features including literary devices, intertextual connections, and multimodal features, and their contribution to the aesthetic qualities of texts.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Essential English as a Senior Subject.

### **Learning Experiences:**

- Shakespeare
- Poetry
- Novel Study
- Representations in the Media

### **Assessment:**

- Extended response: Written Monologue
- Short Response Exam
- Spoken Response: Representations in a novel
- Persuasive Multimodal Presentation

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway of Essential English.

## General Mathematics Preparation Course

The study of General Mathematics teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the General Mathematics Preparation Course, students develop the following skills:

- understanding measurement and spatial problems; financial literacy; statistical analysis; mathematical modelling and problem solving.
- Students apply their mathematical understanding efficiently. Teachers help students become self-motivated, confident learners through practice, inquiry, and active participation in relevant experiences.

Students who engage in this preparation course will be equipped with the foundation learning to engage in General Mathematics.

### **Learning Experiences:**

- Measurement
- Trigonometry
- Statistics
- Financial Mathematics
- Algebra

### **Assessment:**

Three Exams and a written assignment

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject General Mathematics.

## General Mathematical Methods/ Specialist Mathematics Preparation Course

The study of Mathematical Methods and Specialist Mathematics teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Mathematical Methods / Specialist Mathematics Preparation Course, students use mathematical modelling to solve problems involving growth and decay in financial and other applied situations, applying linear, quadratic and exponential functions as appropriate. Students make and test conjectures involving functions and relations using digital tools. Students interpret and use logarithmic scales and apply trigonometry to solve problems.

In the Mathematical Methods / Specialist Mathematics Preparation Course, students develop the following skills:

- algebraic manipulation and solving equations; mathematical modelling and problem solving.
- Students apply their mathematical understanding creatively and efficiently. Teachers help students become self-motivated, confident learners through practice, inquiry, and active participation in relevant and challenging experiences.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Mathematical Methods and Specialist Mathematics.

### Learning Experiences:

- Quadratic and Exponential Functions
- Trigonometry
- Logarithms
- Algebra

### Assessment:

Three Exams and a written assignment

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subjects of Mathematical Methods and Specialist Mathematics.

## Essential Mathematics Preparation Course

The study of Essential Mathematics teaches students practical mathematical skills that are useful in preparing them for productive citizenship.

In the General Mathematics / Essential Mathematics Preparation Course, students develop the following skills:

- understanding measurement and spatial problems; financial literacy; statistical analysis; mathematical modelling and problem solving.
- Students apply their mathematical understanding efficiently. Teachers help students become self-motivated, confident learners through practice, inquiry, and active participation in relevant experiences.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Essential Mathematics.

### **Learning Experiences:**

- Measurement
- Trigonometry
- Statistics
- Financial Mathematics

### **Assessment:**

Three Exams and a written assignment

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject Essential Mathematics.

## Numeracy Short Course

Numeracy Short Course (selective offering Semester 2 Year 10).

Numeracy is considered integral to a person's ability to function effectively in society. To be numerate requires more than being able to operate with numbers: it requires mathematical knowledge and understanding, mathematical problem-solving skills, literacy skills and positive beliefs and attitudes. This learning should take place in contexts that are relevant, cooperative, supportive, enjoyable and non-competitive.

This Numeracy Short Course senior syllabus allows teachers to design courses of study that cater for the prior learning and specific numeracy needs of their students. This Short Course in Numeracy is a one-unit course of study, developed to meet a specific curriculum need.

The course focuses on aspects of numeracy and is informed by the Australian Core Skills Framework (ACSF).

In this course of study students will:

- learn a variety of strategies to develop and monitor their own learning
- identify and communicate mathematical information that is embedded in a range of texts and contexts from everyday life and work
- use mathematical processes and strategies to solve problems in a range of situations
- reflect on outcomes and the appropriateness of mathematical processes used.

This subject is suited to students who are interested in pathways beyond school that lead to vocational education and/or work. A course of study in Numeracy may establish a basis for further education and employment in the fields of trade, industry, business and community services.

Results contribute to the award of a QCE and meet the Numeracy requirement for QCE attainment.

A Short Course uses two summative school-developed assessments to determine a student's exit result.

Topic 1: Personal identity and education	Topic 2: The work environment
One assessment consisting of two parts: <ul style="list-style-type: none"><li>• an extended response — oral mathematical presentation (Internal assessment 1A)</li><li>• a student learning journal (Internal assessment 1B).</li></ul>	One assessment consisting of two parts: <ul style="list-style-type: none"><li>• an examination — short response (Internal assessment 2A)</li><li>• a student learning journal (Internal assessment 2B).</li></ul>

## General Biology Preparation Course

The study of Biology teaches students highly transferrable academic and practical skills that are useful in preparing them for future employment and study.

In the Biology Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Biology.

Students will develop the following skills:

- critical thinking and scientific reasoning
- analysis and interpretation of biological data
- practical skills in conducting laboratory techniques and experimental design
- conduct scientific investigations
- scientific information communication (written form).

This course also emphasises the application of biological concepts to real-world situations, fostering a deeper understanding of the living world and its complexities

### **Learning Experiences:**

- Cells and Multicellular organisms
- Disease and homeostasis
- Biodiversity and ecosystems
- Heredity

### **Assessment:**

- Data test
- Student Experiment
- Research Report
- Exam

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject of Biology.

## General Chemistry Preparation Course

The study of Chemistry teaches students highly transferrable academic and practical skills that are useful in preparing them for future employment and study.

In the Chemistry Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Chemistry.

Students will develop the following skills:

- critical thinking and scientific reasoning
- analysis and interpretation of chemical data
- practical skills in laboratory techniques and experimental design
- conduct scientific investigations
- scientific information communication (written form).

This course also emphasises the application of chemical concepts to real-world situations.

### Learning Experiences:

- Chemical fundamentals, atomic structure and the Periodic Table
- Rates of reaction – Collision Theory
- Concentration, Yield and Solubility
- Types of reaction, simple hydrocarbons and pH

### Assessment:

- Data test
- Student Experiment
- Research Report
- Exam

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject of Chemistry.

## General Physics Preparation Course

The study of Physics teaches students highly transferrable academic and practical skills that are useful in preparing them for future employment and study.

In the Physics Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Physics.

Students will develop the following skills:

- critical thinking and scientific reasoning
- analysis and interpretation of physical data
- practical skills in laboratory techniques and experimental design
- conducting scientific investigations
- scientific information communication (written form).

This course also emphasises the application of physical concepts to real-world situations, fostering a deeper understanding of the living world and its complexities.

### **Learning Experiences:**

- Energy and Motion
- Energy and Temperature
- Energy and Waves
- Energy and Electricity

### **Assessment:**

- Data test
- Student Experiment
- Research Report
- Exam

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject of Physics.

## General Psychology Preparation Course

The study of Psychology teaches students highly transferrable academic and practical skills that are useful in preparing them for future employment and study.

In the Psychology Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Psychology.

Students will develop the following skills:

- critical thinking and scientific reasoning
- analysis and interpretation of biological data
- practical skills in laboratory techniques and experimental design
- conducting scientific investigations
- scientific information communication (written form).

This course also emphasises the application of biological concepts to real-world situations, fostering a deeper understanding of the living world and its complexities

### **Learning Experiences:**

- Neuroscience and Data in Psychology
- Memory
- Forensic Psychology
- Perception and emotion

### **Assessment:**

- Data test
- Student Experiment
- Research Report
- Exam

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject of Psychology.

## Science In Practice Preparation Course

The study of Applied Science teaches students highly transferrable academic and practical skills that are useful in preparing them for future employment and study.

In the Applied Science Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Science in Practice. In our Applied Science Preparation Course, students will develop practical and analytical skills essential for the Senior Science syllabus.

Students will develop the following skills:

- apply scientific principles to everyday contexts, enhancing problem-solving abilities and critical thinking
- engage in experiments and projects illustrating the real-world application of science
- develop skills in data collection, analysis, and presentation
- work collaboratively on scientific investigations.

This course prepares students for success in applied science studies and fosters an appreciation for the practical relevance of scientific knowledge.

### **Learning Experiences:**

- Cosmetics (Chemistry)
- Road Safety (Physics)
- Beyond the stars (Earth Science)
- Genetics (Biology)

### **Assessment:**

- Project
- Exam (with stimulus)
- Collection of work
- Investigation

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject of Science in Practice.

## General History Preparation Course

The study of Year 10 General History teaches students foundational knowledge and skills for Years 11 and 12 General Ancient and Modern History.

During this course, students will study the role of religion in ancient civilisations (Egypt, Greece and Rome). They will also learn about the customs and importance of the Minoan and Mycenaean civilisations of Crete and mainland Greece. Students will also study the Second World War and the rise of rights and freedoms in Australia and internationally.

In General History, students will develop highly transferable academic skills including:

- application of knowledge, analysis and evaluation of primary and secondary sources
- investigation of artefacts
- essay writing
- research skills
- using online databases
- referencing
- exam skills.

Students who engage in this course will be equipped with the foundational knowledge and skills to engage in both Year 11 and 12 General Ancient and Modern History courses.

### **Learning Experiences:**

- Comparative study of Ancient Religions (Egypt, Greece and Rome)
- The societies of the Minoans and the Mycenaean with particular reference to societal structure, buildings, trade and warfare;
- The Second World War
- Rights and freedoms in a globalised world.

### **Assessment:**

Students will complete four assessment items drawn from the following instrument types:

- Exam – short response to historical sources
- Exam – essay response to historical sources
- Investigation - historical research essay
- Investigation - an independent source investigation

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the General Ancient History and/ or Modern History.

A course of study in History can establish a basis for further education and employment in the fields of history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health, writing, academia and research.

## General Legal Studies Preparation Course

The study of Year 10 General Legal Studies teaches students foundational knowledge and skills for Years 11 and 12 General Legal Studies.

During this course, students will study the origins and structure of Australia's system of government, criminal and civil law, and Australia's global roles and responsibilities under international and human rights law.

Students will develop highly transferable academic skills including:

- application of knowledge
- analysis and evaluation of information
- use of academic and legal sources
- essay and report writing
- research skills and using online databases
- referencing
- exam skills.

Students who engage in this course will be equipped with the foundational knowledge and skills to engage in both Year 11 and 12 General Legal Studies.

### Learning Experiences:

- Australia's democracy and system of government – Where do our laws come from? Why do we have laws? What does parliament and the government do? What do other countries do?
- Criminal law - from crime to courts.
- Civil law – consumer rights.
- Human rights and international law - Australia's global roles and responsibilities.

### Assessment:

Students will complete four assessment items drawn from the following instrument types:

- Exam – combination response exam (short response and extended response to stimulus)
- Investigation – independent research and inquiry report
- Investigation – independent research and analytical essay

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in General Legal Studies.

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways.

## General Geography/ Tourism Preparation Course

The study of Year 10 General Geography/ Tourism course teaches students foundational knowledge and skills for either Year 11 and 12 General Geography and/ or Year 11 and 12 Certificate III in Tourism.

During this course, students will study two strands:

- Tourism Preparation: the geography of tourism and tourism marketing;
- General Geography Preparation: environmental change and management and geographies of wellbeing.

In General Geography/ Tourism, students will develop highly transferable academic skills including:

- report writing
- data collection
- data analysis
- referencing
- research
- source evaluation
- exam preparation.

Students who engage in this course will be equipped with the foundational knowledge and skills to engage in Year 11 and 12 General Geography and/ or Year 11 and 12 Certificate III in Tourism.

### Learning Experiences:

- Geography of tourism – examining the impacts of tourism and the push and pull factors influencing peoples' choices of destinations.
- Tourism marketing – the principles, concepts and practices used by those in the tourism industry.
- Geographies of Human Wellbeing – examining the differences in human wellbeing between places.
- Environmental Change and management – students will carry out a geographical inquiry to propose action in response to a geographical challenge.

### Assessment:

Students will complete four assessment items drawn from the following instrument types:

- Investigation – research and reports/ presentations.
- Projects – develop a presentation/ package for a tourism topic.
- Investigation – A geographical inquiry report.
- Exam – data response exam.

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in Year 11 and 12 General Geography. Students are also encouraged to complete this course if they intend to choose the Certificate III Tourism course in Year 11.

A course of study in Geography can establish a basis for further education and employment in the fields of urban and environmental design, planning and management, biological and environmental science, conservation and land management, emergency response and hazard management, oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology and science.

Completion of the Certificate III in Tourism has the potential to develop skills of individuals of a social, technical and personal nature. Many opportunities will be provided for the investigation of the numerous aspects of the industry as well as the development of skills in communication, presentation and the decision-making processes.

## Humanities/ Tourism Preparation Course

The study of Year 10 Applied Humanities/ Tourism course teaches students foundational knowledge and skills for either Year 11 and 12 Applied Social and Community Studies and/ or Year 11 and 12 Certificate III in Tourism.

During this course, students will study social cohesion in Australia, geography of tourism, the globalising world and tourism marketing.

In Applied Humanities / Tourism, students will develop highly transferable skills that will set them up for Year 11 and 12 Applied Social & Community Studies and/ or the Certificate III in Tourism.

These include:

- report writing and project management
- information collection
- referencing and research.

Students who engage in this course will be equipped with the foundational knowledge and skills to engage in Year 11 and 12 Applied Social & Community Studies and/ or Year 11 and 12 Certificate III in Tourism.

### **Learning Experiences:**

- Geography of tourism – examining the impacts of tourism and the push and pull factors influencing peoples' choices of destinations.
- Tourism marketing – the principles, concepts and practices used by those in the tourism industry.
- Social cohesion in Australia – rights and responsibilities.
- The globalising world – global influences on Australia since the Second World War.

### **Assessment:**

Students will complete four assessment items drawn from the following instrument types:

- Investigation – research and reports/ presentations.
- Projects – develop a presentation/ package for a tourism topic.

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in Year 11 and 12 Applied Social & Community Studies. Students who complete this subject can also choose to study a Certificate III Tourism course in Years 11 and 12.

Completion of the Certificate III in Tourism has the potential to develop skills of individuals of a social, technical and personal nature. Many opportunities will be provided for the investigation of the numerous aspects of the industry as well as the development of skills in communication, presentation and the decision-making processes.

## General Health And Physical Education Preparation Course

The study of Health and Physical Education teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Health and Physical Education Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Physical Education and Health. Students will be provided with the foundations for learning and alignment to the Physical Education and Health senior syllabuses to build increasingly complex and developmental courses of study in the senior years.

In Health and Physical Education preparations, students develop the following skills:

- access, evaluate and synthesise information to take positive action to protect, enhance and advocate for their own and others' health, wellbeing, safety and physical activity participation across their lifespan
- develop and use personal, behavioural, social and cognitive skills and strategies to promote a sense of personal identity and wellbeing and to build and manage respectful relationships
- acquire, apply and evaluate movement skills, concepts and strategies to respond confidently, competently and creatively in a variety of physical activity contexts and settings
- engage in and enjoy regular movement-based learning experiences and understand and appreciate their significance to personal, social, cultural, environmental and health practices and outcomes
- analyse how varied and changing personal and contextual factors shape understanding of, and opportunities for, health and physical activity locally, regionally and globally.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Year 11 and 12 Physical Education, Health and Certificate II/III Health Support Services.

### Learning Experiences:

- Practical Activities:
  - Touch Football, AFL, Basketball, Netball, Volleyball, Athletics, Softball, Cricket and Football
- Theoretical Activities:
  - Safety
  - Biomechanics
  - Community Health
  - Sport Psychology/ Equity

### Assessment:

- Performance (Written evaluation of their own and others' performances)
- Written (Examinations, Folios, Reports)
- Oral Presentations

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathways subjects Physical Education and Health.

The study of Health and Physical Education Preparation can lead to employment in the following industries:

- Exercise science
- Biomechanics
- Allied health professions
- Psychology
- Teaching
- Sport journalism
- Sport marketing and management
- Sport promotion
- Sport development
- Coaching
- Health science
- Public health
- Health education
- Nursing
- Medical professions

## Sport And Recreation Preparation Course

The study of Sport and Recreation teaches students highly transferrable academic and practical skills that are useful in preparing them for future employment and study.

In the Sport and Recreation Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Sport and Recreation or Cert III Fitness. Students will be provided with opportunities to learn in, through and about sport and active recreation activities, examining their role in the lives of individuals and communities.

In Sport and Recreation Preparation, students develop the following skills:

- access, evaluate and synthesise information to take positive action to protect, enhance and advocate for their own and others' health, wellbeing, safety and physical activity participation across their lifespan
- develop and use personal, behavioural, social and cognitive skills and strategies to promote a sense of personal identity and wellbeing and to build and manage respectful relationships
- acquire, apply and evaluate movement skills, concepts and strategies to respond confidently, competently and creatively in a variety of physical activity contexts and settings
- engage in and enjoy regular movement-based learning experiences and understand and appreciate their significance to personal, social, cultural, environmental and health practices and outcomes
- analyse how varied and changing personal and contextual factors shape understanding of, and opportunities for, health and physical activity locally, regionally and globally.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Year 11 and 12 Sport and Recreation or Certificate III Fitness.

### Learning Experiences

- Practical Activities:
  - Touch Football, AFL, Basketball, Netball, Volleyball, Athletics, Softball, Cricket and Football
- Theoretical Activities:
  - Effective Coaching (coaching peers and junior students)
  - Community recreation
  - Physical activity and fitness
  - Safety and managing risks

### Assessment

- Performance assessment (evaluate own and others' performances)
- Written (Project Folio, Examination)
- Oral presentations

**Future pathways** Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subjects Sport and Recreation and Certificate III in Fitness.

The study of Sport and Recreation Preparation can lead to employment in the following industries:

- Fitness
- Education
- Community health
- Sport performance
- Outdoor recreation
- Sports administration
- Recreations

## General Japanese Preparation Course

The study of Japanese teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Japanese Preparation Course, students will be provided with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students explore the following units: My Neighbourhood; Milestones; Family, Friends and Work; Travel and Weather in Japan.

In Japanese, students develop the following skills: applying their mastery of hiragana and building their mastery in katakana. They use a greater number of kanji and increasingly apply their understanding of known kanji to predict the meaning of unfamiliar words. Students will become more fluent and accurate in both spoken and written language production. They will gain more control of grammatical and textual elements.

Students who engage in this preparation course will be equipped with the foundation learning to engage in General Japanese.

### **Learning Experiences:**

My Neighbourhood; Milestones; Family, Friends and Work; Travel and Weather in Japan.

### **Assessment:**

Students undertake a balance of composing (writing and speaking) and comprehending (listening and reading) summative tasks across the year. All summative assessment is done under exam conditions.

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the General Senior pathway subject Japanese.

## General Accounting and Business Preparation Course

The study of accounting and business teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Accounting and Business Preparation Course, students will be given the opportunity to experience and prepare for Year 11 and 12 Accounting and Business. This integrated course allows students to learn key business and accounting knowledge and skills.

In accounting and business students develop the following skills:

- Describe, explain and apply accounting and business concepts, processes and principles
- Analyse and interpret financial data
- Evaluate business and accounting practices to make decisions and propose recommendations
- Comprehend business and accounting concepts and principles
- Use sources to select data

Students who engage in this preparation course will be equipped with the foundation learning to engage in Year 11 and 12 Accounting and/or Business.

### Learning Experiences:

- Unit 1: Innovation
- Unit 2: The Accounting Process
- Unit 3: International Trade
- Unit 4: Personal Finance

### Assessment:

- Multimodal response – Innovation
- Combination response exam – The Accounting Process
- Extended response – International Trade
- Multimodal response – Financial Performance

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subjects of Accounting and Business.

The study of accounting can lead to employment in the following industries:

- |                        |                        |                           |
|------------------------|------------------------|---------------------------|
| • Accounting           | • Finance              | • Business and Government |
| - Forensic accountant  | - Financial advisor    | - Business owner/manager  |
| - Financial accountant | - Budget analyst       | - Business analyst        |
| - Bookkeeper           | - Credit analyst       | - Insurance analyst       |
| - Tax accountant       | - Financial management | - Credit analyst          |
|                        |                        | - Office manager          |
|                        |                        | - Business reporter       |
|                        |                        | - Economic researcher     |

## Business Studies Preparation Course

Business Studies provides opportunities for students to develop practical business knowledge and skills for use, participation and work in a range of business contexts. These skills will provide students with exciting and challenging career opportunities which exist in a range of business contexts.

In the Business Studies course, students will be given the opportunity to experience and prepare for Year 11 and 12 Certificate III in Business and the Diploma of Business.

Students will develop their business knowledge and understanding through applying common business practices in business contexts, such as retail, entertainment, tourism and travel. Students will be provided with opportunities to develop skills which are important in the workplace to successfully participate in future employment.

Students develop effective decision-making skills and learn how to plan, implement and evaluate business practices, solutions and outcomes, resulting in improved literacy, numeracy and 21st century skills.

### **Learning Experiences:**

- Working in Events
- International Business
- Entrepreneurship
- Business Administration

### **Assessment:**

- Assessment will be project based

### **Future pathways:**

Successful completion of this course can lead to a diverse range of pathways including studying the Certificate III in Business, the Diploma or Business in Years 11 and 12 and employment in office administration, data entry, retail, sales, reception, small business, finance administration, public relations, property management, events administration and marketing.

## General Digital Solutions Preparation Course

The study of Digital Solutions teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Digital Solutions Preparation Course, students will learn about algorithms, code and user interfaces by generating digital solutions to problems. This course allows students to learn key digital solutions knowledge and skills.

In digital solutions students develop the following skills:

- Describing and explaining data and interactions between users
- Synthesising information and ideas to generate components of digital solutions
- Questioning and problem solving to analyse simple and complex digital data problems

Students who engage in this preparation course will be equipped with the foundation learning to engage in Year 11 and 12 Digital Solutions.

### Learning Experiences:

- Databases
- User stories & User Interface Design
- Object oriented languages
- Security

### Assessment:

- Written and Practical Project – Database
- Written and Practical Project – Web Design
- Written and Practical Project – Coding Project
- Combination Response Exam – Security

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject Digital Solutions.

The study of Digital Solutions can lead to employment in the following industries:

- Cyber security analyst
- Information security auditor
- Software engineer
- Web developer
- Game developer
- Information systems and business analyst
- Network technician
- Development operations engineer

## Information And Communication Technology Preparation Course

Technologies are an integral part of society as humans seek to create solutions to improve their own and others' quality of life. In an increasingly technological and complex world, it is important to develop the knowledge, understanding and skills associated with information technology to support a growing need for digital literacy and specialist information and communication technology skills in the workforce.

In the Information Technology course, students will be given the opportunity to experience and prepare for Year 11 and 12 Certificate III in Information Technology.

Students will develop knowledge, understanding and skills across multiple platforms and operating systems, and will be ethical and responsible users and advocates of IT, aware of the social, environmental and legal impacts of their actions. Students will be provided with opportunities to develop skills important in the workplace to successfully participate in future employment.

Students who study Information Technology will develop skills in applying knowledge of IT to produce solutions to simulated problems referenced to business, industry, government, education and leisure contexts. They will gain knowledge, understanding and skills relating to hardware, software and IT in society.

### **Learning Experiences:**

- Website Production
- Game Development
- Digital Imaging and Modelling
- Python coding

### **Assessment:**

- Assessment will be project based

### **Future pathways:**

Successful completion of this course can lead to a diverse range of pathways including studying the Certificate III in Information Technology in Years 11 and 12 and employment in many fields, especially the fields of ICT operations, help desk, sales support, digital media support, office administration, records and data management, and call centers.

## General Food And Nutrition Preparation Course

The study of Food and Nutrition teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Food and Nutrition Preparation Course, students study:

- food science, nutrition and food technologies.
- chemical and functional properties of nutrients to create food solutions that maintain the beneficial nutritive values.
- development of a safe and sustainable food system that can produce high quality, nutritious solutions with an extended shelf life.
- problems solving processes to create food solutions that contribute positively to preferred personal, social, ethical, economic, environmental, legal, sustainable and technological futures.

In Food and Nutrition students develop the following skills:

- understanding of the chemical and functional properties of vitamins, minerals and protein-based food,
- sensory profiling,
- food safety, spoilage and preservation skills
- construct consumer food drivers, sensory profiling, labelling and food safety, in the development of food formulations.
- knowledge about the chemical, functional and sensory properties of carbohydrate- and fat-based food, and food safety, food preservation techniques and spoilage.
- investigation of problems for nutrition consumer markets and developing solutions for these while improving safety, nutrition, transparency and accessibility, as well as considering the wider impacts and implications of solutions.

Students who engage in this preparation course will be equipped with the foundation learning to engage in General Food and Nutrition, Applied Hospitality Practices or Certificate II Hospitality.

### Learning Experiences:

- Food Drivers and Emerging Trends
- KLAB (Kitchen Labs) Food Science and Technologies

Students learn to apply their food science, nutrition and technologies knowledge to solve real-world food and nutrition problems. They recognise and describe problems, determine solution success criteria, develop and communicate ideas and generate, evaluate and refine real-world-related solutions. Students justify their decision-making and acknowledge the societal, economic and environmental sustainability of their food and nutrition solutions. The problem-based learning framework in Food and Nutrition encourages students to become self-directed learners and develop beneficial collaboration and management skills. These skills enable students to innovate and collaborate with people in the fields of science, technology, engineering and health to create solutions to contemporary problems in food and nutrition.

### Assessment:

- Written Exams
- Multimedia Folios

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject Food and Nutrition.

## Hospitality Practices Preparation Course

The study of Hospitality teaches students highly transferrable academic skills that are useful in preparing them for tertiary study or employment in the Hospitality Industry

In the Hospitality Preparation Course, students:

- examine the food and beverage sector, which includes food and beverage production and service.
- study of industry practices and production processes through real-world related application in the hospitality industry context.

Students explore:

- the production skills and procedures required to implement hospitality events. Through both individual and collaborative learning experiences, students learn to perform production and service skills, and meet customer expectations.

In Hospitality Practices students develop the following skills:

- literacy and numeracy skills relevant to the hospitality industry and future employment opportunities.
- recognise and apply industry practices;
- interpret briefs and specifications;
- demonstrate and apply safe practical production processes;
- communicate using oral, written and spoken modes;
- personal attributes that contribute to employability;
- organise, plan, evaluate competent,
- self-motivation and safe individuals who can work with colleagues to solve problems and complete practical work.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Applied Hospitality Practices or Certificate II Hospitality.

### **Learning Experiences:**

- Food and Beverage Hygiene and Safety,
- Signature Dishes for Events,
- Food Businesses/Events – Food Trucks and Café/Restaurants
- Barista Basics

### **Assessment:**

- Short Response Exams
- Folios

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subjects of Applied Hospitality Practices and the Certificate II in Hospitality.

## Fashion Preparation Course

Students who join this course will work in a setting that fosters innovation and creativity. In the fashion classroom, students will be encouraged to experiment with new ideas, techniques, flavours while learning from their failures and successes. Students will be provided with the resources, tools and time they need to explore their fashion and textiles potential.

Throughout this course, students will investigate the latest trends and developments in the fashion industry through industry and community partnerships. As a fashion student, they will be challenged and encouraged to push the boundaries of fashion artistry, create textile articles that exceed their expectations and showcase their success.

### Aims

- celebrate and share a love of learning about fashion
- to promote collaboration and communication among fashion students
- create a positive and supportive classroom environment where students can share their opinions, feedback and suggestions, and where they can learn from each other
- encourage students to work together as a cohesive unit, and to help each other design and achieve goals.
- celebrate students' achievements and successes through events and showcases.

### Participation requirements

Students are to participate in all practical lessons when at school. All workplace health and safety rules and expectations are to be adhered in each lesson to maintain participation in this course.

Students will continue to develop the intermediate fashion design and sewing skills along with pattern making skills. They will design textile items to showcase at an event.

Students use their imagination to create, innovate and express themselves and their ideas. They design and produce fashion products in response to briefs in a range of fashion contexts. Students learn about practices and production processes in fashion industry contexts. Practices are used by fashion businesses to manage the production of products. Production processes combine the production skills and procedures required to produce products. Students engage in applied learning to recognise, apply and demonstrate knowledge and skills in units that meet local needs, available resources and teacher expertise. Through both individual and, where possible, collaborative learning experiences, students learn to meet client expectations of quality and cost.

### Future Pathways:

Students who engage in the Fashion Course in their junior years will be able to gain entry into Senior Applied Fashion subject.

## General Design Preparation Course

The study of Design teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Design Preparation Course, students explore and explain how people consider factors that impact on design decisions and the technologies used to design and produce products, services and environments for sustainable living. They explain the contribution of innovation, enterprise skills and emerging technologies to global preferred futures.

In Design students develop skills in the following two areas:

Knowledge and understanding of Technologies contexts

Processes and production skills including the following applications –

- Investigating and defining
- Generating and designing
- Producing and implementing
- Evaluating
- Collaborating and managing

Everything we use in society to eat, sleep, live, rest and play is the result of an extensive iterative process from a humble idea through to production and use in the world. A knowledge of the iterative process and the ability to work through this process and apply to everyday lives, will prove invaluable for all students.

Students who engage in this preparation course will be equipped with the foundation learning to engage and be successful in Design for senior.

### Learning Experiences:

- Students explain the features of technologies and their appropriateness for purpose, and create designed solutions based on an analysis of needs or opportunities.
- Students create, adapt and refine design ideas, processes and solutions and justify their decisions against developed design criteria that include sustainability.
- They communicate design ideas, processes and solutions to a range of audiences, including using digital tools.
- Students independently and collaboratively develop and apply production and project management plans, adjusting processes when necessary.
- They select and use technologies skilfully and safely to produce designed solutions.

### Assessment:

Assessment techniques will include written Design Challenge/s (exam/s) and some extended response folio work as they work through the design process to solve a design problem.

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subject Design.

This course will provide students with a strong foundation should they choose to undertake a course in any of the Design disciplines, including (but not limited to):

- architecture
- digital media design
- fashion design
- graphic design
- industrial design
- interior design
- landscape architecture

## General Engineering Preparation Course

The study of General Engineering teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the General Engineering Preparation Course, students explain how people working in design and technologies occupations consider factors that impact on design decisions and the technologies used to produce products, services and environments. They identify the changes necessary to designed solutions to realise preferred futures they have described.

The Engineering problem-solving process involves the practical application of Science, Technology, Engineering and Mathematics (STEM) knowledge to develop sustainable products, processes and services. Engineering includes the study of mechanics, materials science and control technologies through real-world engineering contexts where students engage in problem-based learning.

Students explore and explain how people consider factors that impact on design decisions and the technologies used to design and produce products, services and environments for sustainable living. They explain the contribution of innovation, enterprise skills and emerging technologies to global preferred futures.

### Learning Experiences:

- Students learn to explore complex, open-ended problems and develop engineered solutions.
- Students will learn to recognise and describe engineering problems, determine solution success criteria, develop and communicate ideas and predict, generate and evaluate prototype-solutions.
- Students justify their decision-making and acknowledge the societal, economic and environmental sustainability of their engineered solutions.
- Students use the Engineering problem-based learning framework to encourage them to become self-directed learners and develop beneficial collaboration, management and information and communication technology skills.

### Assessment:

Assessment techniques will include written Examination and some extended response folio work (multimodal).

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the General Senior pathway subject Engineering.

This course will provide students with a strong foundation should they choose to undertake a course in any of the Engineering disciplines, including (but not limited to):

- Civil Engineering
- Mechanical Engineering
- Structural Engineering
- Electrical Engineering

## Materials and Technologies Specialisation Course

The study of Materials and Technologies Specialisations (TMT) focuses on creating solutions. Students develop projects and manage these projects by applying project management plans and using appropriate technologies skilfully and safely to produce high-quality solutions suitable for the client. Students manage projects taking into consideration time, cost, risk and production processes and investigate and make judgements on how the characteristics and properties of materials impact on the end result.

### Learning Experiences:

- Students explain the features of technologies and their appropriateness for purpose, and create designed solutions based on an analysis of needs or opportunities.
- Students create, adapt and refine design ideas, processes and solutions and justify their decisions against developed design criteria that include sustainability.
- They communicate design ideas, processes and solutions to a range of audiences, including using digital tools.
- Students independently and collaboratively develop and apply production and project management plans, adjusting processes when necessary.
- They select and use technologies skilfully and safely to produce designed solutions.

### Assessment:

Assessment techniques will include written a combination of multimodal Assessment, practical work, theory exams and some extended response folio work across a variety of projects.

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the senior pathway subjects of Furnishing Skills, Industrial Graphics Skills or Certificate II in Construction Pathways or Certificate II in Engineering Pathways in Year 11 and 12.

This course will provide students with a strong foundation should they choose to undertake a course in any of the following vocations including (but not limited to):

- |                      |                  |                          |                             |
|----------------------|------------------|--------------------------|-----------------------------|
| • Furniture maker    | • Builder        | • Architectural drafter  | • Sheet metal worker        |
| • Wood machinist     | • Carpenter      | • Estimator              | • Metal fabricator          |
| • Cabinet-maker      | • Plumber        | • Mechanical drafter     | • Welder                    |
| • Polisher           | • Concreter      | • Electrical drafter     | • Maintenance fitter        |
| • Shopfitter         | • Tiler          | • Structural drafter     | • Metal machinist           |
| • Upholsterer        | • Painter        | • Civil drafter          | • Locksmith                 |
| • Furniture restorer | • Glazier        | • Survey drafter         | • Air-conditioning mechanic |
| • Picture framer     | • Floor finisher | • Refrigeration mechanic | • Automotive mechanic       |
| • Landscaper         |                  |                          |                             |

## General Dance Preparation Course

The study of Dance teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Dance Preparation Course, students experience rich and innovative challenges through written and practical assessments as well as numerous performance opportunities. The dance units provide opportunities for both individual and group assessment and learning experiences across the learning area: Performance, Choreography and Responding to Dance works. Students explore a range of movement styles including contemporary, lyrical, musical theatre and jazz.

In Dance students develop the following skills: Contemporary dance technique, artistry, performance qualities, use of Dance terminology and a kinaesthetic awareness and understanding of movement.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Senior General Dance and Certificate III/IV in Elite Dance Performance.

### Learning Experiences:

#### Semester One

##### Contemporary Dance Journey

- Performance: An introduction to Contemporary Dance
- Choreography: Creating movement from stimulus and reflecting on choreographic intent
- Responding: Written response to professional works

#### Semester Two

##### Dance and Technology

- Performance: Professional repertoire
- Choreography: Response to professional stimulus including technology and choreographic intent
- Responding: Written response to professional works and peer/self-reflection

### Assessment:

All units contain practical and theoretical components. Students are required to participate in all class activities, working individually, in pairs or groups. Students are assessed on their ability to choreograph, perform and respond to Dance. Assessment items include projects that incorporate:

#### Performance

- Perform developmentally appropriate movement sequences to develop technical and expressive skills.
- Perform extended sequences of both teacher and professional devised repertoire.

#### Choreography

- Responding to stimulus through creatively crafted movement sequences.
- Using dance knowledge to create symbolic representations of concepts and construct a written choreographic intent.

#### Responding

- Deciphering professional works in order to write a written analysis and evaluation of live and recorded performances.

All students must wear appropriate dance clothing for all dance classes.

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the General senior pathway subject Dance.

## General Drama Preparation Course

The study of Drama teaches students highly transferrable academic skills that are useful in preparing them for tertiary study.

In the Drama Preparation Course, students discover and explore the elements of drama, applying principles while making and responding to drama in various forms. Students develop a sense of inquiry and empathy through exploring the diversity of Drama in the contemporary world and in other times, traditions, place and cultures. In Drama students develop the following skills: to learn to think, move, speak and act with confidence and how to be focused, innovative and resourceful, and collaborative.

Students who engage in this preparation course will be equipped with the foundation learning to engage in the General course in Drama.

### **Learning Experiences:**

Learning in Drama involves students making, performing, analysing and responding to drama, drawing on human experience as a source for ideas. Students engage with the knowledge of drama, develop skills, techniques and processes, and use materials as they explore a range of forms, styles and contexts. Through Drama, students learn to reflect critically on their own experiences and responses and further their own aesthetic knowledge and preferences. Drama involves both making and responding to develop a practical and critical understanding of how the elements of drama can be used to shape and structure drama, engaging audiences and communicating meaning.

### **Assessment:**

- Exploring and Responding
- Performing and Presenting
- Creating and Marking
- Community Performance opportunities:
  - AVEO
  - Industry Professional
  - Collaborative projects with local schools
  - Showcase – sharing evenings

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the General senior pathway subject General Drama.

## General Film, Television & New Media Preparation Course

Media Arts is a creative and practical subject for students who enjoy film, photography, editing, storytelling and digital media. It allows students to explore the media-rich world around them and create original texts that connect with audiences.

Throughout Year 10, students analyse how artists use media conventions to shape meaning and influence audiences. They then apply these skills in their own productions.

Students develop skills in a range of pre-production and post-production processes. These may include storyboarding, filming, script writing, editing and post-production. collaboration and communication and problem-solving and organisation

Media Arts encourages students to think critically and creatively, experiment with ideas and produce purposeful, engaging media texts.

This subject is ideal for students who enjoy hands-on learning, want to strengthen their creative and communication skills, and are interested in future pathways in film, television, journalism, marketing, photography, design, advertising, content creation and digital media.

### Learning Experiences:

#### Unit 1: Signature Style and the Moving Image

Directors manipulate media conventions to develop a unique signature style and create media texts that are instantly recognisable. In this unit, students explore how artists manipulate media conventions to develop their own style across film and moving image texts. Throughout the unit, students analyse how stylistic choices shape meaning and influence audiences. Students then use production processes to develop and share concepts and a short moving-image media text inspired by influential directors.

#### Assessment:

Investigation: 400–600 words

Project: pre-production folio and production up to 3 minutes

#### Unit 2: Australian Stories

Australian identity is shaped by people, cultures, communities and a shared sense of place. In this unit, students explore how media artists represent Australian perspectives through a range of media texts. Throughout the unit, students analyse how media conventions shape representations of people, places, ideas and emotions, and how media can celebrate or challenge perspectives of identity. Students then use production processes to create and share a short film exploring an aspect of Australian identity.

#### Assessment:

Exam: 400–600 words

Project: pre-production storyboard and production up to 3 minutes

#### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the General senior pathway subjects Film, Television and New Media and Media Arts in Practice.

## General Music Preparation Course

The study of Music teaches students highly transferrable academic skills that are useful in preparing them for tertiary study. In Music students experience and develop their ability to read, write, listen to and perform a broad range of music. The course covers a variety of genres ranging from world music perspectives, to classical and contemporary popular music.

In the Music Preparation Course, students develop the following skills: Listening, Practical, Compositional and Theoretical activities. Students will have the opportunity to have 'hands on' experience with musical instruments such as keyboard and guitar as well as instruments that students currently play in the Instrumental Music Program and in private lessons outside of schools.

Students who choose to study Year 10 Music would have a distinct advantage if they were to complement the course by the study of an instrument or voice through the school Instrumental Music Program or by having private tuition.

Students who engage in and achieve a solid pass in this preparation course will be equipped with the foundation learning to engage in Senior General Music and Music Extension (Performance or Composition). The offer to study Music Extension in Year 12 will be based upon review of students' academic portfolios from Year 11 Music.

### **Learning Experiences:**

Through music making and associated ensemble and solo performances, students develop social and co-ordination skills as well as artistic appreciation and self-discipline. It also helps to foster sound study skills, higher order thinking and reasoning skills. Students are expected to practice in their own time, as well as allocated time in class.

### **Assessment:**

Students are assessed using a project that takes the form of written, listening, compositional and practical activities.

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the General senior pathway subject Music.

## General Visual Art Preparation Course

The study of Visual Art teaches students highly transferrable academic skills that are useful in preparing them for tertiary study. Visual Art focuses on students making and responding to images and objects.

In the Visual Art Preparation Course, students develop a perceptual and conceptual understanding of visual language, enabling them to be visually literate in the symbol systems and visual communication of cultures and societies, past and present. Students explore a range of two-dimensional and three-dimensional forms such as Drawing, Painting, Printmaking, Ceramics, Sculpture, Design, Installation and Electronic Imaging. In Year 10 students will be encouraged to develop and expand their creative potential and to experiment with a range of materials and develop technical expertise in making processes.

This subject is practically oriented and integrates theoretical components that are relevant to what students are making in Visual Art. Skills also include technical competence with materials, problem solving and analysis of Art.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Senior General Visual Art and Visual Arts in Practice.

### Learning Experiences:

In Visual Art students are encouraged to develop individual viewpoints, problem-solving skills and acquire a knowledge of materials and an understanding of cultures, both past and present.

#### Semester One

- Looking In/Out – Self Portraits with Drawing, Painting, Mixed Media
- Fears and Phobias – Drawing and Printmaking Folio

#### Semester Two

- Go Figure – Figure Drawing, Sculpture and Mixed Media
- Object of my Obsession

### Assessment:

All units contain a project with practical and theoretical components. Students are required to participate in all class activities, working individually, in pairs or groups. Students are assessed on their ability to make and respond to artwork.

### Future pathways:

Successful completion of this preparation course is the pre-requisite for future studies in the General senior pathway subject Visual Art.

## The Arts – Production and Performance Preparation Course

The study of this multi-disciplinary arts subject teaches students highly transferrable skills that are useful to explore their creative potential to develop themselves as highly employable artists with skills to work across a range of fields.

In Production and Performance, students take on the role of performer and artist through studies in Visual and Media Arts, Dance and Drama. In this subject students' prior skills are acknowledged and used as an entry point to expand and explore their potential across The Arts.

Students explore concept-based learning in response to a range of stimulus and community arts events and practices. In Production and Performance, students develop the following skills: performing, creating, constructing, expressive communication skills to generate and apply new and creative solutions when problem solving in a range of contexts. All of which are valuable skills to prepare students for participation in the 21<sup>st</sup> century by fostering students to think in divergent ways and complement their schooling experience.

Students who engage in this preparation course will be equipped with the foundation learning to engage in Visual Arts in Practice, Media Arts in Practice and a range of Certificate courses.

### **Learning Experiences:**

Making and Responding through a practical approach to learning in The Arts.

### **Assessment:**

Arts Projects (integrating performance and products)

### **Future pathways:**

Successful completion of this preparation course is the pre-requisite for future studies in the Applied senior pathways subjects Visual Arts in Practice, Media Arts in Practice or Certificate courses.

## Costs in addition to the Student Resource Scheme

### 2027 – Year 10 Additional Costs & Subject Levies

Some subjects incur additional costs. These may include subject levies, incursion/excursion costs, course costs or competition entry fees. Please see information provided below to indicate costs associated with subject selection that is not included in the Student Resource Scheme. Only subjects with additional costs for 2027 have been listed. All costs are true and correct at the time of production but may be subject to change.

GENERAL SUBJECTS	
Senior Subject	Additional Costs and Subject Levies
General Food & Nutrition	Students will be required to bring ingredients from home up to 8 times per term for skill development and assessment purposes. The subject area levy will cover staple pantry and some specialty ingredients and disposables. <b>Subject Levy: \$40.00</b>
Hospitality Preparation	Students will be required to bring ingredients from home up to 8 times per term for skill development and assessment purposes. The subject area levy will cover staple pantry and some specialty ingredients and disposables. <b>Subject Levy: \$40.00</b>
Fashion Preparation	<b>Subject Levy: \$20.00</b>
General Digital Solutions Preparation	<b>Subject Levy: \$10.00</b>
General Accounting and Business Preparation	Excursion cost \$80.00
Information Technology Preparation	Adobe Suite Site License for home \$10.00
General Design Preparation	<b>Subject Levy: \$20.00</b>
Business Studies Preparation	Excursion cost \$80.00
General Engineering Technology Preparation	<b>Subject Levy: \$40.00</b>
English	Brisbane Writer's Festival (selected students) \$37.00 Shake & Stir presentation \$10.00
English – Essential Preparation	As above
English – General Literature Preparation	As above
General Geography & Tourism Preparation	Excursions (2) \$90.00
General Legal Studies Preparation	Excursion \$20.00
General History Preparation	Excursion \$40.00
General Japanese Preparation	<b>Subject Levy: \$110.00</b> – Includes dictionary for use in Senior Excursion \$50.00
Humanities & Tourism Preparation	Excursion \$50.00
General Health and Physical Education	Excursion \$20.00
Materials and Technologies Specialisation Preparation	<b>Subject Levy: \$100.00</b> <b>Safety Glasses \$5.00</b>

Dance	Dance Eisteddfod (optional) \$120.00 Black Leotard and tights \$70.00 Dance Showcase Tickets (optional) \$30 - \$35
Film, Television & New Media	Adobe Suite Site Licence for home \$10.00 32 GB USB approximate cost \$15.00 SD Card 16GB \$12.00 Expert 2 day Workshop \$100.00
General Media Arts	Adobe Suite Site Licence for home \$10.00 32 GB USB approximate cost \$12.00 SD Card 16 GB \$11.00
Music	QSO Music Excursion \$40.00 Theory Book \$25.00
The Arts – Production Preparation	Performances \$48.00

Program of Excellence – Visual Arts	<b>Subject Levy:</b> \$200.00

# YEAR 11 SUBJECT SELECTIONS

## Senior Education Profile

Students in Queensland are issued with a Senior Education Profile (SEP) upon completion of senior studies. This profile may include a:

- Senior Statement
- Queensland Certificate of Education (QCE)
- Queensland Certificate of Individual Achievement (QCIA).

For more information about the SEP see <https://www.qcaa.qld.edu.au/senior>.

## Senior Statement

The Senior Statement is a transcript of a student's learning account. It shows all QCE-contributing studies and the results achieved that may contribute to the award of a QCE.

If a student has a Senior Statement, then they have satisfied the completion requirements for Year 12 in Queensland.

## Queensland Certificate of Education (QCE)

Students may be eligible for a Queensland Certificate of Education (QCE) at the end of their senior schooling. Students who do not meet the QCE requirements can continue to work towards the certificate post-secondary schooling. The QCAA awards a QCE in the following July or December, once a student becomes eligible. Learning accounts are closed after nine years; however, a student may apply to the QCAA to have the account reopened and all credit continued.

## Queensland Certificate of Individual Achievement (QCIA)

The Queensland Certificate of Individual Achievement (QCIA) reports the learning achievements of eligible students who complete an individual learning program. At the end of the senior phase of learning, eligible students achieve a QCIA. These students have the option of continuing to work towards a QCE post-secondary schooling.

## Senior Subjects

The QCAA develops five types of senior subject syllabuses — Applied, General, General (Extension), General (Senior External Examination) and Short Course. Results in Applied and General subjects contribute to the award of a QCE and may contribute to an Australian Tertiary Admission Rank (ATAR) calculation, although no more than one result in an Applied subject can be used in the calculation of a student's ATAR.

Typically, it is expected that most students will complete these courses across Years 11 and 12. All subjects build on the P–10 Australian Curriculum.

For more information about specific subjects, schools, students and parents/carers are encouraged to access the relevant senior syllabuses at <https://www.qcaa.qld.edu.au/senior/subjects-from-2024/syllabuses> and, for Senior External Examinations, [www.qcaa.qld.edu.au/senior/see](http://www.qcaa.qld.edu.au/senior/see)

## Applied and Applied (Essential) syllabuses

Applied subjects are suited to students who are primarily interested in pathways beyond senior secondary schooling that lead to vocational education and training or work.

## General syllabuses

General subjects are suited to students who are interested in pathways beyond senior secondary schooling that lead primarily to tertiary studies and to pathways for vocational education and training and work.

## General (Extension) syllabuses

Extension subjects are extensions of the related General subjects and are studied either concurrently with, or after, Units 3 and 4 of the related General course.

Extension courses offer more challenge than the related General courses and build on the studies students have already undertaken in the subject.

## General (Senior External Examination) syllabuses

Senior External Examinations are suited to:

- students in the final year of senior schooling (Year 12) who are unable to access particular subjects at their school
- students less than 17 years of age who are not enrolled in a Queensland secondary school, have not completed Year 12 and do not hold a Queensland Certificate of Education (QCE) or Senior Statement
- adult students at least 17 years of age who are not enrolled at a Queensland secondary school.

## Short Course syllabuses

Short Courses are developed to meet a specific curriculum need and are suited to students who are interested in pathways beyond senior secondary schooling that lead to vocational education and training and establish a basis for further education and employment. They are informed by, and articulate closely with, the requirements of the Australian Core Skills Framework (ACSF). A grade of C in Short Courses aligns with the requirements for ACSF Level 3.

For more information about the ACSF see [www.dewr.gov.au/skills-information-training-providers/australian-core-skills-framework](http://www.dewr.gov.au/skills-information-training-providers/australian-core-skills-framework).

## Underpinning factors

All senior syllabuses are underpinned by:

- literacy — the set of knowledge and skills about language and texts essential for understanding and conveying content
- numeracy — the knowledge, skills, behaviours and dispositions that students need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world, and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully.

## Applied and Applied (Essential) syllabuses

In addition to literacy and numeracy, Applied syllabuses are underpinned by:

- applied learning — the acquisition and application of knowledge, understanding and skills in real-world or lifelike contexts

- community connections — the awareness and understanding of life beyond school through authentic, real-world interactions by connecting classroom experience with the world outside the classroom
- skills for work — the set of knowledge, understanding and non-technical skills that underpin successful participation in work.

## General syllabuses and Short Course syllabuses

In addition to literacy and numeracy, General syllabuses and Short Course syllabuses are underpinned by:

- 21st century skills — the attributes and skills students need to prepare them for higher education, work and engagement in a complex and rapidly changing world. These include critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills.

## Vocational education and training (VET)

Students can access VET programs through the school if it:

- is a registered training organisation (RTO)
- has a third-party arrangement with an external provider who is an RTO
- offers opportunities for students to undertake school-based apprenticeships or traineeships.

## Applied and Applied (Essential) syllabuses

Syllabuses are designed for teachers to make professional decisions to tailor curriculum and assessment design and delivery to suit their school context and the goals, aspirations and abilities of their students within the parameters of Queensland's senior phase of learning.

In this way, the syllabus is not the curriculum. The syllabus is used by teachers to develop curriculum for their school context. The term *course of study* describes the unique curriculum and assessment that students engage with in each school context. A course of study is the product of a series of decisions made by a school to select, organise and contextualise units, integrate complementary and important learning, and create assessment tasks in accordance with syllabus specifications.

It is encouraged that, where possible, a course of study is designed such that teaching, learning and assessment activities are integrated and enlivened in an authentic applied setting.

## Course structure

Applied and Applied (Essential) syllabuses are four-unit courses of study.

The syllabuses contain QCAA-developed units as options for schools to select from to develop their course of study.

Units and assessment have been written so that they may be studied at any stage in the course. All units have comparable complexity and challenge in learning and assessment. However, greater scaffolding and support may be required for units studied earlier in the course.

Each unit has been developed with a notional time of 55 hours of teaching and learning, including assessment.

## Curriculum

Applied syllabuses set out only what is essential while being flexible so teachers can make curriculum decisions to suit their students, school context, resources and expertise.

Schools have autonomy to decide:

- which four units they will deliver
- how and when the subject matter of the units will be delivered
- how, when and why learning experiences are developed, and the context in which the learning will occur
- how opportunities are provided in the course of study for explicit and integrated teaching and learning of complementary skills such as literacy, numeracy and 21st century skills
- how the subject-specific information found in this section of the syllabus is enlivened through the course of study.

Giving careful consideration to each of these decisions can lead teachers to develop units that are rich, engaging and relevant for their students.

## Assessment

Applied syllabuses set out only what is essential while being flexible so teachers can make assessment decisions to suit their students, school context, resources and expertise.

Applied syllabuses contain assessment specifications and conditions for the two assessment instruments that must be implemented with each unit. These specifications and conditions ensure comparability, equity and validity in assessment.

Schools have autonomy to decide:

- specific assessment task details within the parameters mandated in the syllabus
- assessment contexts to suit available resources
- how the assessment task will be integrated with teaching and learning activities
- how authentic the task will be.

Teachers make A–E judgments on student responses for each assessment instrument using the relevant instrument-specific standards. In the final two units studied, the QCAA uses a student's results for these assessments to determine an exit result.

More information about assessment in Applied senior syllabuses is available in [Section 7.3.1](#) of the *QCE and QCIA policy and procedures handbook*.

## Essential English and Essential Mathematics — Common internal assessment

For the two Applied (Essential) syllabuses, students complete a total of *four* summative internal assessments in Units 3 and 4 that count toward their overall subject result. Schools develop *three* of the summative internal assessments for each of these subjects and the other summative assessment is a common internal assessment (CIA) developed by the QCAA.

The CIA for Essential English and Essential Mathematics is based on the learning described in Unit 3 of the respective syllabus. The CIA is:

- developed by the QCAA
- common to all schools

- delivered to schools by the QCAA
- administered flexibly in Unit 3
- administered under supervised conditions
- marked by the school according to a common marking scheme developed by the QCAA.
- The CIA is not privileged over the other summative internal assessment.

## Summative internal assessment — instrument-specific standards

The Essential English and Essential Mathematics syllabuses provide instrument-specific standards for the three summative internal assessments in Units 3 and 4.

The instrument-specific standards describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

## General syllabuses

### Course overview

General syllabuses are developmental four-unit courses of study.

Units 1 and 2 provide foundational learning, allowing students to experience all syllabus objectives and begin engaging with the course subject matter. It is intended that Units 1 and 2 are studied as a pair. Assessment in Units 1 and 2 provides students with feedback on their progress in a course of study and contributes to the award of a QCE.

Students should complete Units 1 and 2 before starting Units 3 and 4.

Units 3 and 4 consolidate student learning. Assessment in Units 3 and 4 is summative and student results contribute to the award of a QCE and to ATAR calculations.

### Assessment

#### Units 1 and 2 assessments

Schools decide the sequence, scope and scale of assessments for Units 1 and 2. These assessments should reflect the local context. Teachers determine the assessment program, tasks and marking guides that are used to assess student performance for Units 1 and 2.

Units 1 and 2 assessment outcomes provide feedback to students on their progress in the course of study. Schools should develop at least *two* but no more than *four* assessments for Units 1 and 2. At least *one* assessment must be completed for *each* unit.

Schools report satisfactory completion of Units 1 and 2 to the QCAA, and may choose to report levels of achievement to students and parents/carers using grades, descriptive statements or other indicators.

#### Units 3 and 4 assessments

Students complete a total of *four* summative assessments — three internal and one external — that count towards the overall subject result in each General subject.

Schools develop *three* internal assessments for each senior subject to reflect the requirements described in Units 3 and 4 of each General syllabus.

The three summative internal assessments need to be endorsed by the QCAA before they are used in schools. Students' results in these assessments are externally confirmed by QCAA assessors. These confirmed results from internal assessment are combined with a single result from an external assessment, which is developed and marked by the QCAA. The external assessment result for a subject contributes to a determined percentage of a students' overall subject result. For most subjects this is 25%; for Mathematics and Science subjects it is 50%.

### **Instrument-specific marking guides**

Each syllabus provides instrument-specific marking guides (ISMGs) for summative internal assessments.

The ISMGs describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Schools cannot change or modify an ISMG for use with summative internal assessment.

As part of quality teaching and learning, schools should discuss ISMGs with students to help them understand the requirements of an assessment task.

### **External assessment**

External assessment is summative and adds valuable evidence of achievement to a student's profile. External assessment is:

- common to all schools
- administered under the same conditions at the same time and on the same day
- developed and marked by the QCAA according to a commonly applied marking scheme.

The external assessment contributes a determined percentage (see specific subject guides — assessment) to the student's overall subject result and is not privileged over summative internal assessment.

## **General (Extension) syllabuses**

### **Course overview**

Extension subjects are extensions of the related General subjects and include external assessment. Extension subjects are studied either concurrently with, or after, Units 3 and 4 of the General course of study.

Extension syllabuses are courses of study that consist of two units (Units 3 and 4).

Subject matter, learning experiences and assessment increase in complexity across the two units as students develop greater independence as learners.

The results from Units 3 and 4 contribute to the award of a QCE and to ATAR calculations.

**Note:** In the case of Music Extension, this subject has three syllabuses, one for each of the specialisations — Composition, Musicology and Performance.

## Assessment

### Units 3 and 4 assessments

Students complete a total of *four* summative assessments — three internal and one external — that count towards the overall subject result in each General (Extension) subject.

Schools develop *three* internal assessments for each senior subject to reflect the requirements described in Units 3 and 4 of each General syllabus.

The three summative internal assessments need to be endorsed by the QCAA before they are used in schools. Students' results in these assessments are externally confirmed by QCAA assessors. These confirmed results from internal assessment are combined with a single result from an external assessment, which is developed and marked by the QCAA. The external assessment result for a subject contributes to a determined percentage of a students' overall subject result. For most subjects this is 25%; for Mathematics and Science subjects it is 50%.

## Short Course syllabuses

### Course overview

Short Courses are one-unit courses of study. A Short Course syllabus includes topics and subtopics. Results contribute to the award of a QCE. Results do not contribute to ATAR calculations.

Short Courses are available in:

- Career Education
- Literacy
- Numeracy.

### Assessment

Short Course syllabuses use two summative school-developed assessments to determine a student's exit result. Schools develop these assessments based on the learning described in the syllabus. Short Courses do not use external assessment.

Short Course syllabuses provide instrument-specific standards for the two summative internal assessments. The instrument-specific standards describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the topic objectives and are contextualised for the requirements of the assessment instrument.

## LEARNING CONNECTIONS SUPPORT

In Senior Secondary, SET Plans (Senior Education and Training Plans) with a transition focus are developed with students and parents in Year 10. These plans outline goals across areas of academic learning, personal dimensions and work-related areas. The SET Plan interviews are facilitated with experienced staff with the support of the Guidance Officer as needed.

Additional support and expertise can be accessed through disability specific support personnel. Students leaving Year 12 aim to graduate having achieved these goals and be prepared for post-school life, with independence being an overall aim for students with disabilities.

Students have opportunities to study school-based subjects as well as subjects at university and TAFE and can undertake traineeships based on their interests, abilities, and work ethic. Students may also participate in work experience placements to develop work readiness skills prior to undertaking a school-based traineeship. Each pathway is individually planned through the SET Plan process.

In the last six months of senior schooling, students may sign with a Disability Employment Service (DES) who can provide additional support finding casual or part-time employment with supportive employers. On completion of twelve years of schooling, our students have the opportunity to achieve either the Queensland Certificate of Education (QCE) or Queensland Certificate of Individual Achievement (QCIA) if they meet the required prerequisites.

All students engage in timetabled classes with their peers for all or part of their program, with varying levels of support. Support is offered to students based on individual need and may include in-class support, study line assistance (tutorials) and homework club. Students may also participate in regular timetabled classes with their peers and achieve individualised learning outcomes through a QCIA pathway.

## Prerequisites For Success in Senior Subjects

Prerequisites are requirements from each faculty for the successful completion of the subject. Student must complete a Preparation Course to a C level of achievement to be eligible to select the corresponding Senior Subject. (IE, a C in Year 10 General Chemistry Preparation Course is required to study General Chemistry in Year 11).

**If students have not completed the Preparation Course in Year 10, enrolments into Year 11 subjects will be considered on an individual basis.** In conjunction, please refer to the 2026 Year 11 Additional Costs document.

Senior Subject	Prerequisite
Accounting	C in Year 10 General Accounting and Business Preparation Course

The subject English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied texts.

Students have opportunities to engage with language and texts through a range of teaching and learning experiences to foster:

- skills to communicate effectively in Standard Australian English for the purposes of responding to and creating literary and non-literary texts
- skills to make choices about generic structures, language, textual features and technologies for participating actively in literary analysis and the creation of texts in a range of modes, mediums and forms, for a variety of purposes and audiences
- enjoyment and appreciation of literary and non-literary texts, the aesthetic use of language, and style
- creative thinking and imagination, by exploring how literary and non-literary texts shape perceptions of the world and enable us to enter the worlds of others
- critical exploration of ways in which literary and non-literary texts may reflect or challenge social and cultural ways of thinking and influence audiences
- empathy for others and appreciation of different perspectives through studying a range of literary and non-literary texts from diverse cultures and periods, including Australian texts by Aboriginal writers and/or Torres Strait Islander writers.

## Pathways

A course of study in English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

## Objectives

By the conclusion of the course of study, students will:

1. Use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations.
2. Establish and maintain roles of the writer/speaker/designer and relationships with audiences.
3. Create and analyse perspectives and representations of concepts, identities, times and places.
4. Make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions.
5. Use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts.
6. Select and synthesise subject matter to support perspectives.
7. Organise and sequence subject matter to achieve particular purposes.
8. Use cohesive devices to emphasise ideas and connect parts of texts.
9. Make language choices for particular purposes and contexts.
10. Use grammar and language structures for particular purposes.
11. Use mode-appropriate features to achieve particular purposes.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Perspectives and texts</b> <ul style="list-style-type: none"> <li>• Texts in contexts</li> <li>• Language and textual analysis</li> <li>• Responding to and creating texts</li> </ul>	<b>Texts and culture</b> <ul style="list-style-type: none"> <li>• Texts in contexts</li> <li>• Language and textual analysis</li> <li>• Responding to and creating texts</li> </ul>	<b>Textual connections</b> <ul style="list-style-type: none"> <li>• Conversations about issues in texts</li> <li>• Conversations about concepts in texts</li> </ul>	<b>Close study of literary texts</b> <ul style="list-style-type: none"> <li>• Creative responses to literary texts</li> <li>• Critical responses to literary texts</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): <ul style="list-style-type: none"> <li>• Extended response — spoken persuasive response</li> </ul>	25%	Summative internal assessment 3 (IA3): <ul style="list-style-type: none"> <li>• Extended response — imaginative written response</li> </ul>	25%
Summative internal assessment 2 (IA2): <ul style="list-style-type: none"> <li>• Extended response — written response for a public audience</li> </ul>	25%	Summative external assessment (EA): <ul style="list-style-type: none"> <li>• Examination — analytical written response</li> </ul>	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General English Preparation Course is required.

# Literature

## General senior subject

The subject Literature focuses on the study of literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied literary texts.

Students have opportunities to engage with language and texts through a range of teaching and learning experiences to foster:

- skills to communicate effectively in Standard Australian English for the purposes of responding to and creating literary texts
- skills to make choices about generic structures, language, textual features and technologies to participate actively in the dialogue and detail of literary analysis and the creation of imaginative and analytical texts in a range of modes, mediums and forms
- enjoyment and appreciation of literary texts and the aesthetic use of language, and style
- creative thinking and imagination by exploring how literary texts shape perceptions of the world and enable us to enter the worlds of others
- critical exploration of ways in which literary texts may reflect or challenge social and cultural ways of thinking and influence audiences
- empathy for others and appreciation of different perspectives through studying a range of literary texts from diverse cultures and periods, including Australian texts by Aboriginal writers and/or Torres Strait Islander writers.

## Pathways

A course of study in Literature promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

## Objectives

By the conclusion of the course of study, students will:

1. Use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
2. Establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
3. Create and analyse perspectives and representations of concepts, identities, times and places
4. Make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
5. Use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
6. Select and synthesise subject matter to support perspectives
7. Organise and sequence subject matter to achieve particular purposes
8. Use cohesive devices to emphasise ideas and connect parts of texts
9. Make language choices for particular purposes and contexts
10. Use grammar and language structures for particular purposes
11. Use mode-appropriate features to achieve particular purposes.

<b>Introduction to literary studies</b> <ul style="list-style-type: none"> <li>• Ways literary texts are received and responded to</li> <li>• How textual choices affect readers</li> <li>• Creating analytical and imaginative texts</li> </ul>	<b>Intertextuality</b> <ul style="list-style-type: none"> <li>• Ways literary texts connect with each other — genre, concepts and contexts</li> <li>• Ways literary texts connect with each other — style and structure</li> <li>• Creating analytical and imaginative texts</li> </ul>	<b>Literature and identity</b> <ul style="list-style-type: none"> <li>• Relationship between language, culture and identity in literary texts</li> <li>• Power of language to represent ideas, events and people</li> <li>• Creating analytical and imaginative texts</li> </ul>	<b>Independent explorations</b> <ul style="list-style-type: none"> <li>• Dynamic nature of literary interpretation</li> <li>• Close examination of style, structure and subject matter</li> <li>• Creating analytical and imaginative texts</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination — analytical written response	25%	Summative internal assessment 3 (IA3): • Extended response — imaginative written response	25%
Summative internal assessment 2 (IA2): • Extended response — imaginative spoken/multimodal response	25%	Summative external assessment (EA): • Examination — analytical written response	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Literature Preparation Course is required.

# English & Literature Extension

General senior subject - Year 12 subject only in conjunction with General English or Literature

General

English & Literature Extension is an extension of both the English (2025) and the Literature (2025) syllabuses and should be read in conjunction with those syllabuses. To study English & Literature Extension, students should have completed Units 1 and 2 of either English or Literature. In Year 12, students undertake Units 3 and 4 of English & Literature Extension concurrently with, or after, Units 3 and 4 of English and/or Units 3 and 4 of Literature. The English & Literature Extension course offers more challenge than other English courses and builds on the literature study students have already undertaken.

By offering students the opportunity to specialise in the theorised study of literature, English & Literature Extension provides students with ways they might understand themselves and the potential that literature has to expand the scope of their experiences. The subject assists students to ask critical questions about cultural assumptions, implicit values and differing world views encountered in an exploration of social, cultural and textual understandings about literary texts and the ways they might be interpreted and valued.

In English & Literature Extension, students apply different theoretical approaches to analyse and evaluate a variety of literary texts and different ways readers might interpret these texts. They synthesise different interpretations and relevant theoretical approaches to produce written and spoken extended analytical and evaluative texts. The nature of the learning in this subject provides opportunities for students to work independently on intellectually challenging tasks.

## Pathways

A course of study in English & Literature Extension can establish a basis for further education and employment in a range of fields, and can lead to a range of careers in areas where understanding social, cultural

and textual influences on ways of viewing the world is a key element, such as law, journalism, media, arts, curating, education, policy and human resources. It also provides a good introduction to the academic disciplines and fields of study that involve the application of methodologies based on theoretical understandings.

## Objectives

By the conclusion of the course of study, students will:

1. Demonstrate understanding of literary texts studied to develop interpretation/s
2. Demonstrate understanding of different theoretical approaches to exploring meaning in texts
3. Demonstrate understanding of the relationships among theoretical approaches
4. Apply different theoretical approaches to literary texts to develop and examine interpretations
5. Analyse how different genres, structures and textual features of literary texts support different interpretations
6. Use appropriate patterns and conventions of academic genres and communication, including correct terminology, citation and referencing conventions
7. Use textual features in extended analytical responses to create desired effects for specific audiences
8. Evaluate theoretical approaches used to explore different interpretations of literary texts
9. Evaluate interpretations of literary texts, making explicit the theoretical approaches that underpin them
10. synthesise analysis of literary texts, theoretical approaches and interpretations with supporting evidence.

## Structure

To study English & Literature Extension, students should have completed Units 1 and 2 of either English or Literature. In Year 12, students undertake Units 3 and 4 of English & Literature Extension concurrently with, or after, Units 3 and 4 of English and/or Units 3 and 4 of Literature.

Unit 3	Unit 4
<b>Ways of reading</b> <ul style="list-style-type: none"><li>• Readings and defences</li><li>• Defence of a complex transformation</li></ul>	<b>Exploration and evaluation</b> <ul style="list-style-type: none"><li>• Extended academic research paper</li><li>• Theorised exploration of texts</li></ul>

## Assessment

In Units 3 and 4 students complete *four* summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): <ul style="list-style-type: none"><li>• Reading and defence</li></ul>	20%	Summative internal assessment 3 (IA3): <ul style="list-style-type: none"><li>• Academic research paper</li></ul>	35%
Summative internal assessment 2 (IA2): <ul style="list-style-type: none"><li>• Defence of a complex transformation</li></ul>	20%	Summative external assessment (EA): <ul style="list-style-type: none"><li>• Examination — extended response</li></ul>	25%

## Prerequisites

The offer to study English and Literature Extension in Year 12 will be based upon review of students' academic portfolios from Year 11 English or Literature.

The subject Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. The subject encourages students to recognise language and texts as relevant in their lives now and in the future and enables them to understand, accept or challenge the values and attitudes in these texts.

Students have opportunities to engage with language and texts through a range of teaching and learning experiences to foster:

- skills to communicate confidently and effectively in Standard Australian English in a variety of contemporary contexts and social situations, including everyday, social, community, further education and work-related contexts
- skills to choose generic structures, language, language features and technologies to best convey meaning
- skills to read for meaning and purpose, and to use, critique and appreciate a range of contemporary literary and non-literary texts
- effective use of language to produce texts for a variety of purposes and audiences
- creative and imaginative thinking to explore their own world and the worlds of others
- active and critical interaction with a range of texts, and an awareness of how language positions both them and others
- empathy for others and appreciation of different perspectives through a study of a range of texts from diverse cultures, including Australian texts by Aboriginal writers and/or Torres Strait Islander writers
- enjoyment of contemporary literary and non-literary texts, including digital texts.

## Pathways

A course of study in Essential English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

## Objectives

By the conclusion of the course of study, students will:

1. Use patterns and conventions of genres to achieve particular purposes and audiences.
2. Use appropriate roles and relationships with audiences.
3. Construct and explain representations of identities, places, events and/or concepts.
4. Make use of and explain opinions and/or ideas in texts, according to purpose.
5. Explain how language features and text structures shape meaning and invite particular responses.
6. Select and use subject matter to support perspectives.
7. Sequence subject matter and use mode-appropriate cohesive devices to construct coherent texts.
8. Make language choices according to register informed by purpose, audience and context.
9. Use mode-appropriate language features to achieve particular purposes across modes.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Language that works</b> <ul style="list-style-type: none"> <li>• Responding texts</li> <li>• Creating texts</li> </ul>	<b>Texts and human experiences</b> <ul style="list-style-type: none"> <li>• Responding texts</li> <li>• Creating texts</li> </ul>	<b>Language that influences</b> <ul style="list-style-type: none"> <li>• Creating and shaping perspectives on community, local and global issues in texts</li> <li>• Responding to texts that seek to influence audiences</li> </ul>	<b>Representations and popular culture texts</b> <ul style="list-style-type: none"> <li>• Responding to popular culture texts</li> <li>• Creating representations of Australian identifies, places, events and concepts</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete *four* summative assessments. Schools develop three summative internal assessments and the common internal assessment (CIA) is developed by the QCAA.

### Summative assessments

Unit 3	Unit 4
Summative internal assessment 1 (IA1): <ul style="list-style-type: none"> <li>• Extended response — spoken response</li> </ul>	Summative internal assessment 3 (IA3): <ul style="list-style-type: none"> <li>• Extended response — Multimodal response</li> </ul>
Summative internal assessment 2 (IA2): <ul style="list-style-type: none"> <li>• Common internal assessment (CIA) — short response examination</li> </ul>	Summative internal assessment (IA4): <ul style="list-style-type: none"> <li>• Extended response — Written response</li> </ul>

## Prerequisites

Nil

Literacy is a one-unit course of study, developed to meet a specific curriculum need. It is informed by the Australian Core Skills Framework (ACSF) Level 3.

Literacy is integral to a person's ability to function effectively in society. It involves the integration of speaking, listening and critical thinking with reading and writing.

Students learn strategies to develop and monitor their own learning, select and apply reading and oral strategies to comprehend and make meaning in texts, demonstrate the relationships between ideas and information in texts, evaluate and communicate ideas and information, and learn and use textual features and conventions.

Students identify and develop a set of knowledge, skills and strategies needed to shape language according to purpose, audience and context. They select and apply strategies to comprehend and make meaning in a range of texts and text types, and communicate ideas and information in a variety of modes. Students understand and use textual features and conventions, and demonstrate the relationship between ideas and information in written, oral, visual and multimodal texts.

## Pathways

A course of study in Literacy may establish a basis for further education and employment in the fields of trade, industry, business and community services. Students will learn within a practical context related to general employment and successful participation in society, drawing on the literacy used by various professional and industry groups.

## Objectives

By the conclusion of the course of study, students will:

1. evaluate and integrate information and ideas to construct meaning from texts and text types
2. select and apply reading strategies that are appropriate to purpose and text type
3. communicate relationships between ideas and information in a style appropriate to audience and purpose
4. select vocabulary, grammatical structures and conventions that are appropriate to the text
5. select and use appropriate strategies to establish and maintain spoken communication
6. derive meaning from a range of oral texts
7. plan, implement and adjust processes to achieve learning outcomes
8. apply learning strategies.

## Eligibility

Students in Years 10, 11 and 12 may access this course. Successful completion of this course will provide a literacy tick towards a student's QCE.

## Structure and assessment

Schools develop two assessment instruments to determine the student's exit result.

Topic 1: Personal identity and education	Topic 2: The work environment
One assessment consisting of two parts: <ul style="list-style-type: none"><li>• an extended response — written (Internal assessment 1A)</li><li>• a student learning journal (Internal assessment 1B).</li></ul>	One assessment consisting of two parts: <ul style="list-style-type: none"><li>• an extended response — short response (Internal assessment 2A)</li><li>• a reading comprehension task (Internal assessment 2B).</li></ul>

# General Mathematics

## General senior subject

General

The major domains of mathematics in General Mathematics are Number and algebra, Measurement and geometry, Statistics and Networks and matrices, building on the content of the P–10 Australian Curriculum. Learning reinforces prior knowledge and further develops key mathematical ideas, including rates and percentages, concepts from financial mathematics, linear and non-linear expressions, sequences, the use of matrices and networks to model and solve authentic problems, the use of trigonometry to find solutions to practical problems, and the exploration of real-world phenomena in statistics.

General Mathematics is designed for students who want to extend their mathematical skills beyond Year 10 but whose future studies or employment pathways do not require calculus. It incorporates a practical approach that equips learners for their needs as future citizens. Students will learn to ask appropriate questions, map out pathways, reason about complex solutions, set up models and communicate in different forms. They will experience the relevance of mathematics to their daily lives, communities and cultural backgrounds.

They will develop the ability to understand, analyse and take action regarding social issues in their world.

When students gain skill and self-assurance, when they understand the content and when they evaluate their success by using and transferring their knowledge, they develop a mathematical mindset.

### Pathways

A course of study in General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts.

### Objectives

By the conclusion of the course of study, students will:

1. Recall mathematical knowledge.
2. Use mathematical knowledge.
3. Communicate mathematical knowledge.
4. Evaluate the reasonableness of solutions.
5. Justify procedures and decisions.
6. Solve mathematical problems.

## Structure

Summative internal assessment 2 (IA2): • Examination	15%		
Summative external assessment (EA): 50% • Examination			

## Prerequisites

In order to succeed in this subject, a C in a Year 10 General Mathematics Preparation Course is required.

# Mathematical Methods

## General senior subject

General

The major domains of mathematics in Mathematical Methods are Algebra, Functions, relations and their graphs, Calculus and Statistics.

Topics are developed systematically, with increasing levels of sophistication, complexity and connection, and build on algebra, functions and their graphs, and probability from the P–10 Australian Curriculum. Calculus is essential for developing an understanding of the physical world. The domain Statistics is used to describe and analyse phenomena involving uncertainty and variation. Both are the basis for developing effective models of the world and solving complex and abstract mathematical problems. The ability to translate written, numerical, algebraic, symbolic and graphical information from one representation to another is a vital part of learning in Mathematical Methods.

Students who undertake Mathematical Methods will see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers. Through solving problems and developing models, they will appreciate that mathematics and statistics are dynamic tools that are critically important in the 21st century.

## Pathways

A course of study in Mathematical Methods can establish a basis for further education and employment in the fields of natural and physical sciences (especially physics and chemistry), mathematics and science education, medical and health sciences (including human biology, biomedical science, nanoscience and forensics), engineering (including chemical, civil, electrical and mechanical engineering, avionics, communications and mining), computer science (including electronics and software design), psychology and business.

## Objectives

By the conclusion of the course of study, students will:

1. Recall mathematical knowledge.
2. Use mathematical knowledge.
3. Communicate mathematical knowledge.
4. Evaluate the reasonableness of solutions.
5. Justify procedures and decisions.
6. Solve mathematical problems.

## Structure

Summative internal assessment 2 (IA2): • Examination	15%		
Summative external assessment (EA): 50% • Examination			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Mathematical Methods and Specialist Mathematics Preparation Course is required.

# Specialist Mathematics

## General senior subject

The major domains of mathematical knowledge in Specialist Mathematics are Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Topics are developed systematically, with increasing levels of sophistication, complexity and connection, building on functions, calculus, statistics from Mathematical Methods, while vectors, complex numbers and matrices are introduced. Functions and calculus are essential for creating models of the physical world. Statistics are used to describe and analyse phenomena involving probability, uncertainty and variation. Matrices, complex numbers and vectors are essential tools for explaining abstract or complex relationships that occur in scientific and technological endeavours.

Students who undertake Specialist Mathematics will develop confidence in their mathematical knowledge and ability, and gain a positive view of themselves as mathematics

learners. They will gain an appreciation of the true nature of mathematics, its beauty and its power.

General

## Pathways

A course of study in Specialist Mathematics can establish a basis for further education and employment in the fields of science, all branches of mathematics and statistics, computer science, medicine, engineering, finance and economics.

## Objectives

By the conclusion of the course of study, students will:

1. Recall mathematical knowledge.
2. Use mathematical knowledge.
3. Communicate mathematical knowledge.
4. Evaluate the reasonableness of solutions.
5. Justify procedures and decisions.
6. Solve mathematical problems.

## Structure

Specialist Mathematics is to be undertaken in conjunction with, or on completion of, Mathematical Methods.

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Mathematical Methods and Specialist Mathematics Preparation Course is required.

# Essential Mathematics

## Applied senior subject

Applied

The major domains of mathematics in Essential Mathematics are Number, Data, Location and time, Measurement and Finance. Teaching and learning builds on the proficiency strands of the P–10 Australian Curriculum. Students develop their conceptual understanding when they undertake tasks that require them to connect mathematical concepts, operations and relations. They will learn to recognise definitions, rules and facts from everyday mathematics and data, and to calculate using appropriate mathematical processes.

Students will benefit from studies in Essential Mathematics because they will develop skills that go beyond the traditional ideas of numeracy. This is achieved through a greater emphasis on estimation, problem-solving and reasoning, which develops students into thinking citizens who interpret and use mathematics to make informed predictions and decisions about personal and financial priorities. Students will see mathematics as applicable to their employability and lifestyles, and develop leadership skills through self-direction and productive engagement in their learning. They will show curiosity and imagination, and appreciate the benefits of technology. Students will gain an appreciation that there is rarely one way of doing things and that real-world mathematics requires adaptability and flexibility.

### Pathways

A course of study in Essential Mathematics can establish a basis for further education

and employment in the fields of trade, industry, business and community services. Students learn within a practical context related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

### Objectives

By the conclusion of the course of study, students will:

1. Recall mathematical knowledge.
2. Use mathematical knowledge.
3. Communicate mathematical knowledge.
4. Evaluate the reasonableness of solutions.
5. Justify procedures and decisions.
6. Solve mathematical problems.

## Prerequisites

Nil

# Biology

## General senior subject

General

Biology provides opportunities for students to engage with living systems. In Unit 1, students develop their understanding of cells and multicellular organisms. In Unit 2, they engage with the concept of maintaining the internal environment. In Unit 3, students study biodiversity and the interconnectedness of life. This knowledge is linked in Unit 4 with the concepts of heredity and the continuity of life.

Students will learn valuable skills required for the scientific investigation of questions. In addition, they will become citizens who are better informed about the world around them and who have the critical skills to evaluate and make evidence-based decisions about current scientific issues.

Biology aims to develop students':

- sense of wonder and curiosity about life
- respect for all living things and the environment
- understanding of how biological systems interact and are interrelated, the flow of matter and energy through and between these systems, and the processes by which they persist and change
- understanding of major biological concepts, theories and models related to biological systems at all scales, from subcellular processes to ecosystem dynamics
- appreciation of how biological knowledge has developed over time and continues to develop; how scientists use biology in a wide range of applications; and how biological knowledge influences society in local, regional and global contexts

- ability to plan and carry out fieldwork, laboratory and other research investigations, including the collection and analysis of qualitative and quantitative data and the interpretation of evidence
- ability to use sound, evidence-based arguments creatively and analytically when evaluating claims and applying biological knowledge
- ability to communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

## Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

## Objectives

By the conclusion of the course of study, students will:

1. Describe ideas and findings.
2. Apply understanding.
3. Analyse data.
4. Interpret evidence.
5. Evaluate conclusions, claims and processes.
6. Investigate phenomena.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Cells and multicellular organisms</b> <ul style="list-style-type: none"> <li>• Cells as the basis of life</li> <li>• Exchange of nutrients and wastes</li> <li>• Cellular energy, gas exchange and plant physiology</li> </ul>	<b>Maintaining the internal environment</b> <ul style="list-style-type: none"> <li>• Homeostasis</li> <li>• Infectious disease and epidemiology</li> </ul>	<b>Biodiversity and the interconnectedness of life</b> <ul style="list-style-type: none"> <li>• Biodiversity and populations</li> <li>• Functioning ecosystems and succession</li> </ul>	<b>Heredity and continuity of life</b> <ul style="list-style-type: none"> <li>• Genetics and heredity</li> <li>• Continuity of life on Earth</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Students will be required to attend a field work study, offsite, to complete requirement for the IA2.

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Data test	10%	Summative internal assessment 3 (IA3): • Research investigation	20%
Summative internal assessment 2 (IA2): • Student experiment	20%		
Summative external assessment (EA): 50% • Examination – combination response			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Biology Preparation Course is required.

# Chemistry

## General senior subject

General

Chemistry is the study of materials and their properties and structure. In Unit 1, students study atomic theory, chemical bonding, and the structure and properties of elements and compounds. In Unit 2, students explore intermolecular forces, gases, aqueous solutions, acidity and rates of reaction. In Unit 3, students study equilibrium processes and redox reactions. In Unit 4, students explore organic chemistry, synthesis and design to examine the characteristic chemical properties and chemical reactions displayed by different classes of organic compounds.

Chemistry aims to develop students':

- interest in and appreciation of chemistry and its usefulness in helping to explain phenomena and solve problems encountered in their ever-changing world
- understanding of the theories and models used to describe, explain and make predictions about chemical systems, structures and properties
- understanding of the factors that affect chemical systems and how chemical systems can be controlled to produce desired products
- appreciation of chemistry as an experimental science that has developed through independent and collaborative research, and that has significant impacts on society and implications for decision-making
- expertise in conducting a range of scientific investigations, including the collection and

analysis of qualitative and quantitative data, and the interpretation of evidence

- ability to critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions
- ability to communicate chemical understanding and findings to a range of audiences, including through the use of appropriate representations, language and nomenclature.

## Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

## Objectives

By the conclusion of the course of study, students will:

1. Describe ideas and findings.
2. Apply understanding.
3. Analyse data.
4. Interpret evidence.
5. Evaluate conclusions, claims and processes.
6. Investigate phenomena.

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Chemistry Preparation Course is required.

Physics provides opportunities for students to engage with the classical and modern understandings of the universe. In Unit 1, students learn about the fundamental concepts of thermodynamics, electricity and nuclear processes. In Unit 2, students learn about the concepts and theories that predict and describe the linear motion of objects. Further, they will explore how scientists explain some phenomena using an understanding of waves. In Unit 3, students engage with the concept of gravitational and electromagnetic fields, and the relevant forces associated with them. Finally, in Unit 4, students study modern physics theories and models that, despite being counterintuitive, are fundamental to our understanding of many common observable phenomena.

Students will learn valuable skills required for the scientific investigation of questions. In addition, they will become citizens who are better informed about the world around them, and who have the critical skills to evaluate and make evidence-based decisions about current scientific issues.

Physics aims to develop students':

- appreciation of the wonder of physics and the significant contribution physics has made to contemporary society
- understanding that diverse natural phenomena may be explained, analysed and predicted using concepts, models and theories that provide a reliable basis for action
- understanding of the ways in which matter and energy interact in physical systems across a range of scales
- understanding of the ways in which models and theories are refined, and new models and theories are developed in physics; and

how physics knowledge is used in a wide range of contexts and informs personal, local and global issues

- investigative skills, including the design and conduct of investigations to explore phenomena and solve problems, the collection and analysis of qualitative and quantitative data, and the interpretation of evidence
- ability to use accurate and precise measurement, valid and reliable evidence, and scepticism and intellectual rigour to evaluate claims
- ability to communicate physics understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

## Pathways

A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

## Objectives

By the conclusion of the course of study, students will:

1. Describe ideas and findings.
2. Apply understanding.
3. Analyse data.
4. Interpret evidence.
5. Evaluate conclusions, claims and processes.
6. Investigate phenomena.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Thermal, nuclear and electrical physics</b> <ul style="list-style-type: none"> <li>• Heating processes</li> <li>• Ionising radiation and nuclear reactions</li> <li>• Electrical circuits</li> </ul>	<b>Linear motion and waves</b> <ul style="list-style-type: none"> <li>• Linear motion and force</li> <li>• Waves</li> </ul>	<b>Gravity and electromagnetism</b> <ul style="list-style-type: none"> <li>• Gravity and motion</li> <li>• Electromagnetism</li> </ul>	<b>Revolutions in modern physics</b> <ul style="list-style-type: none"> <li>• Special relativity</li> <li>• Quantum theory</li> <li>• The Standard Model</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Data test	10%	Summative internal assessment 3 (IA3): • Research investigation	20%
Summative internal assessment 2 (IA2): • Student experiment	20%		
Summative external assessment (EA): 50% • Examination – combination response			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Physics Preparation Course is required.

Psychology provides opportunities for students to engage with concepts that explain behaviours and underlying cognitions. In Unit 1, students examine individual development in the form of the role of the brain, cognitive development, human consciousness and sleep. In Unit 2, students investigate the concept of intelligence, the process of diagnosis and how to classify psychological disorder and determine an effective treatment, and lastly, the contribution of emotion and motivation on the individual behaviour. In Unit 3, students examine individual thinking and how it is determined by the brain, including perception, memory, and learning. In Unit 4, students consider the influence of others by examining theories of social psychology, interpersonal processes, attitudes and cross-cultural psychology.

Psychology aims to develop students':

- interest in psychology and their appreciation for how this knowledge can be used to understand contemporary issues
- appreciation of the complex interactions, involving multiple parallel processes that continually influence human behaviour
- understanding that psychological knowledge has developed over time and is used in a variety of contexts, and is informed by social, cultural and ethical considerations
- ability to conduct a variety of field research and laboratory investigations involving collection and analysis of qualitative and quantitative data and interpretation of evidence

- ability to critically evaluate psychological concepts, interpretations, claims and conclusions with reference to evidence
- ability to communicate psychological understandings, findings, arguments and conclusions using appropriate representations, modes and genres.

## Pathways

A course of study in Psychology can establish a basis for further education and employment in the fields of psychology, sales, human resourcing, training, social work, health, law, business, marketing and education.

## Objectives

By the conclusion of the course of study, students will:

1. Describe ideas and findings.
1. Apply understanding.
2. Analyse data.
3. Interpret evidence.
4. Evaluate conclusions, claims and processes.
5. Investigate phenomena.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Individual development</b> <ul style="list-style-type: none"> <li>• The role of the brain</li> <li>• Cognitive development</li> <li>• Consciousness, attention and sleep</li> </ul>	<b>Individual behaviour</b> <ul style="list-style-type: none"> <li>• Intelligence</li> <li>• Diagnosis</li> <li>• Psychological disorders and treatments</li> <li>• Emotion and motivation</li> </ul>	<b>Individual thinking</b> <ul style="list-style-type: none"> <li>• Brain function</li> <li>• Sensation and perception</li> <li>• Memory</li> <li>• Learning</li> </ul>	<b>The influence of others</b> <ul style="list-style-type: none"> <li>• Social psychology</li> <li>• Interpersonal processes</li> <li>• Attitudes</li> <li>• Cross-cultural psychology</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete *four* summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Data test	10%	Summative internal assessment 3 (IA3): • Research investigation	20%
Summative internal assessment 2 (IA2): • Student experiment	20%		
Summative external assessment (EA): 50% • Examination – combination response			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Psychology Preparation Course is required.

Science in Practice provides opportunities for students to explore, experience and learn concepts and practical skills valued in multidisciplinary science, workplaces and other settings. Learning in Science in Practice involves creative and critical thinking; systematically accessing, capturing and analysing information, including primary and secondary data; and using digital technologies to undertake research, evaluate information and present data.

Science in Practice students apply scientific knowledge and skills in situations to produce practical outcomes. Students build their understanding of expectations for work in scientific settings and develop an understanding of career pathways, jobs and other opportunities available for participating in and contributing to scientific activities.

Projects and investigations are key features of Science in Practice. Projects require the application of a range of cognitive, technical and reasoning skills and practical-based theory to produce real-world outcomes. Investigations follow scientific inquiry methods to develop a deeper understanding of a particular topic or context and the link between theory and practice in real-world and/or lifelike scientific contexts.

By studying Science in Practice, students develop an awareness and understanding of life beyond school through authentic, real-world interactions to become responsible and informed citizens. They develop a strong personal, socially oriented, ethical outlook that assists with managing context, conflict and uncertainty. Students gain the ability to work effectively and respectfully with diverse teams to maximise understanding of concepts, while exercising flexibility, cultural awareness and a willingness to make necessary compromises to accomplish

common goals. They learn to communicate effectively and efficiently by manipulating appropriate language, terminology, symbols and diagrams associated with scientific communication.

The objectives of the course ensure that students apply what they understand to explain and execute procedures, plan and implement projects and investigations, analyse and interpret information, and evaluate procedures, conclusions and outcomes.

Workplace health and safety practices are embedded across all units and focus on building knowledge and skills in working safely, effectively and efficiently in practical scientific situations.

## Pathways

A course of study in Science in Practice is inclusive and caters for a wide range of students with a variety of backgrounds, interests and career aspirations. It can establish a basis for further education and employment in many fields, eg animal welfare, food technology, forensics, health and medicine, the pharmaceutical industry, recreation and tourism, research, and the resources sector.

## Objectives

By the conclusion of the course of study students should:

1. Describe ideas and phenomena
2. Execute procedures
3. Analyse information
4. Interpret information
5. Evaluate conclusions and outcomes
6. Plan investigations and projects.

## Structure

Science in Practice is a four-unit course of study. This syllabus contains six QCAA-developed units as options for schools to select from to develop their course of study.

Unit option	Unit title
Unit option A	Consumer science
Unit option B	Ecology
Unit option C	Forensic science
Unit option D	Disease

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Science in Practice are:

Technique	Description	Response requirements
Applied investigation	Students investigate a research question by collecting, analysing and interpreting primary or secondary information.	One of the following: <ul style="list-style-type: none"><li>• Multimodal (at least two modes delivered at the same time): up to 7 minutes, 10 A4 pages, or equivalent digital media</li><li>• Written: up to 1000 words</li></ul>
Practical project	Students use practical skills to complete a project in response to a scenario.	<b>Completed project</b> One of the following: <ul style="list-style-type: none"><li>• Product: 1</li><li>• Performance: up to 4 minutes</li></ul> <b>Documented process</b> Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media

## Prerequisites

Nil

Ancient History is concerned with studying people, societies and civilisations of the Ancient World, from the development of the earliest human communities to the end of the Middle Ages. Students explore the interaction of societies and the impact of individuals and groups on ancient events and ways of life, enriching their appreciation of humanity and the relevance of the ancient past. Ancient History illustrates the development of some of the distinctive features of modern society which shape our identity, such as social organisation, systems of law, governance and religion. Ancient History highlights how the world has changed, as well as the significant legacies that continue into the present. This insight gives context for the interconnectedness of past and present across a diverse range of societies. Ancient History aims to have students think historically and form a historical consciousness. A study of the past is invaluable in providing students with opportunities to explore their fascination with, and curiosity about, stories of the past and the mysteries of human behaviour.

Throughout the course of study, students develop an understanding of historical issues and problems by interrogating the surviving evidence of ancient sites, societies, individuals, events and significant historical periods. Students investigate the problematic nature of evidence, pose increasingly complex questions about the past and develop an understanding of different and sometimes conflicting perspectives on the past. A historical inquiry process is integral to the study of Ancient History. Students use the skills of historical inquiry to investigate the past. They devise historical questions and conduct research, analyse historical sources and evaluate and synthesise evidence from sources to formulate justified historical arguments. Historical skills form the learning and subject matter provides the context. Learning in context enables the integration of

historical concepts and understandings into four units of study: Investigating the Ancient World, Personalities in their times, Reconstructing the Ancient World, and People, power and authority.

A course of study in Ancient History empowers students with multi-disciplinary skills in analysing and evaluating textual and visual sources, constructing arguments, challenging assumptions, and thinking both creatively and critically. Ancient History students become knowledge creators, productive and discerning users of technology, and empathetic, open-minded global citizens.

## Pathways

A course of study in Ancient History can establish a basis for further education and employment in the fields of archaeology, history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health and social sciences, writing, academia and research.

## Objectives

By the conclusion of the course of study, students will:

1. Devise historical questions and conduct research.
2. Comprehend terms, concepts and issues.
3. Analyse evidence from historical sources.
4. Evaluate evidence from historical sources.
5. Synthesise evidence from historical sources.
6. Communicate to suit purpose.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Investigating the Ancient World</b> <ul style="list-style-type: none"> <li>Digging up the past</li> </ul> <b>Features of ancient societies</b>	<b>Personalities in their time</b> <ul style="list-style-type: none"> <li>Personality from the Ancient World 1</li> </ul> <b>Personality from the Ancient World 2</b>	<b>Reconstructing the Ancient World</b> <ul style="list-style-type: none"> <li>Rome during the Republic</li> <li>Fifth Century Athens (BCE)</li> </ul>	<b>People, power and authority</b> <ul style="list-style-type: none"> <li>Ancient Carthage and/or Rome – The Punic Wars</li> <li>Ancient Rome – Julius Caesar</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination — essay in response to historical sources	25%	Summative internal assessment 3 (IA3): • Investigation — historical essay based on research	25%
Summative internal assessment 2 (IA2): • Independent source investigation	25%	Summative external assessment (EA): • Examination — short responses to historical sources	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General History Preparation Course is required.

Geography teaches us about the significance of 'place' and 'space' in understanding our world. These two concepts are foundational to the discipline, with the concepts of environment, interconnection, sustainability, scale and change building on this foundation. By observing and measuring spatial, environmental, economic, political, social and cultural factors, geography provides a way of thinking about contemporary challenges and opportunities.

Teaching and learning in Geography are underpinned by inquiry, through which students investigate places in Australia and across the globe. When students think geographically, they observe, gather, organise, analyse and present data and information across a range of scales.

Fieldwork is central to the study of Geography. It provides authentic opportunities for students to engage in real-world applications of geographical skills and thinking, including the collection and representation of data. Fieldwork also encourages participation in collaborative learning and engagement with the world in which students live.

Spatial technologies are also core components of contemporary geography. These technologies provide a real-world experience of Science, Technology, Engineering and Maths (STEM), allowing students to interact with particular geographic phenomena through dynamic, three-dimensional representations that take the familiar form of maps. The skills of spatial visualisation, representation and analysis are highly valued in an increasingly digital and globalised world.

In Geography, students engage in a range of learning experiences that develop their geographical skills and thinking through the exploration of geographical challenges and their effects on people, places and the environment. Students are exposed to a variety of contemporary problems and challenges affecting people and places

across the globe, at a range of scales. These challenges include responding to risk in hazard zones, planning sustainable places, managing land cover transformations and planning for population change.

This course of study enables students to appreciate and promote a more sustainable way of life. Through analysing and applying geographical knowledge, students develop an understanding of the complexities involved in sustainable planning and management practices. Geography aims to encourage students to become informed and adaptable so they develop the skills required to interpret global concerns and make genuine and creative contributions to society. It contributes to their development as global citizens who recognise the challenges of sustainability and the implications for their own and others' lives.

## Pathways

A course of study in Geography can establish a basis for further education and employment in the fields of urban and environmental design, planning and management; biological and environmental science; conservation and land management; emergency response and hazard management; oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology, and science.

## Objectives

By the conclusion of the course of study, students will:

1. Explain geographical processes.
2. Comprehend geographic patterns.
3. Analyse geographical data and information.
4. Apply geographical understanding.
5. Propose action.

6. communicate geographical understanding using appropriate forms of geographical communication.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Responding to risk and vulnerability in hazard zones</b> <ul style="list-style-type: none"> <li>Natural hazard zones</li> <li>Ecological hazard zones</li> </ul>	<b>Planning sustainable places</b> <ul style="list-style-type: none"> <li>Responding to challenges facing a place in Australia</li> <li>Managing the challenges facing a megacity</li> </ul>	<b>Responding to land cover transformations</b> <ul style="list-style-type: none"> <li>Land cover transformations and climate change</li> <li>Responding to local land cover transformations</li> </ul>	<b>Managing population change</b> <ul style="list-style-type: none"> <li>Population challenges in Australia</li> <li>Global population change</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination — combination response	25%	Summative internal assessment 3 (IA3): • Investigation — data report	25%
Summative internal assessment 2 (IA2): • Investigation — field report	25%	Summative external assessment (EA): • Examination — combination response	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Geography Preparation Course is required.

# Legal Studies

## General senior subject

General

Legal Studies focuses on the interaction between society and the discipline of law. Students study the legal system and how it regulates activities and aims to protect the rights of individuals, while balancing these with obligations and responsibilities. An understanding of legal processes and concepts enables citizens to be better informed and able to constructively question and contribute to the improvement of laws and legal processes. This is important as the law is dynamic and evolving, based on values, customs and norms that are challenged by technology, society and global influences.

Legal Studies explores the role and development of law in response to current issues. The subject starts with the foundations of law and explores the criminal justice process through to punishment and sentencing. Students then study the civil justice system, focusing on contract law and negligence. With increasing complexity, students critically examine issues of governance that are the foundation of the Australian and Queensland legal systems, before they explore contemporary issues of law reform and change. The study finishes with considering Australian and international human rights issues. Throughout the course, students analyse issues and evaluate how the rule of law, justice and equity can be achieved in contemporary contexts.

The primary skills of inquiry, critical thinking, problem-solving and reasoning empower Legal Studies students to make informed and ethical decisions and recommendations. Learning is based on an inquiry approach that develops reflection skills and metacognitive awareness. Through inquiry, students identify and describe legal issues, explore information and data, analyse, evaluate to propose recommendations, and create responses that convey legal meaning. They improve their research skills by using information and communication technology (ICT) and databases to access research, commentary, case law and legislation. Students analyse legal information to determine the nature and scope of the legal issue and examine different or opposing

views, which are evaluated against legal criteria. These are critical skills that allow students to think strategically in the 21st century.

Knowledge of the law enables students to have confidence in approaching and accessing the legal system and provides them with an appreciation of the influences that shape the system. Legal knowledge empowers students to make constructive judgments on, and knowledgeable commentaries about, the law and its processes. Students examine and justify viewpoints involved in legal issues, while also developing respect for diversity. Legal Studies satisfies interest and curiosity as students question, explore and discuss tensions between changing social values, justice and equitable outcomes.

Legal Studies enables students to appreciate how the legal system is relevant to them and their communities. The subject enhances students' abilities to contribute in an informed and considered way to legal challenges and change, both in Australia and globally.

## Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies, politics, education, sociology and academia. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways. The research and analytical skills this course develops are universally valued in business, health, science and engineering industries.

## Objectives

By the conclusion of the course of study, students will:

1. Comprehend legal concepts, principles and processes.
2. Select legal information from sources.
3. Analyse legal issues.
4. Evaluate legal situations.
5. Create responses that communicate meaning to suit the intended purpose.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Beyond reasonable doubt</b> <ul style="list-style-type: none"> <li>• Legal foundations</li> <li>• Criminal investigation process</li> <li>• Criminal trial process</li> <li>• Punishment and sentencing</li> </ul>	<b>Balance of probabilities</b> <ul style="list-style-type: none"> <li>• Civil law foundations</li> <li>• Contractual obligations</li> <li>• Negligence and the duty of care</li> </ul>	<b>Law, governance and change</b> <ul style="list-style-type: none"> <li>• Governance in Australia</li> <li>• Law reform within a dynamic society</li> </ul>	<b>Human rights in legal contexts</b> <ul style="list-style-type: none"> <li>• Human rights</li> <li>• Australia's legal response to international law and human rights</li> <li>• Human rights in Australian contexts</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Summative internal assessment 2 (IA2): • Investigation — inquiry report	25%	Summative external assessment (EA): • Examination — combination response	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Legal Studies Preparation Course is required.

# Modern History

## General senior subject

General

Modern History is a discipline-based subject where students examine traces of humanity's recent past so they may form their own views about the Modern World since 1750. Through Modern History, students' curiosity and imagination is invigorated while their appreciation of civilisation is broadened and deepened. Students consider different perspectives and learn that interpretations and explanations of events and developments in the past are contestable and tentative. Modern History distinguishes itself from other subjects by enabling students to empathise with others and make meaningful connections between what existed previously, and the world being lived in today — all of which may help build a better tomorrow.

Modern History has two main aims. First, Modern History seeks to have students gain historical knowledge and understanding about some of the main forces that have contributed to the development of the Modern World. Second, Modern History aims to have students engage in historical thinking and form a historical consciousness in relation to these same forces. Both aims complement and build on the learning covered in the *Australian Curriculum: History 7–10*. The first aim is achieved through the thematic organisation of Modern History around four of the forces that have helped to shape the Modern World — ideas, movements, national experiences and international experiences. In each unit, students explore the nature, origins, development, legacies and contemporary significance of the force being examined. The second aim is achieved through the rigorous application of historical concepts and historical skills across the syllabus. To fulfil both aims, engagement with a historical inquiry process is integral and results in students devising historical questions and conducting research, analysing, evaluating and synthesising evidence from historical sources, and communicating the outcomes of their historical thinking.

Modern History benefits students as it enables them to thrive in a dynamic, globalised and knowledge-based world. Through Modern History, students acquire an intellectual toolkit consisting of literacy, numeracy and 21st century skills. This ensures students of Modern History gain a range of transferable skills that will help them forge their own pathways to personal and professional success, as well as become empathetic and critically literate citizens who are equipped to embrace a multicultural, pluralistic, inclusive, democratic, compassionate and sustainable future.

## Pathways

A course of study in Modern History can establish a basis for further education and employment in the fields of history, education, psychology, sociology, law, business, economics, politics, journalism, the media, writing, academia and strategic analysis.

## Objectives

By the conclusion of the course of study, students will:

1. Devise historical questions and conduct research.
2. Comprehend terms, issues and concepts.
3. Analyse historical sources and evidence.
4. Evaluate evidence from historical sources.
5. Synthesise evidence from historical sources.
6. Communicate to suit purpose.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p><b>Ideas in the modern world</b></p> <p>Two topics are studied in this unit. Schools select two of the following topics to study in this unit:</p> <ul style="list-style-type: none"> <li>• Australian Frontier Wars, 1788–1930s (First Fleet arrives in Australia – Caledon Bay Crisis ends)</li> <li>• Age of Enlightenment, 1750s–1789 (Encyclopédie published – French Revolution begins)</li> <li>• Industrial Revolution, 1760s–1890s (Spinning Jenny invented – Kinetoscope developed)</li> <li>• American Revolution, 1763–1783 (French and Indian War ends – Treaty of Paris signed)</li> <li>• French Revolution, 1789–1799 (Estates General meets – New Consulate established)</li> <li>• Age of Imperialism, 1848–1914 (Second Anglo-Sikh War begins – World War I begins)</li> <li>• Meiji Restoration, 1868–1912 (Meiji Government established – Emperor Meiji dies)</li> <li>• Boxer Rebellion and its aftermath, 1900–1911 (Boxer militancy in Pingyuan begins – overthrow of the Qing Dynasty)</li> <li>• Russian Revolution, 1905–1920s (Bloody Sunday takes place – Russian Civil War ends)</li> <li>• Xinhai Revolution and its aftermath, 1911–1916 (Wuchang Uprising begins – death of Yuan Shikai)</li> <li>• Iranian Revolution and its aftermath, 1977–1980s (anti-Shah demonstrations take place – Iran becomes an Islamic Republic)</li> <li>• Arab Spring since 2010 (Tunisian Revolution begins)</li> </ul>	<p><b>Movements in the modern world</b></p> <p>Two topics are studied in this unit. Unit 1	Unit 2	Unit 3	Unit 4
	<ul style="list-style-type: none"> <li>Environmental movement since the 1960s (Silent Spring published)</li> <li>LGBTQIA+ civil rights movement since 1969 (Stonewall Riots begin)</li> </ul> Pro-democracy movement in Myanmar (Burma) since 1988 (People Power Uprising begins)		assessment and has not been studied in Topic 1. Schools will be notified of the topic options at least two years before the external assessment is implemented.

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination — essay in response to historical sources	25%	Summative internal assessment 3 (IA3): • Investigation — historical essay based on research	25%
Summative internal assessment 2 (IA2): • Independent source investigation	25%	Summative external assessment (EA): • Examination — short responses to historical sources	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General History Preparation Course is required.

Social & Community Studies fosters personal and social knowledge and skills that lead to self-management and concern for others in the broader community. It empowers students to think critically, creatively and constructively about their future role in society.

Knowledge and skills to enhance personal development and social relationships provide the foundation of the subject. Personal development incorporates concepts and skills related to self-awareness and self-management, including understanding personal characteristics, behaviours and values; recognising perspectives; analysing personal traits and abilities; and using strategies to develop and maintain wellbeing.

The focus on social relationships includes concepts and skills to assist students engage in constructive interpersonal relationships, as well as participate effectively as members of society, locally, nationally or internationally.

Students engage with this foundational knowledge and skills through a variety of topics that focus on lifestyle choices, personal finance, health, employment, technology, the arts, and Australia's place in the world, among others. In collaborative learning environments, students use an inquiry approach to investigate the dynamics of society and the benefits of working thoughtfully with others in the community, providing them with the knowledge and skills to establish positive relationships and networks, and to be active and informed citizens.

Social & Community Studies encourages students to explore and refine personal values and lifestyle choices. In partnership with families, the school community and the community beyond school, including virtual communities, schools may offer a range of contexts and experiences that provide students with opportunities to practise, develop and value social, community and workplace participation skills.

## Pathways

A course of study in Social and Community Studies can establish a basis for further education and employment in many fields, as it helps students develop the skills and attributes necessary in all workplaces.

## Objectives

By the conclusion of the course of study, students should:

1. explain personal and social concepts and skills
2. examine personal and social information
3. apply personal and social knowledge
4. communicate responses
5. evaluate projects.

## Structure

Social and Community Studies is a four-unit course of study. This syllabus contains six QCAA-developed units as options for schools to select from to develop their course of study.

Unit option	Unit title
Unit option A	Lifestyle and financial choices
Unit option B	Healthy choices for mind and body
Unit option C	Relationships and work environments
Unit option D	Legal and digital citizenship
Unit option E	Australia and its place in the world
Unit option F	Arts and identity

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Social and Community Studies are:

Technique	Description	Response requirements
Investigation	Students investigate an issue relevant to the unit context by collecting and examining information to consider solutions and form a response.	<b>Planning and evaluation</b> <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media</li> <li>• Spoken: up to 7 minutes, or signed equivalent</li> <li>• Written: up to 1000 words</li> </ul>
Project	Students develop recommendations or provide advice to address a selected issue related to the unit context.	<b>Item of communication</b> One of the following: <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media</li> <li>• Spoken: up to 4 minutes, or signed equivalent</li> <li>• Written: up to 800 words</li> </ul> <b>Evaluation</b> One of the following: <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 4 minutes, 6 A4 pages, or equivalent digital media</li> <li>• Spoken: up to 3 minutes, or signed equivalent</li> <li>• Written: up to 500 words</li> </ul>
Extended response	Students respond to stimulus related to issue that is relevant to the unit context.	One of the following: <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered the same time): up to 7 minutes, 10 A4 pages, or equivalent digital media</li> <li>• Spoken: up to 7 minutes, or signed equivalent</li> <li>• Written: up to 1000 words</li> </ul>

## Prerequisites

Nil

In Physical Education, Arnold's seminal work (1979, 1985, 1988) provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in movement contexts (Brown & Penney 2012; Stolz & Thorburn 2017). Across the course of study, students will engage in a range of physical activities to develop movement sequences and movement strategies. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of the dimensions. In becoming physically educated, students learn to see how body and movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts and principles are relevant to their engagement and performance in physical activity.

The Physical Education syllabus is developmental and becomes increasingly complex across the four units. In Unit 1, students develop an understanding of the fundamental concepts and principles underpinning their learning of movement sequences and how they can enhance movement from a biomechanical perspective. In Unit 2, students broaden their perspective by determining the psychological factors, barriers and enablers that influence their performance and engagement in physical activity. In Unit 3, students enhance their understanding of factors that develop tactical awareness and influence ethical behaviour of their own and others' performance in physical activity. In Unit 4, students explore energy, fitness and training concepts and principles to optimise personal performance.

Students learn experientially through three stages of an inquiry approach to ascertain relationships between the scientific bases and the physical activity contexts. Students recognise and explain concepts and principles about and through movement, and demonstrate and apply body and movement concepts to movement sequences and movement strategies. Through their purposeful and authentic experiences in physical activities, students gather, analyse and synthesise data to devise strategies to

optimise engagement and performance. They evaluate and justify strategies about and in movement by drawing on informed, reflective decision-making.

Physically educated learners develop the 21st century skills of critical thinking, creative thinking, communication, personal and social skills, collaboration and teamwork, and information and communication technologies skills through rich and diverse learning experiences about, through and in physical activity. Physical Education fosters an appreciation of the values and knowledge within and across disciplines, and builds on students' capacities to be self-directed, work towards specific goals, develop positive behaviours and establish lifelong active engagement in a wide range of pathways beyond school.

## Pathways

A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching, sport journalism, sport marketing and management, sport promotion, sport development and coaching.

## Objectives

By the conclusion of the course of study, students will:

7. Recognise and explain concepts and principles about movement.
8. Demonstrate specialised movement sequences and movement strategies.
9. Apply concepts to specialised movement sequences and movement strategies.
10. Analyse and synthesise data to devise strategies about movement.
11. Evaluate strategies about and in movement.
12. Justify strategies about and in movement.
13. Make decisions about and use language, conventions and mode-

appropriate features for particular purposes and contexts.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Motor learning, functional anatomy and biomechanics in physical activity</b> <ul style="list-style-type: none"> <li>• Motor learning in physical activity</li> <li>• Functional anatomy and biomechanics in physical activity</li> </ul>	<b>Sport psychology and equity in physical activity</b> <ul style="list-style-type: none"> <li>• Sport psychology in physical activity</li> <li>• Equity — barriers and enablers</li> </ul>	<b>Tactical awareness and ethics in physical activity</b> <ul style="list-style-type: none"> <li>• Tactical awareness in physical activity</li> <li>• Ethics and integrity in physical activity</li> </ul>	<b>Energy, fitness and training in physical activity</b> <ul style="list-style-type: none"> <li>• Energy, fitness and training in physical activity</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Project — folio	25%	Summative internal assessment 3 (IA3): • Project — folio	25%
Summative internal assessment 2 (IA2): • Investigation — report	25%	Summative external assessment (EA): • Examination — combination response	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Health and Physical Education Preparation Course is required.

The Health syllabus provides students with a contextualised strengths-based inquiry of the various determinants that create and promote lifelong health, learning and active citizenship. Drawing from the health, behavioural, social and physical sciences, the Health syllabus offers students an action, advocacy and evaluation-oriented curriculum. Embedded in Health is the Health inquiry model that provides the conceptual framework for this syllabus.

The Health syllabus is developmental and becomes increasingly more complex across the four units through the use of the Health inquiry model. This syllabus is underpinned by a salutogenic (strengths-based) approach, which focuses on how health resources are accessed and enhanced. Resilience as a personal health resource in Unit 1, establishes key teaching and learning concepts, which build capacity for the depth of understanding over the course of study. Unit 2 focuses on the role and influence of peers and family as resources through one topic selected from two choices: Elective topic 1: Alcohol, or Elective topic 2: Body image. Unit 3 explores the role of the community in shaping resources through one topic selected from three choices: Elective topic 1: Homelessness, Elective topic 2: Transport safety, or Elective topic 3: Anxiety. The culminating unit challenges students to investigate and evaluate innovations that influence respectful relationships to help them navigate the post schooling life course transition.

Health uses an inquiry approach informed by the critical analysis of health information to investigate sustainable health change at personal, peer, family and community levels. Students define and understand broad health topics, which they reframe into specific contextualised health issues for further investigation. Students plan, implement, evaluate and reflect on action strategies that

mediate, enable and advocate change through health promotion.

Studying Health will highlight the value and dynamic nature of the discipline, alongside the purposeful processes and empathetic approach needed to enact change. The investigative skills required to understand complex issues and problems will enable interdisciplinary learning, and prepare students for further study and a diverse range of career pathways. The development of problem-solving and decision-making skills will serve to enable learning now and in the future.

The health industry is currently experiencing strong growth and is recognised as the largest industry for new employment in Australia, with continued expansion predicted due to ageing population trends. A demand for individualised health care services increases the need for health-educated people who can solve problems and contribute to improved health outcomes across the lifespan at individual, family, local, national and global levels. The preventive health agenda is future-focused to develop 21st century skills, empowering students to be critical and creative thinkers, with strong communication and collaboration skills equipped with a range of personal, social and ICT skills.

## Pathways

A course of study in Health can establish a basis for further education and employment in the fields of health science, public health, health education, allied health, nursing and medical professions.

## Objectives

By the conclusion of the course of study, students will:

1. Recognise and describe information about health-related topics and issues.
2. Comprehend and use the Health inquiry model.
3. Analyse and interpret information to draw conclusions about health-related topics and issues.
4. Critique information to distinguish determinants that influence health status.
5. Investigate and synthesise information to develop action strategies.
6. Evaluate and reflect on implemented action strategies to justify recommendations that mediate, advocate and enable health promotion.
7. Organise information for particular purposes.
8. Make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Resilience as a personal health resource</b>	<b>Peers and family as resources for healthy living</b> <ul style="list-style-type: none"> <li>• Alcohol</li> </ul>	<b>Community as a resource for healthy living</b> <ul style="list-style-type: none"> <li>• Anxiety</li> </ul>	<b>Respectful relationships in the post-schooling transition</b>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete *four* summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Investigation — action research	25%	Summative internal assessment 3 (IA3): • Investigation — analytical exposition	25%
Summative internal assessment 2 (IA2): • Examination — extended response	25%	Summative external assessment (EA): • Examination	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Health and Physical Education Preparation Course is required.

# Sport & Recreation

## Applied senior subject

Applied

Sport and recreation activities are a part of the fabric of Australian life and are an intrinsic part of Australian culture. These activities can encompass social and competitive sport, aquatic and community recreation, fitness and outdoor recreation. For many people, sport and recreation activities form a substantial component of their leisure time. Participation in sport and recreation can make positive contributions to a person's wellbeing.

Sport and recreation activities also represent growth industries in Australia, providing many employment opportunities, many of which will be directly or indirectly associated with hosting Commonwealth, Olympic and Paralympic Games. The skills developed in Sport & Recreation may be oriented toward work, personal fitness or general health and wellbeing. Students will be involved in learning experiences that allow them to develop their interpersonal abilities and encourage them to appreciate and value active involvement in sport and recreational activities, contributing to ongoing personal and community development throughout their lives.

Sport is defined as activities requiring physical exertion, personal challenge and skills as the primary focus, along with elements of competition. Within these activities, rules and patterns of behaviour governing the activity exist formally through organisations. Recreation activities are defined as active pastimes engaged in for the purpose of relaxation, health and wellbeing and/or enjoyment and are recognised as having socially worthwhile qualities. Active recreation requires physical exertion and human activity. Physical activities that meet these classifications can include active play and minor games, challenge and adventure activities, games and sports, lifelong physical

activities, and rhythmic and expressive movement activities.

Active participation in sport and recreation activities is central to the learning in Sport & Recreation. Sport & Recreation enables students to engage in sport and recreation activities to experience and learn about the role of sport and recreation in their lives, the lives of others and the community.

Engagement in these activities provides a unique and powerful opportunity for students to experience the challenge and fun of physical activity while developing vocational, life and physical skills.

Each unit requires that students engage in sport and/or recreation activities. They investigate, plan, perform and evaluate procedures and strategies and communicate appropriately to particular audiences for particular purposes.

### Pathways

A course of study in Sport & Recreation can establish a basis for further education and employment in the fields of fitness, outdoor recreation and education, sports administration, community health and recreation and sport performance.

### Objectives

By the conclusion of the course of study, students should:

1. Investigate activities and strategies to enhance outcomes
2. Plan activities and strategies to enhance outcomes
3. Perform activities and strategies to enhance outcomes
4. Evaluate activities and strategies to enhance outcomes.

## Structure

Sport & Recreation is a four-unit course of study. This syllabus contains 12 QCAA-developed units as options for schools to select from to develop their course of study.

Unit option	Unit title
Unit 1	Coaching and officiating
Unit 2	Fitness for Sport and Recreation
Unit 3	Aquatic Recreation
Unit 4	Emerging trends in Sport and Recreation

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Sport & Recreation are:

Technique	Description	Response requirements
Performance	Students investigate, plan, perform and evaluate activities and strategies to enhance outcomes in the unit context.	<p><b>Performance</b> Performance: up to 4 minutes</p> <p><b>Planning and evaluation</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media</li> <li>• Spoken: up to 3 minutes, or signed equivalent</li> <li>• Written: up to 500 words</li> </ul>
Project	Students investigate, plan, perform and evaluate activities and strategies to enhance outcomes in the unit context.	<p><b>Investigation and session plan</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media</li> <li>• Spoken: up to 3 minutes, or signed equivalent</li> <li>• Written: up to 500 words</li> </ul> <p><b>Performance</b> Performance: up to 4 minutes</p> <p><b>Evaluation</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media</li> <li>• Spoken: up to 3 minutes, or signed equivalent</li> <li>• Written: up to 500 words</li> </ul>

## Prerequisites

Nil

The need to communicate is the foundation for all language development. People use language to achieve their personal communicative needs — to express, exchange, interpret and negotiate meaning, and to understand the world around them. The central goal for additional language acquisition is communication. Students do not simply learn a language — they participate in a range of interactions in which they exchange meaning and become active participants in understanding and constructing written, spoken and visual texts.

Additional language acquisition provides students with opportunities to reflect on their understanding of a language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Communicating with people from Japanese-speaking communities provides insight into the purpose and nature of language and promotes greater sensitivity to, and understanding of, linguistic structures, including the linguistic structures of English. As students develop the ability to explore cultural diversity and similarities between another language and their own, this engagement with other languages and cultures fosters intercultural understanding.

Language acquisition occurs in social and cultural settings. It involves communicating across a range of contexts for a variety of purposes, in a manner appropriate to context. As students experience and evaluate a range of different text types, they reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions. This informs their capacity to create texts for a range of contexts, purposes and audiences.

Central to the capacity to evaluate and create texts are the skills of critical and creative thinking, intellectual flexibility and problem-solving. Acquiring an additional language provides the opportunity to develop these

interrelated skills, and requires students to use language in a meaningful way through the exchange of information, ideas and perspectives relevant to their life experiences.

For exchanges to be relevant and useful, additional language acquisition must position students at the centre of their own learning. When students communicate their own aspirations, values, opinions, ideas and relationships, the personalisation of each student's learning creates a stronger connection with the language. Activities and tasks are developed to fit within the student's life experience.

The ability to communicate in an additional language such as Japanese is an important 21st century skill. Students develop knowledge, understanding and skills that enable successful participation in a global society. Communication in an additional language expands students' horizons and opportunities as national and global citizens.

Additional language acquisition contributes to and enriches intellectual, educational, linguistic, metacognitive, personal, social and cultural development. It requires intellectual discipline and systematic approaches to learning, which are characterised by effective planning and organisation, incorporating processes of self-management and self-monitoring.

### Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

## Objectives

By the conclusion of the course of study, students will:

1. Comprehend Japanese to understand information, ideas, opinions and experiences
2. Identify tone, purpose, context and audience to infer meaning.
3. Analyse and evaluate information and ideas to draw conclusions.
4. Apply knowledge of language elements of Japanese to construct meaning.
5. Structure, sequence and synthesise information to justify opinions, ideas and perspectives
6. Communicate using contextually appropriate Japanese.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

Summative internal assessment 2 (IA2): • Examination — extended response	25%	Summative external assessment (EA): • Examination — combination response	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Japanese Preparation Course is required.

Accounting is a universal discipline, encompassing the successful management of financial resources of the public sector, businesses, and individuals. It is foundational to all organisations across all industries and assists in discharging accountability and financial control. Accounting is a way of systematically organising, critically analysing and communicating financial data and information for decision-making. The overarching context for this syllabus is the real-world expectation that accounting involves processing transactions to develop financial statements and reports to stakeholders. Digital technologies are integral to accounting, enabling real-time access to vital financial information.

When students study this subject, they develop an understanding of the essential role accounting plays in the successful performance of any organisation. Students learn fundamental accounting concepts in order to develop an understanding of accrual accounting, accounting for GST, managerial and accounting controls, internal and external financial statements, and analysis. Students are then ready for more complex utilisation of knowledge, allowing them to synthesise data and other financial information, evaluate practices of financial management, solve authentic accounting problems and make and communicate recommendations.

Accounting is for students with a special interest in business, commerce, entrepreneurship and the personal management of financial resources. The numerical, literacy, technical, financial, critical thinking, decision-making and

problem-solving skills learned in Accounting enrich the personal and working lives of students. Problem-solving and the use of authentic and diversified accounting contexts provide opportunity for students to develop an understanding of the ethical attitudes and values required to participate more effectively and responsibly in a changing business environment.

## Pathways

A course of study in Accounting can establish a basis for further education and employment in the fields of accounting, business, management, banking, finance, law, economics and commerce.

## Objectives

By the conclusion of the course of study, students will:

1. Comprehend accounting concepts, principles and process.
2. Synthesise accounting principles and process.
3. Analyse and interpret financial data and information.
4. Evaluate practices of financial management to make decisions and propose recommendations.
5. Create responses that communicate meaning.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Real world accounting</b> <ul style="list-style-type: none"> <li>• Introduction to accounting</li> <li>• Accounting for today's businesses</li> </ul>	<b>Financial Reporting</b> <ul style="list-style-type: none"> <li>• End-of-year reporting for today's businesses</li> <li>• Performance analysis of a sole trader business</li> </ul>	<b>Managing resources</b> <ul style="list-style-type: none"> <li>• Cash management</li> <li>• Managing resources for a sole trader business</li> </ul>	<b>Accounting — the big picture</b> <ul style="list-style-type: none"> <li>• Fully classified financial statement reporting and analysis for a sole trader business</li> <li>• Complete accounting process for a sole trader business</li> <li>• Performance analysis of a public company</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Summative internal assessment 2 (IA2): • Examination – combination response	25%	Summative external assessment (EA): • Examination — combination response	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Accounting and Business Preparation Course is required.

Business is multifaceted. It is a contemporary discipline with representation in every aspect of society including individuals, community and government. Business, as a dynamic and evolving discipline, is responsive to environmental changes such as emerging technologies, globalisation, sustainability, resources, economy and society.

The study of business is relevant to all individuals in a rapidly changing, technology-focused and innovation-driven world. Through studying Business, students are challenged academically and exposed to authentic practices. The knowledge and skills developed in Business will allow students to contribute meaningfully to society, the workforce and the marketplace and prepare them as potential employees, employers, leaders, managers and entrepreneurs of the future.

Students investigate the business life cycle from the seed to post-maturity stage and develop skills in examining business data and information. Students learn business concepts, theories and strategies relevant to leadership, management and entrepreneurship. A range of business environments and situations is explored. Through this exploration, students investigate the influence of and implications for strategic development in the functional areas of finance, human resources, marketing and operations.

Learning in Business integrates an inquiry approach with authentic case studies. Students become critical observers of business practices by applying an inquiry process in undertaking investigations of business situations. They use a variety of technological, communication and analytical tools to comprehend, analyse and interpret business data and information. Students evaluate strategies using business criteria that are flexible, adaptable and underpinned by communication, leadership, creativity and sophistication of thought.

This multifaceted course creates a learning environment that fosters ambition and

success, while being mindful of social and ethical values and responsibilities. Opportunity is provided to develop interpersonal and leadership skills through a range of individual and collaborative activities in teaching and learning. Business develops students' confidence and capacity to participate as members or leaders of the global workforce through the integration of 21st century skills.

Business allows students to engage with the dynamic business world (in both national and global contexts), the changing workforce and emerging digital technologies. It addresses contemporary implications, giving students a competitive edge in the workplace as socially responsible and ethical members of the business community, and as informed citizens, employees, consumers and investors.

## Pathways

A course of study in Business can establish a basis for further education and employment in the fields of business management, business development, entrepreneurship, business analytics, economics, business law, accounting and finance, international business, marketing, human resources management and business information systems.

## Objectives

By the conclusion of the course of study, students will:

1. Describe business situations and environments.
2. Explain business concepts and strategies.
3. Analyse and interpret business situations.
4. Evaluate business strategies.
5. Create responses that communicate meaning to suit audience, context and purpose.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Business creation</b> <ul style="list-style-type: none"> <li>• Fundamentals of business</li> <li>• Creation of business ideas</li> </ul>	<b>Business growth</b> <ul style="list-style-type: none"> <li>• Establishment of a business</li> <li>• Entering markets</li> </ul>	<b>Business diversification</b> <ul style="list-style-type: none"> <li>• Competitive markets</li> <li>• Strategic development</li> </ul>	<b>Business evolution</b> <ul style="list-style-type: none"> <li>• Repositioning a business</li> <li>• Transformation of a business</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Accounting and Business Preparation Course is required.

In Digital Solutions, students learn about algorithms, computer languages and user interfaces through generating digital solutions to problems. They engage with data, information and applications to generate digital solutions that filter and present data in timely and efficient ways while understanding the need to encrypt and protect data. They understand computing's personal, social and economic impact, and the issues associated with the ethical integration of technology into our daily lives.

Students engage in problem-based learning that enables them to explore and develop ideas, generate digital solutions, and evaluate impacts, components and solutions. They understand that solutions enhance their world and benefit society. To generate digital solutions, students analyse problems and apply computational, design and systems thinking processes. Students understand that progress in the development of digital solutions is driven by people and their needs.

Learning in Digital Solutions provides students with opportunities to develop, generate and repurpose solutions that are relevant in a world where data and digital realms are transforming entertainment, education, business, manufacturing and many other industries. Australia's workforce and economy requires people who are able to collaborate, use creativity to be innovative and entrepreneurial, and transform traditional approaches in exciting new ways.

By using the problem-based learning framework, students develop confidence in dealing with complexity, as well as tolerance for ambiguity and persistence in working with difficult problems that may have many solutions. Students are able to communicate and work with others in order to achieve a common goal or solution. Students write computer programs to generate digital solutions that use data; require interactions with users and within systems; and affect people, the economy and environments. Solutions are generated using combinations of readily available hardware and software

development environments, code libraries or specific instructions provided through programming. Some examples of digital solutions include instructions for a robotic system, an instructional game, a productivity application, products featuring interactive data, animations and websites.

Digital Solutions prepares students for a range of careers in a variety of digital contexts. It develops thinking skills that are relevant for digital and non-digital real-world challenges. It prepares them to be successful in a wide range of careers and provides them with skills to engage in and improve the society in which we work and play. Digital Solutions develops the 21st century skills of critical and creative thinking, communication, collaboration and teamwork, personal and social skills, and information and communication technologies (ICT) skills that are critical to students' success in further education and life.

## Pathways

A course of study in Digital Solutions can establish a basis for further education and employment in the fields of science, technologies, engineering and mathematics.

## Objectives

By the conclusion of the course of study, students will:

1. Recognise and describe elements, components, principles and processes.
2. Symbolise and explain information, ideas and interrelationships.
3. Analyse problems and information.
4. Determine solution requirements and criteria
5. Synthesise information and ideas to determine possible digital solutions.
6. Generate components of the digital solution.

7. Evaluate components and solutions against criteria to make refinements and justified recommendations and evaluate impacts.

8. Make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Creating with code</b> <ul style="list-style-type: none"> <li>• Understanding digital problems</li> <li>• User experiences and interfaces</li> <li>• Algorithms and programming techniques</li> <li>• Programmed solutions</li> </ul>	<b>Application and data solutions</b> <ul style="list-style-type: none"> <li>• Data-driven problems and solution requirements</li> <li>• Data and programming techniques</li> <li>• Prototype data solutions</li> </ul>	<b>Digital innovation</b> <ul style="list-style-type: none"> <li>• Interactions between users, data and digital systems</li> <li>• Real-world problems and solution requirements</li> <li>• Innovative digital solutions</li> </ul>	<b>Digital impacts</b> <ul style="list-style-type: none"> <li>• Digital methods for exchanging data</li> <li>• Complex digital data exchange problems and solution requirements</li> <li>• Prototype digital data exchanges</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Investigation — technical proposal	25%	Summative internal assessment 3 (IA3): • Project — digital solution	25%
Summative internal assessment 2 (IA2): • Project — digital solution	25%	Summative external assessment (EA): • Examination – combined response	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Digital Solutions Preparation Course is required.

Food & Nutrition is the study of food in the context of food science, nutrition and food technologies. Students explore the chemical and functional properties of nutrients to create food solutions that maintain the beneficial nutritive values. This knowledge is fundamental for continued development of a safe and sustainable food system that can produce high quality, nutritious solutions with an extended shelf life. The food system includes the sectors of production, processing, distribution, consumption, research and development. Waste management, sustainability and food protection are overarching principles that have an impact on all sectors of the food system. Students will actively engage in a food and nutrition problem-solving process to create food solutions that contribute positively to preferred personal, social, ethical, economic, environmental, legal, sustainable and technological futures.

Food & Nutrition is a developmental course of study. In Unit 1, students develop an understanding of the chemical and functional properties of vitamins, minerals and protein-based food, as well as sensory profiling, food safety, spoilage and preservation. In Unit 2, students explore consumer food drivers, sensory profiling, labelling and food safety, and the development of food formulations. In Unit 3, students develop knowledge about the chemical, functional and sensory properties of carbohydrate- and fat-based food, and food safety, food preservation techniques and spoilage. In Unit 4, students focus on the investigation of problems for nutrition consumer markets and develop solutions for these while improving safety, nutrition, transparency and accessibility, as well as considering the wider impacts and implications of solutions.

Using a problem-solving process in Food and Nutrition, students learn to apply their food science, nutrition and technologies knowledge to solve real-world food and nutrition problems. Students learn to explore complex, open-ended problems and develop

food and nutrition solutions. They recognise and describe problems, determine solution success criteria, develop and communicate ideas and generate, evaluate and refine real-world-related solutions. Students justify their decision-making and acknowledge the societal, economic and environmental sustainability of their food and nutrition solutions. The problem-based learning framework in Food and Nutrition encourages students to become self-directed learners and develop beneficial collaboration and management skills.

### Pathways

In Food & Nutrition, students learn transferable 21st century skills that support their aspirations, including critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills. Students become adaptable and resilient through their problem-solving learning experiences. These skills enable students to innovate and collaborate with people in the fields of science, technology, engineering and health to create solutions to contemporary problems in food and nutrition.

### Objectives

By the conclusion of the course of study, students will:

1. Recognise and describe food and nutrition facts and principles.
2. Explain food and nutrition ideas and problems.
3. Analyse problems, information and data.
4. Determine solution requirements and criteria.
5. Synthesise information and data.
6. Generate solutions to provide data to determine the feasibility of the solution.

7. Evaluate and refine ideas and solutions to make justified recommendations for enhancement.
8. Make decisions about and use mode-appropriate features, language and

conventions for particular purposes and contexts.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Food science of vitamins, minerals and protein</b> <ul style="list-style-type: none"> <li>• Introduction to the food system</li> <li>• Vitamins and minerals</li> <li>• Protein</li> </ul>	<b>Food drivers and emerging trends</b> <ul style="list-style-type: none"> <li>• Consumer food drivers</li> <li>• Sensory profiling</li> <li>• Food safety and labelling</li> <li>• Food formulation for consumers</li> </ul>	<b>Food science of carbohydrate and fat</b> <ul style="list-style-type: none"> <li>• Carbohydrate</li> <li>• Fat</li> </ul>	<b>Food solution development for nutrition consumer markets</b> <ul style="list-style-type: none"> <li>• Formulation and reformulation for nutrition consumer markets</li> <li>• Nutrition consumer markets</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination – combination response	25%	Summative internal assessment 3 (IA3): • Project — folio	25%
Summative internal assessment 2 (IA2): • Project — folio	25%	Summative external assessment (EA): • Examination	25%

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Food and Nutrition Preparation Course is required.

# Hospitality Practices

## Applied senior subject

Applied

Technologies have been an integral part of society as humans seek to create solutions to improve their own and others' quality of life. Technologies affect people and societies by transforming, restoring and sustaining the world in which we live. The hospitality industry is important economically and socially in Australian society and is one of the largest employers in the country. It specialises in delivering products and services to customers and consists of different sectors, including food and beverage, accommodation, clubs and gaming. Hospitality offers a range of exciting and challenging long-term career opportunities across a range of businesses. The industry is dynamic and uses skills that are transferable across sectors and locations.

The Hospitality Practices syllabus emphasises the food and beverage sector, which includes food and beverage production and service. The subject includes the study of industry practices and production processes through real-world related application in the hospitality industry context. Production processes combine the production skills and procedures required to implement hospitality events. Students engage in applied learning to recognise, apply and demonstrate knowledge and skills in units that meet local needs, available resources and teacher expertise. Through both individual and collaborative learning experiences, students learn to perform production and service skills, and meet customer expectations of quality in event contexts.

Applied learning hospitality tasks supports student development of transferable 21st century, literacy and numeracy skills relevant to the hospitality industry and future employment opportunities. Students learn to

recognise and apply industry practices; interpret briefs and specifications; demonstrate and apply safe practical production processes; communicate using oral, written and spoken modes; develop personal attributes that contribute to employability; and organise, plan, evaluate and adapt production processes for the events they implement. The majority of learning is done through hospitality tasks that relate to industry and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

## Pathways

A course of study in Hospitality Practices can establish a basis for further education and employment in the hospitality sectors of food and beverage, catering, accommodation and entertainment. Students could pursue further studies in hospitality, hotel, event and tourism or business management, which allows for specialisation.

## Objectives

By the conclusion of the course of study, students should:

1. Demonstrate practices, skills and processes
2. Interpret briefs
3. Select practices, skills and procedures
4. Sequence processes
5. Evaluate skills, procedures and products
6. Adapt production plans, techniques and procedures.

## Structure

Hospitality Practices is a four-unit course of study. This syllabus contains six QCAA-developed units as options for schools to select from to develop their course of study.

Unit option	Unit title
Unit option A	Culinary trends
Unit option B	Bar and barista basics
Unit option C	In-house dining
Unit option D	Casual dining

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Hospitality Practices are:

Technique	Description	Response requirements
Practical demonstration	Students produce and present an item related to the unit context in response to a brief.	<p><b>Practical demonstration</b> Practical demonstration: menu item</p> <p><b>Planning and evaluation</b> Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media</p>
Project	Students plan and deliver an event incorporating the unit context in response to a brief.	<p><b>Practical demonstration</b> Practical demonstration: delivery of event</p> <p><b>Planning and evaluation</b> Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media</p>
Investigation	Students investigate and evaluate practices, skills and processes.	<p><b>Investigation and evaluation</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 7 minutes, 10 A4 pages, or equivalent digital media</li> <li>• Written: up to 1000 words</li> </ul>

## Prerequisites

Nil

The Design subject focuses on the application of design thinking to envisage creative products, services and environments. Designing is a complex and sophisticated form of problem-solving that uses divergent and convergent thinking approaches that can be practised and improved. Designers are separated from the constraints of production processes to allow them to appreciate and exploit innovative ideas.

In Unit 1, students will learn about and experience designing in the context of stakeholder-centred design. They will be introduced to the range and importance of stakeholders and how the design process is used to respond to their needs and wants. In Unit 2, students will learn about and experience designing in the context of commercial design, considering the role of the client and the influence of economic, social and cultural issues. They will use a collaborative design approach. In Unit 3, students will learn about and experience designing in the context of human-centred design. They will use designing with empathy as an approach as they respond to the needs and wants of a particular person. In Unit 4, students will learn about and experience designing in the context of sustainable design. They will explore design opportunities and design to improve economic, social and ecological sustainability.

The teaching and learning approach uses a design process grounded in the problem-based learning framework. This approach enables students to learn about and experience design through exploring needs, wants and opportunities; developing ideas and design concepts; using sketching and low-fidelity prototyping skills; and evaluating ideas. Students communicate design proposals to suit different audiences.

Students will learn how design has influenced the economic, social and cultural environment in which they live. They will understand the agency of humans in conceiving and imagining possible futures through design. Students will develop

valuable 21st century skills in critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills. Collaboration, teamwork and communication are crucial skills needed to work in design teams and liaise with stakeholders. The design thinking students learn is broadly applicable to a range of professions and supports the development of critical and creative thinking.

Students will develop an appreciation of designers and their role in society. They will learn the value of creativity and build resilience as they experience iterative design processes, where the best ideas may be the result of trial and error and a willingness to take risks and experiment with alternatives. Design equips students with highly transferrable, future-focused thinking skills relevant to a global context.

## Pathways

A course of study in Design can establish a basis for further education and employment in the fields of architecture, digital media design, fashion design, graphic design, industrial design, interior design and landscape architecture.

## Objectives

By the conclusion of the course of study, students will:

1. Describe design problems and design criteria.
2. Represent ideas, design concepts and design information using visual representation skills.
3. Analyse needs, wants and opportunities using data.
4. Devise ideas in response to design problems.
5. Evaluate ideas to make refinements.

6. Propose design concepts in response to design problems.

7. Make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Stakeholder-centred design</b> <ul style="list-style-type: none"> <li>• Designing for others</li> </ul>	<b>Commercial design influences</b> <ul style="list-style-type: none"> <li>• Responding to needs and wants</li> </ul>	<b>Human-centred design</b> <ul style="list-style-type: none"> <li>• Designing with empathy</li> </ul>	<b>Sustainable design influences</b> <ul style="list-style-type: none"> <li>• Responding to opportunities</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context, however assessment types mirror Year 12 items.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination — design challenge	20%	Summative internal assessment 3 (IA3): • Project	25%
Summative internal assessment 2 (IA2): • Project	30%	Summative external assessment (EA): • Examination — design challenge	25%

## Prerequisite

In order to succeed in this subject, a C in the Year 10 General Design Preparation Course is required.

Engineering includes the study of mechanics, materials science and control technologies through real-world engineering contexts where students engage in problem-based learning. Students learn to explore complex, open-ended problems and develop engineered solutions. They recognise and describe engineering problems, determine solution success criteria, develop and communicate ideas and predict, generate, evaluate and refine real-world-related solutions. Students justify their decision-making and acknowledge the societal, economic and environmental sustainability of their engineered solutions. The problem-based learning framework in Engineering encourages students to become self-directed learners and develop beneficial collaboration and management skills.

Engineering provides students with an opportunity to experience, first-hand and in a practical way, the exciting and dynamic work of real-world engineers. Students learn transferrable 21st century skills that support their life aspirations, including critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills. The study of Engineering inspires students to become adaptable and resilient. They appreciate the engineer's ability to confidently and purposefully generate solutions that improve the quality of people's lives in an increasingly complex and dynamic technological world.

## Pathways

A course of study in Engineering can establish a basis for further education and employment in the field of engineering, including, but not limited to, civil, mechanical, mechatronic, electrical, aerospace, mining, process, chemical, marine, biomedical, telecommunications, environmental, micro-nano and systems. The study of engineering will also benefit students wishing to pursue post-school tertiary pathways that lead to careers in architecture, project management, aviation, surveying and spatial sciences.

## Objectives

By the conclusion of the course of study, students will:

1. Recognise and describe engineering problems, knowledge, concepts and principles
2. Symbolise and explain ideas and solutions
3. Analyse problems and information
4. Determine success criteria for engineering problems
5. Synthesise information and ideas to propose possible solutions
6. Generate prototype solutions to provide data to determine the feasibility of solutions
7. Evaluate and refine ideas and solutions to make justified recommendations
8. Make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Engineering fundamentals</b> <ul style="list-style-type: none"> <li>• Engineering in society</li> <li>• Engineering communication</li> <li>• Introduction to engineering mechanics</li> <li>• Introduction to engineering materials</li> </ul>	<b>Emerging technologies</b> <ul style="list-style-type: none"> <li>• Emerging needs in society</li> <li>• Emerging processes, machinery and automation</li> <li>• Emerging materials</li> </ul>	<b>Civil structures</b> <ul style="list-style-type: none"> <li>• Civil structures in society</li> <li>• Civil structures and forces</li> <li>• Civil engineering materials</li> </ul>	<b>Machines and mechanisms</b> <ul style="list-style-type: none"> <li>• Machines in society</li> <li>• Machines, mechanisms and control</li> <li>• Materials</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete *four* summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4

Summative internal assessment 2 (IA2): • Examination — combination response	25%	Summative external assessment (EA): • Examination — combination response	25%

## Prerequisite

In order to succeed in this subject, a C in the Year 10 General Engineering Technology Preparation Course is required.

Technologies are an integral part of society as humans seek to create solutions to improve their own and others' quality of life. Technologies affect people and societies by transforming, restoring and sustaining the world in which we live. In an increasingly technological and complex world, it is important to develop the knowledge, understanding and skills associated with traditional and contemporary tools and materials used by Australian manufacturing industries to produce products. The manufacturing industry transforms raw materials into products wanted by society. This adds value for both enterprises and consumers. Australia has strong manufacturing industries that continue to provide employment opportunities.

Furnishing Skills includes the study of the manufacturing and furnishing industry's practices and production processes through students' application in, and through trade learning contexts. Industry practices are used by furnishing enterprises to manage the manufacture of products from raw materials. Production processes combine the production skills and procedures required to produce products. Students engage in applied learning to demonstrate knowledge and skills in units that meet local needs, available resources and teacher expertise. Through both individual and collaborative learning experiences, students learn to meet customer expectations of product quality at a specific price and time.

Applied learning in manufacturing tasks supports students' development of transferable 21st century, literacy and numeracy skills relevant to future employment opportunities in the domestic, commercial and bespoke furnishing industries. Students learn to recognise and apply industry practices, interpret drawings

and technical information and demonstrate and apply safe practical production processes using hand/power tools and machinery. They communicate using oral, written and graphical modes, organise, calculate, plan, evaluate and adapt production processes and the products they produce. The majority of learning is done through manufacturing tasks that relate to business and industry. Students work with each other to solve problems and complete practical work.

### Pathways

A course of study in Furnishing Skills can establish a basis for further education and employment in the furnishing industry. With additional training and experience, potential employment opportunities may be found in furnishing trades as, for example, a furniture-maker, wood machinist, cabinet-maker, polisher, shopfitter, upholsterer, furniture restorer, picture framer, floor finisher or glazier.

### Objectives

By the conclusion of the course of study, students should:

1. Demonstrate practices, skills and procedures
2. Interpret drawings and technical information
3. Select practices, skills and procedures.
4. Sequence processes
5. Evaluate skills and procedures, and products
6. Adapt plans, skills and procedures.

## Structure

Furnishing Skills is a four-unit course of study. This syllabus contains six QCAA-developed units as options for schools to select from to develop their course of study.

Unit option	Unit title
Unit option A	Furniture-making
Unit option B	Cabinet-making
Unit option C	Interior furnishing
Unit option D	Production in the domestic furniture industry
Unit option E	Production in the commercial furniture industry
Unit option F	Production in the bespoke furniture industry

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Furnishing Skills are:

Technique	Description	Response requirements
Practical demonstration	Students perform a practical demonstration when manufacturing a unit context artefact and reflect on industry practices, and production skills and procedures.	<b>Practical demonstration</b> Practical demonstration: the skills and procedures used in 3–5 production processes <b>Documentation</b> Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media
Project	Students manufacture a product and document the manufacturing process.	<b>Product</b> Product: 1 multi-material furniture product manufactured using the skills and procedures in 5–7 production processes <b>Manufacturing process</b> Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media

# Industrial Graphics Skills

## Applied senior subject

Applied

Technologies are an integral part of society as humans seek to create solutions to improve their own and others' quality of life. Technologies affect people and societies by transforming, restoring and sustaining the world in which we live. In an increasingly technological and complex world, it is important to develop the knowledge, understanding and skills used by Australian manufacturing and construction industries to produce products. The manufacturing and construction industries transform raw materials into products required by society. This adds value for both enterprises and consumers. Australia has strong manufacturing and construction industries that continue to provide employment opportunities.

Industrial Graphics Skills includes the study of industry practices and drawing production processes through students' application in, and through a variety of industry-related learning contexts. Industry practices are used by enterprises to manage drawing production processes and the associated manufacture or construction of products from raw materials. Drawing production processes include the drawing skills and procedures required to produce industry-specific technical drawings and graphical representations. Students engage in applied learning to demonstrate knowledge and skills in units that meet local needs, available resources and teacher expertise. Through both individual and collaborative learning experiences, students learn to meet client expectations of drawing standards.

Applied learning supports students' development of transferable 21st century, literacy and numeracy skills relevant to future employment opportunities in the building and construction, engineering and furnishing industrial sectors. Students learn to interpret drawings and technical information, and

select and demonstrate manual and computerised drawing skills and procedures. The majority of learning is done through drafting tasks that relate to business and industry. They work with each other to solve problems and complete practical work.

## Pathways

A course of study in Industrial Graphics Skills can establish a basis for further education and employment in a range of roles and trades in the manufacturing industries. With additional training and experience, potential employment opportunities may be found in drafting roles such as architectural drafter, estimator, mechanical drafter, electrical drafter, structural drafter, civil drafter and survey drafter.

## Objectives

By the conclusion of the course of study, students should:

1. Demonstrate practices, skills and procedures
2. Interpret client briefs and technical information
3. Select practices, skills and procedures
4. Sequence processes
5. Evaluate skills and procedures, and products
6. Adapt plans, skills and products.

## Structure

Industrial Graphics Skills is a four-unit course of study. This syllabus contains six QCAA-developed units as options for schools to select from to develop their course of study.

Unit option	Unit title
Unit option A	Drafting for residential building
Unit option B	Computer-aided manufacturing drafting
Unit option C	Computer-aided drafting — modelling
Unit option D	Graphics for the construction industry
Unit option E	Graphics for the engineering industry
Unit option F	Graphics for the furnishing industry

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Industrial Graphics Skills are:

Technique	Description	Response requirements
Practical demonstration	Students perform a practical demonstration of drafting and reflect on industry practices, skills and drawing procedures.	<p><b>Practical demonstration</b> Practical demonstration: the drawing skills and procedures used in 3–5 drawing production processes</p> <p><b>Documentation</b> Multimodal (at least two modes delivered at the same time): drawings on up to 3 A3 pages supported by written notes or spoken notes (up to 3 minutes), or equivalent digital media</p>
Project	Students draft in response to a provided client brief and technical information.	<p><b>Product</b> Product: the drawing skills and procedures used in 5–7 drawing production processes</p> <p><b>Drawing process</b> Multimodal (at least two modes delivered at the same time): drawings on up to 4 A3 pages supported by written notes or spoken notes (up to 5 minutes), or equivalent digital media</p>

# Dance

## General senior subject

General

Dance uses the body as an instrument for expression and communication of ideas. It encourages the holistic development of a person, providing a way of knowing about oneself, others and the world. It is a means by which cultural heritage is preserved and translated through time.

Engaging in dance allows students to develop important, lifelong skills. Dance provides opportunities for students to critically examine and reflect on their world through higher order thinking and movement. Through studying Dance as both artist and as audience, students will develop a range of interrelated concepts, understanding and skills in dance as an art form and as a means of social inclusion. Students will study dance in various genres and styles, embracing a variety of cultural, societal and historical viewpoints integrating new technologies in all facets of the subject. Historical, current and emerging dance practices, works and artists are explored in global contexts and Australian contexts, including the dance of Aboriginal peoples and Torres Strait Islander peoples. Students will learn about dance as it is now and explore its origins across time and cultures.

Exploring dance through the lens of making (choreography and performance) and responding engages students in creative and critical thinking. As students create and communicate meaning through dance they develop aesthetic and kinaesthetic intelligence in addition to personal and social skills. Self-confidence is developed alongside an awareness of, and respect for, the body. The study of this subject increases the quality of personal and physical wellbeing and fosters social inclusion through focused experiences of valued collaborative practice. This subject prepares young people for participation in the 21st century by building skills and resources. Dance has the means to prepare students for future possibilities, with highly transferrable skills and the capacity for flexible thinking and doing. The study of

dance enables the application of critical thinking and literacy skills through which students create, demonstrate, express and reflect on meaning made through movement. Critical thinking and literacy skills are essential skills for the artist as both maker and audience, and learning in Dance prepares students to engage in a multimodal world. A course of study in Dance establishes a basis for further education and employment across many fields, both in the arts and culture industries and beyond. Dance develops individuals who are culturally sensitive, creative, complex and reflective thinkers.

## Pathways

A course of study in Dance establishes a basis for further education and employment across many fields, both in the arts and culture industries and beyond. Dance develops individuals who are culturally sensitive, creative, complex and reflective thinkers.

## Objectives

By the conclusion of the course of study, students will:

1. Demonstrate an understanding of dance concepts and skills.
2. Apply literacy skills.
3. Organise and apply the dance concepts.
4. Analyse and interpret dance concepts and dance skills.
5. Apply technical skills.
6. Realise meaning through expressive skills.
7. Create dance to communicate meaning.
8. Evaluate dance, justifying the use of dance concepts and dance skills.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p><b>Moving bodies</b> How does dance communicate meaning for different purposes and in different contexts?</p> <ul style="list-style-type: none"> <li>• Genres:           <ul style="list-style-type: none"> <li>– Contemporary</li> <li>– at least one other genre</li> </ul> </li> <li>• Subject matter:           <ul style="list-style-type: none"> <li>– meaning, purpose and context</li> <li>– historical and cultural origins of focus genres</li> </ul> </li> </ul>	<p><b>Moving through environments</b> How does the integration of the environment shape dance to communicate meaning?</p> <ul style="list-style-type: none"> <li>• Genres:           <ul style="list-style-type: none"> <li>– Contemporary</li> <li>– at least one other genre</li> </ul> </li> <li>• Subject matter:           <ul style="list-style-type: none"> <li>– physical dance environments including site-specific dance</li> <li>– virtual dance environments</li> </ul> </li> </ul>	<p><b>Moving statements</b> How is dance used to communicate viewpoints?</p> <ul style="list-style-type: none"> <li>• Genres:           <ul style="list-style-type: none"> <li>– Contemporary</li> <li>– at least one other genre</li> </ul> </li> <li>• Subject matter:           <ul style="list-style-type: none"> <li>– social, political and cultural influences on dance</li> </ul> </li> </ul>	<p><b>Moving my way</b> How does dance communicate meaning for me?</p> <ul style="list-style-type: none"> <li>• Genres:           <ul style="list-style-type: none"> <li>– fusion of movement styles</li> </ul> </li> <li>• Subject matter:           <ul style="list-style-type: none"> <li>– developing a personal movement style</li> <li>– personal viewpoints and influences on genre</li> </ul> </li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Performance	20%	Summative internal assessment 3 (IA3): • Project — dance work	35%
Summative internal assessment 2 (IA2): • Choreography	20%		
Summative external assessment (EA): 25% • Examination — extended response			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Dance Preparation Course is required.

# Drama

## General senior subject

General

Drama interrogates the human experience by investigating, communicating and embodying stories, experiences, emotions and ideas that reflect the human experience. It allows students to look to the past with curiosity, and explore inherited traditions of artistry to inform their own artistic practice and shape their world as global citizens. Drama is created and performed in diverse spaces, including formal and informal theatre spaces, to achieve a wide range of purposes. Drama engages students in imaginative meaning-making processes and involves them using a range of artistic skills as they make and respond to dramatic works. The range of purposes, contexts and audiences provides students with opportunities to experience, reflect on, understand, communicate, collaborate and appreciate different perspectives of themselves, others and the world in which they live.

Across the course of study, students will develop a range of interrelated skills of drama that will complement the knowledge and processes needed to create dramatic action and meaning. They will learn about the dramatic languages and how these contribute to the creation, interpretation and critique of dramatic action and meaning for a range of purposes. A study of a range of forms and styles in a variety of inherited traditions, current practice and emerging trends, including those from different cultures and contexts, forms a core aspect of the learning. Drama provides opportunities for students to learn how to engage with dramatic works as both artists and audience through the use of critical literacies.

In Drama, students engage in aesthetic learning experiences that develop the 21st century skills of critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills. They learn how to reflect on their artistic, intellectual, emotional and kinaesthetic understanding as creative and

critical thinkers and curious artists. Additionally, students will develop personal confidence, skills of inquiry and social skills as they work collaboratively with others.

The objectives of the Drama course are to develop students' knowledge, skills and understanding in the making of and responding to dramatic works to help them realise their creative and expressive potential as individuals. The unique learning that takes place in Drama promotes a deeper and more empathetic understanding and appreciation of others and communities. Innovation and creative thinking are at the forefront of this subject, which contributes to equipping students with highly transferable skills that encourage them to imagine future perspectives and possibilities.

## Pathways

A course of study in Drama establishes a basis for further education and employment across many fields, both inside the arts and culture industries and beyond. The knowledge, understanding and skills built in Drama connect strongly with careers in which it is important to understand different social and cultural perspectives in a range of contexts, and to communicate meaning in functional and imaginative ways.

## Objectives

By the conclusion of the course of study, students will:

1. Demonstrate skills of drama.
2. Apply literacy skills.
3. Interpret purpose, context and text.
4. Manipulate dramatic languages.
5. Analyse dramatic languages.
6. Evaluate dramatic languages.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p><b>Share</b> How does drama promote shared understandings of the human experience?</p> <ul style="list-style-type: none"> <li>• cultural inheritances of storytelling</li> <li>• oral history and emerging practices</li> <li>• a range of linear and non-linear forms</li> </ul>	<p><b>Reflect</b> How is drama shaped to reflect lived experience?</p> <ul style="list-style-type: none"> <li>• Realism, including Magical Realism, Australian Gothic</li> <li>• associated conventions of styles and texts</li> </ul>	<p><b>Challenge</b> How can we use drama to challenge our understanding of humanity?</p> <ul style="list-style-type: none"> <li>• Theatre of Social Comment, including Theatre of the Absurd and Epic Theatre</li> <li>• associated conventions of styles and texts</li> </ul>	<p><b>Transform</b> How can you transform dramatic practice?</p> <ul style="list-style-type: none"> <li>• Contemporary performance</li> <li>• associated conventions of styles and texts</li> <li>• inherited texts as stimulus</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Performance	20%	Summative internal assessment 3 (IA3): • Project — Practice-led project	35%
Summative internal assessment 2 (IA2): • Project — Dramatic concept	20%		
Summative external assessment (EA): 25% • Examination — extended response			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Drama Preparation Course is required.

# Film, Television & New Media

## General senior subject

General

Film, Television & New Media uses an inquiry learning model, developing critical thinking skills and creative capabilities through the exploration of five key concepts that operate in the contexts of production and use. The key concepts of technologies, representations, audiences, institutions and languages are drawn from a range of contemporary media theories and practices. Students will creatively apply film, television and new media key concepts to individually and collaboratively make moving-image media products, and will investigate and respond to moving-image media content and production contexts.

Film, television and new media are our primary sources of information and entertainment. They are important channels for educational and cultural exchange, and are fundamental to our self-expression and representation as individuals and as communities. Engaging meaningfully in local and global participatory media cultures enables us to understand and express ourselves. Through making and responding to moving-image media products, students will develop a respect for diverse perspectives and a critical awareness of the expressive, functional and creative potential of moving-image media in a diverse range of global contexts.

By studying Film, Television & New Media, students will develop knowledge and skills in creative thinking, communication, collaboration, planning, critical analysis, and digital and ethical citizenship. They will develop the necessary critical and creative skills to reflect on and appreciate Australian and global cultures and make sense of what they see and experience. Film, Television & New Media will equip students for a future of unimagined possibilities with highly transferable and flexible thinking and communication skills.

## Pathways

A course of study in Film, Television & New Media can establish a basis for further education and employment in the fields of information technologies, creative industries, cultural institutions, and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, film and television, and public relations.

## Objectives

By the conclusion of the course of study, students will:

1. Design moving-image media products.
2. Create moving-image media products.
3. Film, television and new media ideas, elements and processes.
4. Apply literacy skills.
5. Analyse moving-image media products.
6. Evaluate film, television and new media products, practices and viewpoints.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p><b>Foundation</b></p> <ul style="list-style-type: none"> <li>• Concept: technologies</li> </ul> <p>How are tools and associated processes used to create meaning?</p> <ul style="list-style-type: none"> <li>• Concept: institutions</li> </ul> <p>How are institutional practices influenced by social, political and economic factors?</p> <ul style="list-style-type: none"> <li>• Concept: languages</li> </ul> <p>How do signs and symbols, codes and conventions create meaning?</p>	<p><b>Stories</b></p> <ul style="list-style-type: none"> <li>• Concept: representations</li> </ul> <p>How do representations function in story forms?</p> <ul style="list-style-type: none"> <li>• Concept: audiences</li> </ul> <p>How does the relationship between story forms and meaning change in different contexts?</p> <ul style="list-style-type: none"> <li>• Concept: languages</li> </ul> <p>How are media languages used to construct stories?</p>	<p><b>Participation</b></p> <ul style="list-style-type: none"> <li>• Concept: technologies</li> </ul> <p>How do technologies enable or constrain participation?</p> <ul style="list-style-type: none"> <li>• Concept: audiences</li> </ul> <p>How do different contexts and purposes impact the participation of individuals and cultural groups?</p> <ul style="list-style-type: none"> <li>• Concept: institutions</li> </ul> <p>How is participation in institutional practices influenced by social, political and economic factors?</p>	<p><b>Artistry</b></p> <ul style="list-style-type: none"> <li>• Concept: technologies</li> </ul> <p>How do media artists experiment with technological practices?</p> <ul style="list-style-type: none"> <li>• Concept: representations</li> </ul> <p>How do media artists portray people, places, events, ideas and emotions?</p> <ul style="list-style-type: none"> <li>• Concept: languages</li> </ul> <p>How do media artists use signs, symbols, codes and conventions in experimental ways to create meaning?</p>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete *four* summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Case study investigation	15%	Summative internal assessment 3 (IA3): • Stylistic production	35%
Summative internal assessment 2 (IA2): • Multi-platform content project	25%		
Summative external assessment (EA): 25% • Examination — extended response			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Film, Television and New Media Preparation Course is required.

# Music

## General senior subject

General

Music is a unique art form that uses sound and silence as a means of personal expression. It allows for the expression of the intellect, imagination and emotion and the exploration of values. Music occupies a significant place in everyday life of all cultures and societies, serving social, cultural, celebratory, political and educational roles.

The study of music combines the development of cognitive, psychomotor and affective domains through making and responding to music. The development of musicianship through making (composition and performance) and responding (musicology) is at the centre of the study of music.

Through composition, students use music elements and concepts, applying their knowledge and understanding of compositional devices to create new music works. Students resolve music ideas to convey meaning and/or emotion to an audience.

Through performance, students sing and play music, demonstrating their practical music skills through refining solo and/or ensemble performances. Students realise music ideas through the demonstration and interpretation of music elements and concepts to convey meaning and/or emotion to an audience.

In musicology, students analyse the use of music elements and concepts in a variety of contexts, styles and genres. They evaluate music through the synthesis of analytical information to justify a viewpoint.

In an age of change, Music has the means to prepare students for a future of unimagined possibilities; in Music, students develop highly transferable skills and the capacity for flexible thinking and doing. Literacy in Music is an essential skill for both musician and

audience, and learning in Music prepares students to engage in a multimodal world.

A study of music provides students with opportunities to develop their intellect and personal growth and to make a contribution to the culture of their community. Students develop the capacity for working independently and collaboratively, reflecting authentic practices of music performers, composers and audiences. Studying music provides the basis for rich, lifelong learning.

## Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

## Objectives

By the conclusion of the course of study, students will:

1. Demonstrate technical skills.
2. Use music elements and concepts.
3. Analyse music.
4. Apply compositional devices.
5. Apply literacy skills.
6. Interpret music elements and concepts.
7. Evaluate music.
8. Realise music ideas.
9. Resolve music ideas.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p><b>Designs</b> Through inquiry learning, the following is explored:</p> <p>How does the treatment and combination of different music elements enable musicians to design music that communicates meaning through performance and composition?</p>	<p><b>Identities</b> Through inquiry learning, the following is explored:</p> <p>How do musicians use their understanding of music elements, concepts and practices to communicate cultural, political, social and personal identities when performing, composing and responding to music?</p>	<p><b>Innovations</b> Through inquiry learning, the following is explored:</p> <p>How do musicians incorporate innovative music practices to communicate meaning when performing and composing?</p>	<p><b>Narratives</b> Through inquiry learning, the following is explored:</p> <p>How do musicians manipulate music elements to communicate narrative when performing, composing and responding to music?</p>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Performance	20%	Summative internal assessment 3 (IA3): • Integrated project	35%
Summative internal assessment 2 (IA2): • Composition	20%		
Summative external assessment (EA): 25% • Examination – extended response			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Music Preparation Course is required. It is advised that students have also achieved a minimum Grade 4 AMEB practice and theory.

# Music Extension (Composition)

General senior subject – Year 12 subject only in conjunction with General Music

General

Music is a unique art form that uses sound and silence as a means of personal expression. It allows for the expression of the intellect, imagination and emotion, and the exploration of values.

The purpose of Music Extension is to provide challenging and rigorous opportunities for students to realise their potential as composers, musicologists or performers, and to provide the basis for rich, lifelong learning. This syllabus considers that students with an extended history of music involvement frequently reach a high level of musical sophistication and aspire to specialise.

The Music Extension syllabus should be read in conjunction with the Music syllabus. In Music Extension, students follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Composition specialisation (making), students create and resolve new music works. They demonstrate use of music concepts and manipulate music concepts to express meaning and/or emotion to an audience through resolved compositions. In the Musicology specialisation (responding), students investigate and analyse music works and ideas. They synthesise analytical information about music, and document sources and references about music to support research. In the Performance specialisation (making), students realise music works, demonstrating technical skills and understanding. They make decisions about music, interpret music elements and

concepts, and realise music ideas in their performances.

Music Extension prepares students for a future of unimagined possibilities, helping them to become self-motivated and emotionally aware. As a unique means of expression, music makes a profound contribution to personal, social and cultural identities. As they develop highly transferable and flexible skills, students become adaptable and innovative problem-solvers and collaborative team members who make informed decisions. As enquirers, students develop their ability to analyse and critically evaluate. Literacy in Music Extension is an essential skill for composers, musicologists and performers, and learning in Music Extension prepares students to engage in a multimodal world.

## Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

## Objectives

By the conclusion of the course of study, students will:

1. Analyse music
2. Apply literacy skills
3. Evaluate music
4. Apply compositional devices
5. Manipulate music elements and concepts
6. Resolve music ideas.

## Structure

Unit 3	Unit 4
<b>Explore</b> <ul style="list-style-type: none"> <li>• Key idea 1: Initiate best practice</li> <li>• Key idea 2: Consolidate best practice</li> </ul>	<b>Emerge</b> <ul style="list-style-type: none"> <li>• Key idea 3: Independent best practice</li> </ul>

## Assessment

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Composition 1	20%	Summative internal assessment 3 (IA3): • Composition project	35%
Summative internal assessment 2 (IA2): • Composition 2	20%		
Summative external assessment (EA): 25% • Examination — extended response			

## Prerequisites

The offer to study Music Extension in Year 12 will be based upon review of students' academic portfolios from Year 11 Music.

# Music Extension (Performance)

General senior subject – Year 12 subject only in conjunction with General Music

General

Music is a unique art form that uses sound and silence as a means of personal expression. It allows for the expression of the intellect, imagination and emotion, and the exploration of values. The purpose of Music Extension is to provide challenging and rigorous opportunities for students to realise their potential as composers, musicologists or performers, and to provide the basis for rich, lifelong learning. This syllabus considers that students with an extended history of music involvement frequently reach a high level of musical sophistication and aspire to specialise.

The Music Extension syllabus should be read in conjunction with the Music syllabus. In Music Extension, students follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Composition specialisation (making), students create and resolve new music works. They demonstrate use of music concepts and manipulate music concepts to express meaning and/or emotion to an audience through resolved compositions. Summative external assessment (EA): 25% • Examination — extended response			

## Prerequisites

The offer to study Music Extension in Year 12 will be based upon review of students' academic portfolios from Year 11 Music.

# Visual Art

## General senior subject

Visual Art students have opportunities to construct knowledge and communicate personal interpretations by working as both artist and audience. In making artworks, students use their imagination and creativity to innovatively solve problems and experiment with visual language and expression. Students develop knowledge and skills when they create individualised responses and meaning by applying diverse art materials, techniques, technologies and processes. On their individual journey of exploration, students learn to communicate personal thoughts, feelings, ideas, experiences and observations. In responding to artworks, students investigate artistic expression and critically analyse artworks in diverse contexts. They consider meaning, purposes and theoretical approaches when ascribing aesthetic value and challenging ideas. Students interact with artists, artworks, institutions and communities to enrich their experiences and understandings of their own and others' art practices.

Visual Art uses an inquiry learning model, developing critical and creative thinking skills and individual responses through developing, researching, reflecting and resolving. Through making and responding, resolution and display of artworks, students understand and appreciate the role of visual art in past and present traditions and cultures, as well as the contributions of contemporary visual artists and their aesthetic, historical and cultural influences.

This subject prepares young people for participation in the 21st century by fostering curiosity and imagination, and teaching students how to generate and apply new and creative solutions when problem-solving in a range of contexts. This learnt ability to think in divergent ways and produce creative and expressive responses enables future artists, designers and craftspeople to innovate and collaborate with the fields of science, technology, engineering and mathematics to design and manufacture images and objects that enhance and contribute significantly to our daily lives.

Visual Art prepares students to engage in a multimodal, media-saturated world that is reliant on visual communication. Through the critical thinking and literacy skills essential to both artist and audience, learning in Visual Art empowers young people to be discriminating, and to engage with and make sense of what they see and experience. Visual Art equips students for a future of unimagined possibilities as they develop highly transferable communication skills and the capacity for global thinking. Visual Art encourages students to reflect on and appreciate multiple perspectives and philosophies, and to confidently and creatively contribute and engage in all facets of society to sustain our diverse Australian culture.

General

## Pathways

A course of study in Visual Art can establish a basis for further education and employment in the fields of arts practice, design, craft, and information technologies; broader areas in creative industries and cultural institutions; and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, galleries and museums, film and television, public relations, and science and technology.

## Objectives

By the conclusion of the course of study, students will:

1. Implement ideas and representations.
2. Apply literacy skills.
3. Analyse and interpret visual language, expression and meaning in artworks and practices.
4. Evaluate influences.
5. Justify viewpoints.
6. Experiment in response to stimulus.
7. Create visual responses using knowledge and understanding of art media.
8. Realise responses to communicate meaning.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Investigation — inquiry phase 1	20%	Summative internal assessment 3 (IA3): • Project — inquiry phase 3	30%
Summative internal assessment 2 (IA2): • Project — inquiry phase 2	25%		
Summative external assessment (EA): 25%			
• Examination			

## Prerequisites

In order to succeed in this subject, a C in the Year 10 General Visual Art Preparation Course is required.

# Media Arts in Practice

## Applied senior subject

Applied

The arts are woven into the fabric of community. They have the capacity to engage and inspire students, enriching their lives, stimulating curiosity and imagination, and encouraging them to reach their creative and expressive potential. Arts subjects provide opportunities for students to learn problem-solving processes, design and create art, and use multiple literacies to communicate intention with diverse audiences.

Media arts refers to art-making and artworks composed and transmitted through film, television, radio, print, gaming and web-based media. Students explore the role of the media in reflecting and shaping society's values, attitudes and beliefs. They learn to be ethical and responsible users and creators of digital technologies and to be aware of the social, environmental and legal impacts of their actions and practices.

Students develop the necessary knowledge, understanding and skills required for emerging careers in a dynamic and creative field that is constantly adapting to new technologies. Learning is connected to relevant arts industry practice and opportunities, promoting future employment and preparing students as agile, competent, innovative and safe arts workers, who can work collaboratively to solve problems and complete project-based work.

When responding, students use analytical processes to identify individual, community or global problems and develop plans and designs for media artworks. They use reasoning and decision-making to justify their choices, reflecting and evaluating on the success of their own and others' art-making. When making, students demonstrate knowledge and understanding of media arts practices to communicate artistic intention. They gain an appreciation of how media artworks connect ideas and purposes with audiences. Students develop competency with and independent selection of modes, media technologies and media techniques as they make design products and media artworks, synthesising ideas developed through the responding phase.

### Pathways

A course of study in Media Arts in Practice can establish a basis for further education and employment in a dynamic, creative and global industry that is constantly adapting to new technologies.

### Objectives

By the conclusion of the course of study, students should:

1. Use media arts practices
2. Plan media artworks
3. Communicate ideas
4. Evaluate media artworks.

## Structure

Media Arts in Practice is a four-unit course of study. This syllabus contains four QCAA-developed units as options for schools to combine in any order to develop their course of study.

Unit option	Unit title
Unit option A	The Publicist
Unit option B	Representations
Unit option C	Community
Unit option D	Persuasion

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Media Arts in Practice are:

Technique	Description	Response requirements
Project	Students make and evaluate a design product and plan a media artwork that is the focus of the unit.	<b>Design product</b> Design product must represent: <ul style="list-style-type: none"><li>• Audio: up to 3 minutes</li><li>• Moving image: up to 3 minutes</li><li>• Still image: up to 4 media artwork/s</li></ul> <b>Planning and evaluation of design product</b> One of the following: <ul style="list-style-type: none"><li>• Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media</li><li>• Written: up to 600 words</li><li>• Spoken: up to 4 minutes, or signed equivalent</li></ul>
Media artwork	Students implement the design product from the project to make a media artwork that is the focus of the unit.	<b>Media artwork</b> One of the following: <ul style="list-style-type: none"><li>• Audio: up to 3 minutes</li><li>• Moving image: up to 3 minutes</li><li>• Still image: up to 4 media artwork/s</li></ul>

# Visual Arts in Practice

## Applied senior subject

Applied

The arts are woven into the fabric of community. They have the capacity to engage and inspire students, enriching their lives, stimulating curiosity and imagination, and encouraging them to reach their creative and expressive potential. Arts subjects provide opportunities for students to learn problem-solving processes, design and create art, and use multiple literacies to communicate intention with diverse audiences.

In Visual Arts in Practice, students respond to authentic, real-world stimulus (e.g. problems, events, stories, places, objects, the work of artists or artisans), seeing or making new links between art-making purposes and contexts. They explore visual language in combination with media, technologies and skills to make artworks. Throughout the course, students are exposed to two or more art-making modes, selecting from 2D, 3D, digital (static) and time-based and using these in isolation or combination, as well as innovating new ways of working.

When responding, students use analytical processes to identify problems and develop plans or designs for artworks. They use reasoning and decision-making to justify their choices, reflecting and evaluating on the success of their own and others' art-making. When making, students demonstrate knowledge and understanding of visual features to communicate artistic intention. They develop competency with and independent selection of media, technologies and skills as they make experimental and resolved artworks, synthesising ideas developed throughout the responding phase.

Learning is connected to relevant industry practice and opportunities, promoting future employment and preparing students as agile, competent, innovative and safe workers who can work collaboratively to solve problems and complete project-based work in various contexts.

## Pathways

A course of study in Visual Arts in Practice can establish a basis for further education and employment in a range of fields, including design, styling, decorating, illustrating, drafting, visual merchandising, make-up artistry, advertising, game design, photography, animation or ceramics.

## Objectives

By the conclusion of the course of study, students should:

1. Use visual arts practices
2. Plan artworks
3. Communicate ideas
4. Evaluate artworks.

## Structure

Visual Arts in Practice is a four-unit course of study. This syllabus contains four QCAA-developed units as options for schools to combine in any order to develop their course of study.

Unit option	Unit title
Unit option A	Looking inwards (self)
Unit option B	Looking outwards (others)
Unit option C	Clients
Unit option D	Transform & extend

## Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Visual Arts in Practice are:

Technique	Description	Response requirements
Project	Students make artwork, design proposals and stylistic experiments. They evaluate artworks, art style and/or practices that explore the focus of the unit. Students plan resolved artworks.	<p><b>Experimental folio</b> Up to 8 experimental artworks: 2D, 3D, digital (static) and/or time-based (up to 30 seconds)</p> <p>OR</p> <p><b>Prototype artwork</b> One of the following:</p> <ul style="list-style-type: none"> <li>• 2D, 3D, digital (static): up to 4 artwork/s</li> <li>• Time-based: up to 3 minutes</li> </ul> <p>OR</p> <p><b>Design proposal</b> Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media, including up to 4 prototype artwork/s — 2D, 3D, digital (static) and/or time-based (up to 30 seconds each)</p> <p>OR</p> <p><b>Folio of stylistic experiments</b> Up to 8 experimental artworks: 2D, 3D, digital (static) and/or time-based (up to 30 seconds)</p> <p>AND</p> <p><b>Planning and evaluations</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes, or signed equivalent</li> </ul>
Resolved artwork	Students make a resolved artwork that communicates and/or addresses the focus of the unit.	<p><b>Resolved artwork</b> One of the following:</p> <ul style="list-style-type: none"> <li>• 2D, 3D, digital (static): up to 4 artwork/s</li> <li>• Time-based: up to 3 minutes</li> </ul>

## Costs in addition to the Student Resource Scheme

### 2027 – Year 11 Additional Costs & Subject Levies

Some subjects incur additional costs. These may include subject levies, incursion/excursion costs, course costs or competition entry fees. Please see information provided below to indicate costs associated with subject selection that is not included in the Student Resource Scheme. Only subjects with additional costs for 2027 have been listed. All costs are true and correct at the time of production but may be subject to change.

<b>GENERAL SUBJECTS</b>	
<b>Subject</b>	<b>Additional Costs and Subject Levies</b>
Biology	Excursion for completion of IA2 \$30.00
Dance	Senior Dance Eisteddfod (optional) - \$120.00 per year Dance Showcase Tickets - \$30.00 - \$35.00 per year Black Leotard and tights - \$70.00 Theatre performance \$50.00
Design	<b>Subject Levy:</b> \$25.00
Digital Solutions	Adobe Creative Suite \$10.00
Drama	Evening 'live' performance – \$30.00 Arts Council Performance - \$30.00 Students will be required to have theatre blacks – black t-shirt and black pants for performance assessment \$50.00
Engineering	<b>Subject Levy:</b> \$100

<b>Vocational Courses - Certificates</b>	
<b>Senior Subject</b>	<b>Additional Costs and Subject Levies</b>
Certificate III Business	Biannual cost \$265.00
Certificate III in Tourism	Excursion \$75.00
Certificate II Hospitality	Subject Levy: \$150.00

# VOCATIONAL EDUCATION AND TRAINING

## What is VET?

These subjects are competency based and are solely aimed at Certificate qualifications. Students will be awarded a Certificate on completion or awarded a Statement of Attainment for completed competencies, providing ACSHS has been supplied with the student's Unique Student Identifier (USI).

As the subjects are competency based there is no grade awarded during reporting or on the Senior Statement, but all competencies and the completion of the certificate are stated on the senior statement and contribute towards the QCE.

These courses are designed for students wanting Certificate qualifications and who are interested in continuing with further studies or employment within these areas, either while at school or post year 12.

## What is Career Ready (VETiS) Funding?

The Career Ready VET in schools (VETiS) program is an action of the Queensland Government's Training Priorities Plan 2024-25 to help school students make good career and training choices, so they can leave school career-ready, informed and confident in their future.

The new Career Ready program aims to help students better understand their career and training options and provide stronger pathways to work – with fee-free VET courses that have strong industry and employment connections, including more school-based apprenticeships and traineeships.

The program complements work to improve school-to-work transitions initiated through the Queensland Workforce Strategy, including providing access to high-quality career information and facilitating school-industry partnerships through Regional School Industry Partnership Managers located in state school regions across the state.

Delivery of courses under the new program will continue to be through selected Skills Assure Suppliers (SAS), with Career Ready expanded to be a discrete and targeted funding program that supports young people to access skills for employment.

<https://www.qld.gov.au/education/training/subsidies/career-ready>

\*\* Funded enrolments will depend on the DTET's final publication of the 2026 Career Ready VETiS funded qualifications list expected July 2025. \*\*

# BSB30120 Certificate III in Business

RTO: 31319 Binnacle Training

School delivered standalone VET subject

Binnacle’s Certificate III in Business ‘Business in Schools’ program is offered as a senior subject where students learn what it takes to become a Business Professional. Students achieve skills in leadership and organisation, customer service, personal management, teamwork and relationships, business technology and financial literacy – incorporating the delivery of a range of projects and services within their school community. Students will also investigate business opportunities.

HOW DOES IT WORK	CAREER PATHWAYS
<p>This qualification reflects the role of individuals in a variety of Business Services job roles.</p> <p>The program will be delivered through class-based tasks as well as both simulated and real business environments at the school - involving the delivery of a range of projects and services within the school community.</p> <p><b>This program also includes the following:</b></p> <ul style="list-style-type: none"> <li>› Student opportunities to design for a new product or service as part of our (non-accredited) Entrepreneurship Project - Binnacle Boss</li> <li>› Students examine business opportunities and participate in an Industry discovery</li> </ul> <p>An excellent work readiness program where students develop a range of essential workplace skills.</p>	<pre> graph TD     A["BUSINESS IN SCHOOLS Certificate III in Business"] --&gt; B["UNIVERSITY DEGREE"]     A --&gt; C["CERTIFICATE IV / DIPLOMA (e.g. Business; Small Business Management)"]     B --&gt; D["BUSINESS OWNER"]     B --&gt; E["ACCOUNTANT / BUSINESS ADVISOR"]     B --&gt; F["MARKETING MANAGER"]     C --&gt; G["BUSINESS MANAGER"]     C --&gt; H["CUSTOMER SERVICE MANAGER"]     </pre>

UNITS OF COMPETENCY			
BSBPEF201	Support personal wellbeing in the workplace	BSBXTW301	Work in a team
BSBPEF301	Organise personal work priorities	BSBCRT311	Apply critical thinking skills in a team environment
FNSFLT311	Develop and apply knowledge of personal finances	BSBTEC301	Design and produce business documents
BSBWHS311	Assist with maintaining workplace safety	BSBWRT311	Write simple documents
BSBSUS211	Participate in sustainable work practices	BSBTEC201	Use business software applications
BSBXCM301	Engage in workplace communication	BSBTEC203	Research using the internet
BSBTWK301	Use inclusive work practices		
OPTIONAL ADDITIONAL UNITS OF COMPETENCY			
BSBCMM411	Make presentations*	BSBPEF402	Develop personal work priorities*

Please note this 2027 Course Schedule is current at the time of publishing and should be used as a guide only. This document is to be read in conjunction with Binnacle Training's Program Disclosure Statement (PDS). The PDS sets out the services and training products Binnacle Training as an RTO provides, and those services carried out by the School as Third Party (i.e. the facilitation of training and assessment services). Access Binnacle's Product Disclosure Statement [here](#).

**Prerequisites:** In order to succeed in this subject, previous study is advised.

# BSB50120 Diploma of Business

RTO: 45252 Get Set Education

School delivered standalone VET subject

2027 Subject Selection | School Program

## BSB50120 Diploma of Business (Business Development)

Delivered at Albany Creek State High School under a third party arrangement\* with Get Set Education (RTO Code 45252).

Qualification	Nationally recognised qualification. Awarded on successful completion of all units/assessment requirements.
Delivery	Blended face-to-face with online learning.
Duration	18 months (3 semesters).
Required weekly time commitment	In Class: Timetabled lessons (attendance rates are monitored) Homework: Expectation in line with other senior school subjects.
Entry requirements	1. Student subject selection interview completed (school process). 2. LLND assessment completed prior to enrolment acceptance, minimum LLND skills requirements apply. 3. Parent/guardian permission (if under 18).
Technology	BYOD Laptop + reliable internet access (further details below).
Course Fee	\$1499.00 (12-month payment plan available via Debit Success, additional fees apply).
Successful completion of the Diploma provides a maximum of 8 credits towards the QCE and may be considered by universities when assessing tertiary entry pathways. Learn more at <a href="http://www.getset.edu.au/uni-pathways">www.getset.edu.au/uni-pathways</a>	

The Diploma of Business specialising in Business Development focuses on how businesses plan, promote, and improve what they do. It covers practical business skills that are used across many industries, including:

- Business planning and operations (setting goals, organising work, improving processes).
- Marketing and promotion (how organisations communicate and reach customers).
- Communication in the workplace (writing emails, reports, and presenting ideas clearly).
- Project and teamwork skills (planning tasks, meeting deadlines, working with others).
- Problem-solving and decision-making (using information to make sound choices).

### Explore future pathways

This Diploma is suitable for students who want to develop practical business and leadership skills, enjoy working on real-world projects, including in teams, and are curious about how businesses operate, grow and succeed.

The skills developed in this qualification may be relevant to:

- exploring future roles in the Business Services industry, including areas such as marketing, administration and customer service.
- developing foundational skills that may assist with running or contributing to a small business.
- supporting future study and pathway options, including apprenticeships, traineeships and university pathways, depending on individual circumstances and entry requirements.

## GET SET EDUCATION

### BSB50120 Diploma of Business (Business Development)

#### Units of competency

Students complete 12 units (5 Core and 7 Electives):

BSBXCM501 Lead communication in the workplace	SIRXMKT006 Develop a social media strategy
BSBCRT511 Develop critical thinking in others	BSBMKG546 Develop social media engagement plans
BSBFIN501 Manage budgets and financial plans	BSBOPS601 Develop and implement business plans
SIRXMG005 Lead the development of business opportunities	BSBOPS501 Manage business resources
BSBSUS511 Develop workplace policies and procedures for sustainability	BSBOPS505 Manage organisational customer service
BSBMKG541 Identify and evaluate marketing opportunities	BSBOPS504 Manage business risk

#### How Students Learn and Complete Assessment

- Timetabled classroom lessons and support at school from a school-based Trainer/Assessor.
- All students have the opportunity to attend weekly after school and school holiday online study sessions with a Get Set Education Trainer and Assessor in addition to their core learning requirements.
- Get Set Education provides online learning and assessment through aXcelerate, the Learning Management System used to access course materials and assessment tasks.
- Assessment evidence may include written responses, eLearning projects, practical tasks and observations.
- Tasks are submitted across each semester to demonstrate competency.

#### BYOD minimum requirements (for aXcelerate access)

- Portable laptop running Windows 10+ (or macOS 11+).
- Headset capable (for e-Learning tutorial videos).
- Current web browser (Chrome recommended).
- Microsoft Office (Word, Excel, PowerPoint) or compatible software, advised by your school.
- Reliable internet at home to access learning content and submit assessments.

#### More detailed information on areas including:

Qualification and Course Provider	Entry Requirements and Support Arrangements
Delivery and Assessment Arrangements	Fees, Payment Options and Inclusions
is provided in the BSB50120 Diploma of Business Course Information available on our website <a href="http://www.getset.edu.au/resources">www.getset.edu.au/resources</a>	

\*Albany Creek State High School supports student recruitment, delivers training, provides school-based support, and conducts observation-based assessment where required. Get Set Education manages enrolment, online learning resources, and written assessment for this cohort. All information provided is accurate as of May 2026 but subject to change.

#### Assessment:

Items encompass a wide variety of learning experiences and assessment instruments including quizzes, written responses, case studies and projects. All assessment is competency based.

**Career Options:** The competencies gained lead into the Commerce Industry. Examples of possible careers include: Executive Officer, Administration Supervisor, Program Consultant, Program Coordinator or Administration Manager.

#### Additional costs / excursion costs not included in the student resource scheme:

\$1499.00 course fee paid in 12 instalments or upfront.

**Prerequisites:** In order to succeed in this subject, students will be expected to have achieved at least a C level of achievement in both Year 10 General English and Mathematics Preparation courses.

# CPC20220 Certificate II in Construction Pathways

RTO: 31193 Blue Dog Training

The qualification, CPC20220 Certificate II in Construction Pathways provides a pathway to the primary trades in the construction industry with the exception of plumbing. The program is delivered in partnership with the school and Blue Dog Training RTO 31193 for the delivery of the specified qualification.

Training and assessment are via Blue Dog Training's blended mode of delivery which comprises both on-line training and face to face classroom-based training at the school workshop. ACSHS teachers work with Blue Dog Training trainers and assessors who attend the school on a structured basis throughout the school year to support student outcomes.

To achieve this qualification, a student must demonstrate competency in 10 units of competency as follows:

Five (5) core units of competency and Five (5) elective units of competency.

## Core

CPCCOM1012 Work effectively and sustainably in the construction industry

CPCCOM1013 Plan and organise work

CPCCOM1015 Carry out measurements and calculations

\*CPCCVE1011\* Undertake a basic construction project

CPCCWHS2001 Apply WHS requirement, policies and procedures in the construction industry

## Elective

CPCCCM1011 Undertake basic estimation and costing

\*CPCCCM2004\* Handle construction materials

\*CPCCCA2002\* Use carpentry tools and equipment

#CPCWHS1001 Prepare to work safely in the construction industry

\*CPCCWF2002\* Use wall and floor tiling tools and equipment

## Cost:

Option 1: Students can nominate to use their VETiS funding to pay for this qualification.

Option 2: Fee-For-Service (no VETiS funding) \$1200

## Pathways:

The course is designed to introduce learners to the recognised trade callings in the construction industry and provide meaningful credit in a construction industry Australian Apprenticeship. Completion of this qualification is a useful step towards the following career pathways including Carpenter, Bricklayer, Tiler, Plasterer, Painter and a Concreter.

# MEM20422 Certificate II in Engineering Pathways

RTO: 31193 Blue Dog Training

The qualification, MEM20422 Certificate II Engineering Pathways provides students with an introduction to an engineering or related working environment. The program is delivered in partnership with the school and Blue Dog Training RTO 31193 for the delivery of the specified qualification.

Training and assessment are via Blue Dog Training's blended mode of delivery which comprises both on-line training and face to face classroom-based training at the school workshop. ACSHS teachers work with Blue Dog Training trainers and assessors who attend the school on a structured basis throughout the school year to support student outcomes.

To achieve this qualification, a student must demonstrate competency in 12 units of competency as follows:

Four (4) core units of competency and Eight (8) elective units of competency.

## Core

MEM13015 Work safely and effectively in manufacturing and engineering

MEMPE005 Develop a career plan for the engineering and manufacturing industries

MEMPE006 Undertake a basic engineering project

MSMENV272 Participate in environmentally sustainable work practices

## Elective

\*MEM11011\* Undertake manual handling

\*MEM16006\* Organise and communicate information

\*MEM16008\* Interact with computing technology

\*MEM18001\* Use hand tools

\*MEM18002\* Use power tools/hand held operations

MEMPE001 Use engineering workshop machines

MEMPE002 Use electric welding machines

MEMPE007 Pull apart and re-assemble engineering mechanisms

## Cost:

Option 1: Students can nominate to use their VETiS funding to pay for this qualification.

Option 2: Fee-For-Service (no VETiS funding) \$1200

## Pathways:

Students gain skills and knowledge in a range of engineering and manufacturing tasks which will enhance their entry-level employment prospects for apprenticeships, traineeships or general employment in an engineering-related workplace. Possible apprenticeship career pathways include:

Engineering - Fabrication Trade (Boilermaking/ Welding)

Engineering - Fabrication Trade (Sheetmetal working)

Engineering - Mechanical Trade (Fitting and/or Turning)

Engineering - Mechanical Trade (Machining)

Engineering - Mechanical Trade (Diesel Fitting/Fixed & Mobile Plant Mechanic)

# CUA30120 Certificate III in Dance or CUA40120 Certificate IV in Dance

RTO: 91600 Australian Dance Institute

School delivered  
standalone VET  
subject

**Course Outline:** The study of Certificate III or IV in Dance provides aspiring dancers with Dance Excellence training and a nationally recognised qualification whilst allowing the students to complete high school. Students will have the opportunity to focus on dance performance, fitness, artistic expression to enhance their individual and group performance work. Students may also study Senior General Dance alongside a certificate course. The options for certificate courses are as follows:

Certificate III in Dance offers the following units:

### Core Units

CUAWHS311	Condition the body for dance performance
CUAPRF317	Develop performance techniques
CUADAN331	Integrate rhythm in dance and movement technique
CUACHR311	Develop basic dance composition skills
CUACOS304	Develop and apply knowledge of costume

BSBTWK201	Work effectively with others
CUADAN3113	Develop and apply dance partnering techniques
CUADAN316 OR	Increase depth of ballet technique or
CUADAN315 OR	Increase depths of jazz technique or
CUADAN321	Increase depth of tap technique
CUAMUP311	Prepare personal appearance for performance
CUADLT311	Develop basic dance analysis skills
CUADTM311	Assist with teaching dance
CUARES301	Apply knowledge of history and theory to own arts practice
CUAIND311	Work effectively in the creative arts industry

And/or Certificate IV in Dance offers the following units:

### Core Units

CUAWHS411	Apply movement and behavioural principles to physical Conditioning
CUADAN417	Develop expertise in dance performance technique
CUADAN313	Develop dance partnering techniques
CUAPRF415	Rehearse for performance
CUAPRF414	Develop movement skills for performance
CUACHR413	Develop choreography skills

### Elective Units

CUAWHS413	Incorporate Anatomy into Skill Development
CUADAN418 OR	Develop Expertise in ballet dance technique OR
CUADAN413 OR	Develop Expertise in jazz dance technique OR
CUADAN420	Develop Expertise in tap dance technique
CUAMUP311	Prepare personal appearance for performances
CUADLT311	Develop basic dance analysis skills
CUADLT412	Explore the relationship between music and dance
CUARES403	Research History & theory to inform own arts practice
CUAPPR414	Develop self as artist

**Prerequisites:**

**CUA30113 Certificate III in Dance**

Entry requirement: 15 years of age and have Grade 5 RAD or CSTD Grade 6 Jazz or CSTD Grade 6 Ballet or CSTD Advanced Bronze Tap Certificate. At the conclusion of the 2 Year Cert III course students must have attained Intermediate RAD or CSTD Grade 8 Jazz or CSTD Elementary Ballet or CSTD Advanced Gold Tap Certificates from an external private dance studio.

**CUA40113 Certificate IV in Dance**

Entry requirements: 15 years of age and Intermediate RAD Certificate. At the conclusion of the course students must have attained Advanced Foundation and Advanced 1 RAD from an external private dance studio.

**Assessment:** Dance Examination results, performance and classwork, workbooks and study guides. Assessment activities are combined with course material comprising of multiple choice, questionnaire, self check worksheets, comprehension based workbooks, research assignments and creative portfolio projects.

**Additional costs / excursion costs not included in the student resource scheme:**

CUA30120 Certificate III in Dance Progressive \$1050.00  
*(subject to completion of CUA20120 Certificate II in Dance)*

CUA30120 Certificate III in Dance Direct Entry \$1250.00

CUA40120 Certificate IV in Dance Progressive \$1150.00  
*(subject to completion of CUA30120 Certificate III in Dance)*

CUA40120 Certificate IV in Dance Direct Entry \$1400.00

*– Including \$150.00 registration fee. (Registration fee includes access to online learning portal, one on one tutor induction and individual training plan).*

*– Full payment is invoiced and can be paid by EFT, Master/Visa Card.*

***– Correct at the time of publication – subject to change by the RTO.***

# CHC30125 Certificate III in Early Childhood Education and Care

## RTO: 30380 Deception Bay State High School

**School delivered standalone VET subject**

### Training Product Description

This is an entry-level qualification for anyone wishing to commence a career in the early childhood sector. It provides students with an understanding of fundamental skills and knowledge relating to the care of children. Refer to [training.gov.au](http://training.gov.au) for specific information about the qualification.

### Entry requirements

Students must have a blue card for Working with Children prior to enrolment or commencement of training and have a desire to work with children.

### Duration and location

This two or three-year course is delivered on site or in partnership with Deception Bay State High School.

### Delivery modes

A range of delivery modes will be used during the teaching and learning of this qualification. These include face-to-face instruction, work-based learning, guided learning and online training.

### Fees

Fees for this course are \$200 paid to Deception Bay SHS. Each partnership school may wish to add an administration fee.

### Assessment

Assessment is competency-based, with units of competency clustered and assessed together to mirror real workplace practices in a childcare centre. Assessment methods include direct observation, compilation of work folios, and questioning.

### Work placement

Students must complete 160 hours of structured workplace learning in a regulated education and care setting. Some units require mandatory placement hours before competency can be awarded. The school will help organise placements, though students may arrange their own with RTO approval.

### RTO obligation

The RTO guarantees that the student will be provided with every opportunity to complete the qualification. We do not guarantee employment upon completion of this qualification.

### AQF documentation

Students who are deemed competent in 17 units of competency will be awarded a Qualification and a Record of Results. Students who achieve at least one unit of competency (but not the full qualification) will receive a Statement of Attainment.

## Course units

Unit code	Title
CHCECE030	Support inclusion and diversity
CHCECE031	Support children's health, safety and wellbeing
CHCECE032	Nurture babies and toddlers
CHCECE033	Develop positive and respectful relationships with children
CHCECE034	Use an approved learning framework to guide practice
CHCECE035	Support the holistic learning and development of children
CHCECE036	Provide experiences to support children's play and learning
CHCECE037	Support children to connect with the natural environment
CHCECE038	Observe children to inform practice
CHCECE054	Encourage understanding of Aboriginal and/or Torres Strait Islander Peoples culture
CHCECE055	Meet legal and ethical obligations in children's education and care
CHCECE056	Work effectively in children's education and care
CHCPRT025	Identify and report children and young people at risk
HLTAID012	Provide First Aid in an Education and Care Setting
HLTAID009	Provide Cardiopulmonary Resuscitation
HLTWHS001	Participate in workplace health and safety
HLTFSE001	Follow Basic Food Practices

## Pathways

This qualification may articulate into: Diploma in Early Childhood Education and Care; or work in the industry as an educator, nanny or after school hours care worker. See other community services qualifications at [training.gov.au](http://training.gov.au)

## Prerequisites:

Nil

# SIS30321 Certificate III in Fitness

## RTO:31319 Binnacle Training

### Standalone VET subject

Binnacle's Certificate III in Sport, Aquatics and Recreation 'Sport in Schools' program is offered as a senior subject where students participate in the delivery of a range of sport activities and programs within the school. Graduates will be competent in a range of essential skills – including officiating games or competitions, coaching beginner participants to develop fundamental skills, effective communication skills, providing quality service to participants, and using digital technologies in sport environments.

This program also includes the following:

- First Aid qualification and CPR certificate;

HOW DOES IT WORK	CAREER PATHWAYS
<p>This qualification provides a pathway to work as a fitness instructor in settings such as fitness facilities, gyms, and leisure and community centres.</p> <p>Students gain the entry-level skills required of a Fitness Professional (Group Exercise Instructor or Gym Fitness Instructor).</p> <p>Students facilitate programs within their school community including:</p> <ul style="list-style-type: none"> <li>› Community fitness programs</li> <li>› Strength and conditioning for athletes and teams</li> <li>› 1-on-1 and group fitness sessions with male adults, female adults and older adult clients</li> </ul>	
<h3>WHAT DO STUDENTS ACHIEVE?</h3>

# HLT33115 Certificate III in Health Services Assistance

(including HLT23221 Certificate II in Health Support Services)

## RTO: 40518 Connect 'n' Grow

### Qualification description:

Health and community services training is linked to the largest growth industry in Australia, estimated to grow by 20% over the next five years. These programs combine to provide students with entry level skills necessary for a career in the health sector and also provide a pathway to pursue further study. Skills acquired in this course include first aid, effective communication, workplace health and safety, infection control, understanding common medical terminology, conducting health checks, recognising healthy body systems and working with diverse people.

Refer to [training.gov.au](http://training.gov.au) for specific information about the qualification.

### Entry requirements:

There are no entry requirements to commence the first year of this qualification; however successful completion of the HLT23221 Certificate II in Health Support Services is required to continue into the Certificate III coursework.

International students may be able to enrol depending on their visa and/or the school's CRICOS registration. Contact the VET Coordinator for more information.

### Duration and location

This is a two-year course delivered on site to senior school students and in partnership with Connect 'n' Grow®.

### Year 1 (Certificate II units)

Unit Code	Title
CHCCOM005	Communicate and work in health or community services *
HLTWHS001	Participate in workplace health and safety *
CHCDIV001	Work with diverse people *
HLTINF006	Apply basic principles and practices of infection prevention and control *
CHCCCS010	Maintain a high standard of Service *
HLTHSS011	Maintain stock inventory
BSBPEF202	Plan and apply time management
BSBINS201	Process and maintain workplace information
HLTHSS009	Perform general cleaning tasks in a clinical setting
HLTWHS005	Conduct manual tasks safely
BSBOPS203	Deliver a service to customers
CHCPRP005	Engage with health professionals and the health system *

- Units Credit Transferred from Certificate II into Certificate III

### Year 2 (Certificate III units)

Unit Code	Title
HLTAAP001	Recognise healthy body systems
BSBMED301	Interpret and apply medical terminology
BSBWOR301*	Organise personal work priorities and development
BSBPEF301	Organise personal work priorities
HLTAID011	Provide first aid
HLTAID009	Provide cardiopulmonary resuscitation
HLTAID010	Provide basic emergency life support
CHCINM002	Meet community information needs
CHCCCS009	Facilitate responsible behaviour
CHCDIV002	Promote Aboriginal and/or Torres Strait Islander cultural safety

**Delivery modes:**

A range of delivery modes will be used during the teaching and learning of this qualification. These include”

- face-to-face training
- practical and scenarios
- online learning

**Fees:**

The total Fee For Service cost of these courses (Certificate II and Certificate III \$599) is \$1198. Students may be able to access funding to help subsidise the cost of their training. Contact the VET Coordinator or Connect ‘n’ Grow® to explore potential options.

**QCE Points**

Maximum 8 (up to 4 points for completion of the Certificate II and up to a further 4 points for completion of the Certificate III).

**Assessment;**

Assessment is competency based. Assessment techniques include:

- observation
- folio of work
- questionnaires
- written and practical tasks

**Work Experience;**

Students are highly encouraged to complete a minimum of 20 hours work experience in a health or community service facility to strengthen their skills, knowledge and employability. Connect ‘n’ Grow® considers industry experience to be a very important inclusion of the Certificate III qualifications.

**Pathways:**

Potential options may include:

- various Certificate IV qualifications
- Diploma of Nursing
- Bachelor Degree (B Nursing)
- Entry level employment within the health industry.

**Obligation:**

Students will be provided with every opportunity to complete this qualification. Employment is not guaranteed upon completion. Student deemed competent in all units of competency will be awarded the qualification and a record of results by Connect ‘n’ Grow®. Students who achieve at least one unit of competency (but not the full qualification) will receive a Statement of Attainment.

**Prerequisites: Nil**

# SIT20322 Certificate II in Hospitality

## RTO: 30207 ACSHS

### School delivered standalone VET subject

#### Course Outline:

Hospitality has become the one of the world's largest industries and its potential impact on societies and their economic and ecological future is enormous. The Hospitality industry has assumed increasing importance in Australian society as a source of expanding employment opportunities.

When undertaking this course, students are provided with the opportunity to obtain nationally recognised units which contribute to the SIT20322 Certificate II in Hospitality. Competencies achieved in this course can contribute to Hospitality Certificate III and Diploma courses studied after school.

#### Core Units

BSBTWK201	Work effectively with others
SITHIND006	Source and use information on the hospitality industry
SITHIND007	Use hospitality skills effectively
SITXCCS011	Interact with customers
SITXCOM007	Show social and cultural sensitivity
SITXWHS005	Participate in safe work practices

#### Elective Units

SITXFSA005	Use hygienic practices for food safety
SITHGAM022	Provide responsible gambling services
SITHFAB027	Serve food and beverage
SITHFAB021	Provide responsible service of alcohol
SITHFAB024	Prepare and serve non-alcoholic beverages
SITHFAB025	Prepare and serve espresso coffee

To achieve the qualification, students **must achieve all 6 core competencies, and all 6 of the elective competencies**. It is required that students **complete 12 service periods** in service events. This may occur at school on site during the delivery of the school café or restaurants or off-site work experience.

**Prerequisites:** Nil

**Assessment:** Items encompass a wide variety of learning experiences and assessment instruments including: research reports, orals, short response/stimulus tests, folio and written work, site visits, class practical exercises and participation in delivery of café, restaurant and off-site catering events. All assessment is competency based as per the National Training Package requirements.

**Career Options:** The course has the potential to develop skills of individuals of a social, technical and personal nature. Many opportunities will be provided for the investigation of the numerous aspects of the industry as well as the development of skills in food and beverage service and working in the Hospitality Industry. This qualification provides a pathway to work in various hospitality settings, such as restaurants, hotels, motels, catering operations, clubs, pubs, cafés, and coffee shops.

# ICT30120 Certificate III in Information Technology

RTO: 30207 ACSHS

**School delivered standalone VET subject**

## Course Outline:

Information Technology has become an essential skill all students need. It encourages critical thinking and problem solving skills and allows students the opportunity to inquire and grow their digital literacy. When undertaking this course, students are provided with the opportunity to obtain nationally recognised units which contribute to the ICT30120 Certificate III in Information Technology [all done right here at school!].

Competencies achieved in this course can contribute to Information Technology Certificate III and Diploma courses studied after school. They reflect the role of an individual who is competent in a range of Information and Communications Technology (ICT) roles and applies a broad set of skills to support a range of technologies, processes, procedures, policies and people, as well as clients in a variety of work contexts.

### Core Units

BSBCRT301	Develop and extend critical and creative thinking skills
BSBXCS303	Securely manage personally identifiable information and workplace information
BSBXTW301	Work in a team
ICTICT313	Identify IP, ethics and privacy policies in ICT environments
ICTPRG302	Apply introductory programming techniques
ICTSAS305	Provide ICT advice to clients

### Elective Units

CUAANM301	Create 2D digital animations
BSBITU211	Produce digital text documents
ICTICT214	Operate application software packages
CUADIG303	Produce and prepare photo images
ICTWEB304	Build simple websites
ICTWEB305	Produce digital images for the web

To achieve this qualification, students **must achieve all 6 core competencies, and 6 of the elective competencies.**

**Assessment:** Items encompass a wide variety of learning experiences and assessment instruments including: research, oral presentations, projects, folio work and practical exercises. All assessment is competency based as per the National Training Package requirements.

**Career Options:** This has the potential to develop skills of individuals in ICT areas including, animation, basic cloud computing, basic cyber awareness, digital media skills, generalist IT support services, networking, programming, systems and web development. This also includes foundational skills and knowledge in critical thinking and customer service skills.

### Additional costs / excursion costs not included in the student resource scheme:

There are no additional costs associated with this subject.

**Prerequisites:** In order to succeed in this subject, previous study is advised.

# SIT30122 Certificate III in Tourism

## RTO: 30207 ACSHS

### School delivered standalone VET subject

#### Course Outline:

Tourism has become the world's largest industry and its potential impact on societies and their economic and ecological future is enormous. The tourism industry has assumed increasing importance in Australian society as a source of expanding employment opportunities.

When undertaking this course, students are provided with the opportunity to obtain nationally recognised units which contribute to the SIT30122 Certificate III in Tourism [all done right here at school!]. Furthermore, high performing students in this subject are entered into the Queensland Tourism Industry Council's Salute to Excellence where they have the opportunity to make valuable links with industry representatives. Competencies achieved in this course may contribute to Tourism Certificate IV and Diploma courses studied after school. See the competencies covered in the certificate below:

#### Core Units

SITTIND003	Source and use information on the tourism and travel industry
SITXCCS014	Provide service to customers
SITXCOM007	Show social and cultural sensitivity
SITXWHS005	Participate in safe work practices

#### Elective Units

SITXCOM006	Source and present information
SITXCCS010	Provide visitor information
SITTGDE013	Interpret aspects of local Australian Indigenous culture
SITTGDE017	Prepare and present tour commentaries or activities
SITXCOM008	Provide a briefing or scripted commentary
SITXCCS009	Provide customer information and assistance
BSBCMM211	Apply communication skills
BSBTEC303	Create electronic presentations
BSBTEC201	Use business software applications
BSBTWK201	Work effectively with others
SITTGDE022	Prepare specialised interpretive content on cultural and heritage environments

To achieve the qualification, students **must achieve all 4 core competencies, and 11 of the elective competencies**. It is expected that students attend excursions to tourist sites such as Movie World in order to meet some of the competencies.

**Assessment:** Items encompass a wide variety of learning experiences and assessment instruments including: research reports, orals, short response/stimulus tests, folio and written work, site visits, class practical exercises and participation in class excursions. All assessment is competency based as per the National Training Package requirements.

**Prerequisites:** There are no prerequisites required.

**Career Options:** The course has the potential to develop skills of individuals of a social, technical and personal nature. Many opportunities will be provided for the investigation of the numerous aspects of the industry as well as the development of skills in communication, presentation and the decision-making processes.

#### Additional costs / excursion costs not included in the student resource scheme:

Tourism students will be expected to attend up to two excursions per year. The excursions are linked to assessment. Estimated cost is between \$20 and \$70 per excursion depending on venue.

## EXTERNAL COURSES

Some TAFE QLD and other RTO provider course fees are subsidised by Government funding. Most students are eligible to access funding to complete ONE (1) VETiS funded Certificate I or Certificate II qualification at TAFE QLD or other Registered Training Organisation OR ONE (1) User-Choice funding is available for School-based Apprentices/Trainees. Please note that funding arrangements for courses and qualifications are annually reviewed by the Federal Government. Therefore, fees and funding arrangements are subject to change without notice.

## TAFE BRISBANE and TAFE SKILLSTECH COURSES

<b>Locations:</b>	<b>TAFE BRISBANE TAFE SKILLSTECH</b>  (various locations)
<b>Contact:</b>	Head of Student Services – Years 11 and 12 Ph: 3325 6370
<b>Transport:</b>	Student's responsibility
<b>Selection:</b>	Expressions of Interest to TAFE Qld at the TAFE at School Portal with approval being required by ACSHS <a href="https://tafeapply.com/">https://tafeapply.com/</a> Application Codes can be found in the TAFE at School Course Guide
<b>Cost:</b>	Costs vary from course to course. If you are undertaking a Certificate I or II qualification, you may pay reduced fees or, in some cases, no tuition fees at all. If you choose to study a Certificate III course or higher you will incur fees.  <b>The advertised prices marked * will apply if students have used their funding entitlement.</b>

\*\*\* Funded enrolments will depend on the DTET's publication of the Career Ready funded qualifications list. The school will confirm delivery arrangements with the approved SAS provider before finalising Career Ready VET-funded enrolments.

**FFS:** Fee-For-Service (not Government subsidised)

**VSL: VET Student Loan** is a loan from the Australian Government that helps eligible students pay their tuition fees. Students' loans are repaid through the Australian tax system when they reach the minimum income threshold for repayment.

Students studying VSL-eligible qualifications may be able to cover enrolment tuition fees under a VET Student Loan if they meet the necessary citizenship, academic suitability and Tax File Number (TFN) eligibility requirements. For further details, go to <https://tafeqld.edu.au/courses/apply-and-enrol/what-it-costs/vet-student-loans>

**FHL: FEE Help Loan (FHL)** is a loan from the Australian Government that helps eligible students pay their tuition fees. Students' loans are repaid through the Australian tax system when they reach the minimum income threshold for repayment.

Please note: Some courses may have specific requirements and/or a requirement to undertake vocational placement hours. Please refer to each specific course in the 202 TAFE at Schools Course Guide and the TAFE website for further details.

**Course Outline:**

Brisbane TAFE at School and SkillsTech VET in Schools courses give Year 11 and 12 students an important head start on their career, a chance to complete a certificate qualification and possible credit towards further study.

Vocational Education offers students the opportunity to complete full qualifications alongside their secondary schooling and is a great study option for students seeking work, TAFE or university entrance beyond Year 12.

Benefits of undertaking a certificate or diploma level course through TAFE include those listed above, and in addition:

- Students will be better prepared for further study, having experienced the requirements of adult learning within a supported environment
- Students will receive a foundation of study that is both experiential and practical
- Students will be provided with a qualification that would allow direct entry into the workforce
- Students may be able to reduce the time taken to complete a university degree

Vocational Education qualifications can provide an excellent foundation of knowledge for further university study and are often considered favourably by many receiving organisations.

Students electing to complete a vocational qualification will still complete an additional 5 subjects to study at ACSHS as a part of their senior secondary curriculum.
